<i>Everyone Matters</i> Large Print Press Papers presented at the Eleventh International Conference on Patristic Studies held in Oxford 1991 (see also Studia Patristica 24, 26, 27 and 28). The successive sets of Studia Patristica contain papers delivered at the International Conferences on Patristic Studies, which meet for a week once every four years in Oxford; they are held under the aegis of the Theology Faculty of the University. Members of these conferences come from all over the world and most offer papers. These range over the whole field, both East and West, from the second century to a section on the Nachleben of the Fathers. The majority are short papers dealing with some small and manageable point; they raise and sometimes resolve questions about the authenticity of documents, dates of events, and such like, and some unveil new texts. The smaller number of longer papers put such matters into context and indicate wider trends. The whole reflects the state of Patristic scholarship and demonstrates the vigour and popularity of the subject. <i>Christology Of The Old Testament (Volume I)</i> BoD - Books on Demand Introduces young readers to the importance of showing respect for others, no matter how different they seem, and explains the difference between the types of respect that everyone deserves, and the types that must be earned by doing right. <i>An Epitome of the History of Medicine</i> Good Press NAMED A BEST BOOK OF THE YEAR BY ESQUIRE, THE IRISH TIMES AND THE TIMES LITERARY SUPPLEMENT A provocative history of men who were worshipped as gods that illuminates the connection between power and religion and the role of divinity in a secular age Ever since 1492, when Christopher Columbus made landfall in the New World and was hailed as a heavenly being, the accidental god has haunted the modern age. From Haile Selassie, acclaimed as the Living God in Jamaica, to Britain’s Prince Philip, who became the unlikely center of a new religion on a South Pacific island, men made divine—always men—have appeared on every continent. And because these deifications always emerge at moments of turbulence—civil wars, imperial conquest, revolutions—they have much to teach us. In a revelatory history spanning five centuries, a cast of surprising deities helps to shed light on the thorny questions of how our modern concept of “religion” was invented; why religion and politics are perpetually entangled in our supposedly secular age; and how the power to call someone divine has been used and abused by both oppressors and the oppressed. From nationalist uprisings in India to Nigerien spirit possession cults, Anna Della Subin explores how deification has been a means of defiance for colonized peoples. Conversely, we see how Columbus, Cortés, and other white explorers amplified stories of their godhood to justify their dominion over native peoples, setting into motion the currents of racism and exclusion that have plagued the New World ever since they touched its shores. At once deeply learned and delightfully antic, <i>Accidental Gods</i> offers an unusual keyhole through which to observe the creation of our modern world. It is that rare thing: a lyrical, entertaining work of ideas, one that marks the debut of a remarkable literary career. Philosophia perennis Scarecrow Press This pioneering volume of essays explores the destruction of great libraries since ancient times and examines the intellectual, political and cultural consequences of loss. Fourteen original contributions, introduced by a major re-evaluative history of lost libraries, offer the first ever comparative discussion of the greatest catastrophes in book history from Mesopotamia and Alexandria to the dispersal of monastic and monarchical book collections, the Nazi destruction of Jewish libraries, and the recent horrifying pillage and burning of books in Tibet, Bosnia and Iraq. <i>The Recess Queen</i> Good Press Shandygaff is about the life and adventures of newspaper editor Kenneth Stockton. Excerpt: "SHANDYGAFF: a very refreshing drink, being a mixture of bitter ale or beer and ginger-beer,	commonly drunk by the lower classes in England, and by strolling tinkers, low church parsons, newspaper men, journalists, and prizefighters. Said to have been invented by Henry VIII as a solace for his matrimonial difficulties. It is believed that a continual bibbing of shandygaff saps the will, the nerves, the resolution, and the finer faculties, but some will abide no other tipple." <i>Radio Fifth Grade</i> Simon and Schuster The touching story of a school principal and the bully whose life he'll change, by beloved New York Times bestselling author-illustrator Patricia Polacco. Mr. Lincoln is the coolest principal ever! He knows how to do everything, from jumping rope to leading nature walks. Everyone loves him . . . except for Eugene Esterhouse. But Mr. Lincoln knows that Eugene isn't really bad—he's just repeating things he's heard at home. Can the principal find a way to get through to "Mean Gene" and show him that the differences between people are what make them special? "A touching and complex story that sends a positive message to kids and creates hope for these working with kids who seem to be lost and categorized as bullies."—Children’s Literature <i>Schooled</i> Cambridge University Press Originally published under the title: Safe & caring schools. Gender and Sexual Diversity in Schools Oxford University Press, USA From the author of <i>How We Die</i> , the extraordinary story of the development of modern medicine, told through the lives of the physician-scientists who paved the way. How does medical science advance? Popular historians would have us believe that a few heroic individuals, possessing superhuman talents, lead an unselfish quest to better the human condition. But as renowned Yale surgeon and medical historian Sherwin B. Nuland shows in this brilliant collection of linked life portraits, the theory bears little resemblance to the truth. Through the centuries, the men and women who have shaped the world of medicine have been not only very human, but also very much the products of their own times and places. Presenting compelling studies of great medical innovators and pioneers, <i>Doctors</i> gives us a fascinating history of modern medicine. Ranging from the legendary Father of Medicine, Hippocrates, to Andreas Vesalius, whose Renaissance masterwork on anatomy offered invaluable new insight into the human body, to Helen Taussig, founder of pediatric cardiology and co-inventor of the original "blue baby" operation, here is a volume filled with the spirit of ideas and the thrill of discovery. Crossing Lines Penguin The study features the five most important and most efficacious themes of Western spirituality in their ancient historical origins and in their unfolding up to early modernity: Divine names, Mikrokosmos-Makrokosmos, theories of creation, the idea of spiritual spaces, and the concepts of eschatological history.

German critic Walter Benjamin wrote some immensely influential words on the work of art in the age of mechanical reproduction. Luxury fashion houses would say something shorter and sharper

and much more legally binding on the rip-off merchants who fake their products. Marcus Boon, a Canadian English professor with an accessible turn of phrase, takes us on an erudite voyage through the theme in a serious but engaging encounter with the ideas of thinkers as varied as Plato, Hegel, Orson Welles, Benjamin, Heidegger, Louis Vuitton, Takashi Murakami and many more, on topics as philosophically taxing and pop-culture-light as mimesis, Christianity, capitalism, authenticity, Uma Thurman's handbag and Disneyland.

"This book follows up on recent findings that modern postural yoga is the outcome of a complex process of transcultural exchange and syncretism and digs even deeper, looking to uncover the disparate but entangled roots of contemporary yoga practice. In doing so, it proposes that some of

what we call yoga, especially when it comes to North America and Europe, is only slightly genealogically related to pre-modern Indian yoga traditions. Rather, they are equally if not more grounded in Hellenistic theories of the subtle body, Western esotericism and magic, pre-modern European medicine, and late-nineteenth-century women's wellness programs. Marshalling these under the umbrella category of "harmonialism," the present book argues that they constitute a history of analogous practices that were gradually subsumed into the language of yoga. This allows us to fundamentally recontextualize the peculiarities of Western, and especially certain mainstream American form of yoga-their focus on aesthetic representation, their privileging of bodily posture and unsystematic incorporation of breathwork, and above all their overwhelmingly privileged female demographics. The initial chapters of the book lay out the basic shape and

history of these concepts and practices, while the later chapters explore their development into a spiritualized form of women's physical culture over the course of the late-nineteenth and early-twentieth centuries, including the ways in which they became increasingly associated with yoga"--
