The definitive book on steak has never been written-until now "Of all the meats, only one merits its own structure. There is no such place as a lamb house or a pork house, but even a small town can have a steak house." So begins Mark Schatzker's ultimate carnivorous quest. Fed up with one too many mediocre steaks, the intrepid journalist set out to track down, define, and eat the perfect specimen. His journey takes him to all the legendary sites of steak excellence-Texas, France, Scotland, Italy, Japan, Argentina, and Idaho's Pahsimeroi Valley-where he discovers the lunatic lengths steak lovers will go to consume the perfect cut. After contemplating the merits of Black Angus, Kobe, Chianina, and the prehistoric aurochs-a breed revived by the Nazis after four hundred years of extinction-Schatzker adopts his own heifer, fattens her on fruit, acorns, and Persian walnuts, and then grapples with ambivalence when this near-pet appears on his plate. Reminiscent of both Bill Bryson's and Bill Buford's writing, *Steak* is a warm, humorous, and wide-ranging read that introduces a wonderful new travel and food writer to the common table.

When Danyal gets selected for *Renaissance Man*, a school-wide academic championship, it's the perfect opportunity to show everyone he's smarter than they think. The United States has endured eleven recessions since the end of World War II, including the recession of 2007-2009. This book focuses on the performance of the economy and the actions taken during the expansion period before the onset of each recession. It's goal is to help prevent or at least lessen the severity of possible future recessions. Well-known economics writer Arthur Frumkin analyzes each of the eleven contemporary recessions to determine: What weaknesses appeared in the economy during the twelve months preceding the onset of the recession? What were economic forecasters predicting? What economics policy actions were taken by the Federal Reserve, the president, and Congress? Incorporating extensive real-time data, Frumkin points to persistent failures over the past sixty years by the Federal Reserve and the president to forecast or to acknowledge the possibility of future recessions. Based on these findings, he concludes with a range of policy recommendations for avoiding or ameliorating future recessions.

Postcolonial Studies in the Twenty-First Century Penguin

Literature for Our Times offers the widest range of essays on present and future directions in postcolonial studies ever gathered together in one volume. Demonstrating the capacity of different approaches and methodologies to 'live together' in a spirit of 'convivial democracy', these essays range widely across regions, genres, and themes to suggest the many different directions in which the field is moving. Beginning with an engagement with global concerns such as world literatures and cosmopolitanism, translation, diaspora and migrancy, established and emerging critics demonstrate the ways in which postcolonial analysis continues to offer valuable ways of analysing the pressing issues of a globalizing world. The field of Dalit studies is added to funda—mental interests in gender, race, and indigeneity, while the neglected site of the post—colonial city, the rising visibility of terrorism, and the continuing importance of trauma and loss are all addressed through an analysis of particular texts. In all of these ap—proaches, the versatility and adaptability of postcolonial theory is seen at its most energetic. Throughout human history, wars and violence have oftenbeen waged in the name of religions and in the name ofdiverging religious beliefs and

belonging. Ironically, though, all religions in their teachings speak of nonviolence and have in common the promotion of peace and justice, namely the respect of human life and dignity, the institution of human rights, the protection of the poor and vulnerable, the freeing of the oppressed, the active elimination of injustice? It seems therefore, that violence and wars would be antithetical to religions; yet they are so frequently used as their justification. Are we then speaking of different "religions"? "Institutional religions," the ones structured by humans and that are brandished to lead violence and wars, become in fact quite foreign to the essence of the religions as they were established by their founders and that they intend to represent; they actually contribute to their destruction. Wanting to reflect on that point, I embarked, a few years ago, on giving voice to local religious individuals, whom I called "Religious Peacemakers," and who, each by living the essential teachings of their particular faith, contributed by their actions to peace and justice. I wanted to prove that their path, irrespective of their original religion, would be similar, and that their diverse faith, instead of separating them, would on the contrary end up uniting them.

More than twenty years have passed since Walter Auffenberg's monumental *The Behavioral Ecology of the Komodo Monitor*. In the intervening years the populations of Komodo dragons—native only to a handful of islands in southeast Indonesia—have dwindled, sparking intensive conservation efforts. During the last two decades new information about these formidable predators has emerged, and the most important findings are clearly presented here. A memoir from Walter Auffenberg and his son Kurt is followed by the latest information on Komodo dragon biology, ecology, population distribution, and behavior. The second part of the book is dedicated to step-by-step management and conservation techniques, both for wild and captive dragons. This successful model is a useful template for the conservation of other endangered species as well, for, as Kurt and Walter Auffenberg note, "The species may well indeed survive in the wild for generations to come while countless other organisms are lost."
