In 1995 none of the political parties representing the peoples of Bosnia preferred a federal option. Yet, Bosnia became a federal state, highly decentralised and with a complex institutional architecture. This solution was imposed on them by international actors as a result of peace negotiations following the Yugoslav wars. Political parties in post-war Bosnia were not willing to identify with or accept the federation. The international community intervened taking over key decisions and so Bosnia and Herzegovina became the first state to experience a new model of federalism, namely 'imposed federalism' and a new model of a federal state, that of the 'internationally administered federation'. By combining comparative politics, conflict analysis and international relations theory Soeren Keil offers a unique analysis of federalism in post-Dayton Bosnia and Herzegovina. By exploring this model of 'imposed federalism' not only does this study greatly contribute to the literature on developments in Bosnia and Herzegovina it also re-evaluates comparative federalism in theory and practice. This study also offers important conclusions for similar cases, both in the Western Balkans region and the wider world, where international involvement and federalism as a method of conflict resolution in diverse societies becomes ever more prevalent and important.

The balance between state and federal health care financing for low-income people has been a matter of considerable debate for the last 40 years. Some argue for a greater federal role, others for more devolution of responsibility to the states. Medicaid, the backbone of the system, has been plagued by an array of problems that have made it unpopular and difficult to use to extend health care coverage. In recent years, waivers have given the states the flexibility to change many features of their Medicaid programs; moreover, the states have considerable flexibility to in establishing State Children's Health Insurance Programs. This book examines the record on the changing health safety net. How well have states done in providing acute and long-term care services to low-income populations? How have they responded to financial incentives and federal regulatory requirements? How innovative have they been? Contributing authors include Donald J. Boyd, Randall R. Bovbjerg, Teresa A. Coughlin, Ian Hill, Michael Housman, Robert E. Hurley, Marilyn Moon, Mary Beth Pohl, Jane Tilly, and Stephen Zuckerman.

This is a story of hope, but also of peril. It began when our nation's polarized political class started conscripting everyday citizens into their culture war. From their commanding heights in political parties, media, academia, and government, these partisans have attacked one another for years, but increasingly they've convinced everyday Americans to join the fray. Why should we feel such animosity toward our fellow citizens, our neighbors, even our own kin? Because we've fallen for the false narrative, eagerly promoted by pundits on the left and the right, that citizens who happen to vote Democrat or Republican are enthusiastic supporters of Team Blue or Team Red. Aside from a minority of party activists and partisans, however, most voters are simply trying to choose the lesser of two evils. The real threat to our union isn't Red vs Blue America, it's the quiet collusion within our nation's political class to take away that most American of freedoms: our right to self-governance. Even as partisans work overtime to divide Americans against one another, they've erected a system under which everyday citizens don't have a voice in the decisions that affect our lives. From foreign wars to how local libraries are run, authority no longer resides with We the People, but amongst unaccountable officials. The political class has stolen our birthright and set us at one another's throats. This is the story of how that happened and what we can do about it. America stands at a precipice, but there's still time to reclaim authority over our lives and communities.

From the Pulitzer Prize-winning scholar, a timely history of the constitutional changes that built equality into the nation's foundation and how those guarantees have been shaken over time. The Declaration of Independence announced equality as an American ideal, but it took the Civil War and the subsequent adoption of three constitutional amendments to establish that ideal as American law. The Reconstruction amendments abolished slavery, guaranteed all persons due process and equal protection of the law, and equipped black men with the right to vote. They established the principle of birthright citizenship and guaranteed the privileges and immunities of all citizens. The federal government, not the states, was charged with enforcement, reversing the priority of the original Constitution and the Bill of Rights. In grafting the principle of equality onto the Constitution, these

revolutionary changes marked the second founding of the United States. Eric Foner’s compact, insightful history traces the arc of these pivotal amendments from their dramatic origins in pre-Civil War mass meetings of African-American “colored citizens” and in Republican party politics to their virtual nullification in the late nineteenth century. A series of momentous decisions by the Supreme Court narrowed the rights guaranteed in the amendments, while the states actively undermined them. The Jim Crow system was the result. Again today there are serious political challenges to birthright citizenship, voting rights, due process, and equal protection of the law. Like all great works of history, this one informs our understanding of the present as well as the past: knowledge and vigilance are always necessary to secure our basic rights.

*The Federalist Papers* Greenwood

Classic Books Library presents this brand new edition of “The Federalist Papers”, a collection of separate essays and articles compiled in 1788 by Alexander Hamilton. Following the United States Declaration of Independence in 1776, the governing doctrines and policies of the States lacked cohesion. “The Federalist”, as it was previously known, was constructed by American statesman Alexander Hamilton, and was intended to catalyse the ratification of the United States Constitution. Hamilton recruited fellow statesmen James Madison Jr., and John Jay to write papers for the compendium, and the three are known as some of the Founding Fathers of the United States. Alexander Hamilton (c. 1755–1804) was an American lawyer, journalist and highly influential government official. He also served as a Senior Officer in the Army between 1799-1800 and founded the Federalist Party, the system that governed the nation’s finances. His contributions to the Constitution and leadership made a significant and lasting impact on the early development of the nation of the United States.

The Basics of American Government is a collaborative effort among eight current and one former faculty members in the Departments of Political Science and Criminal Justice at University of North Georgia. The purpose of this book is to offer a no-frills, low-cost, yet comprehensive overview of the American political system for students taking introductory courses in American national government. Furthermore, the work combines the best aspects of both a traditional textbook and a reader in that most chapters offer a piece of original scholarship as a case study to bolster or reinforce the material presented in the chapter. In addition, many chapters present a civic engagement-type exercise and discussion questions intended to challenge, engage, and foster student participation in the political system. The authors undertook this project for several reasons, most notably the high costs of textbooks for students and the lack of college-level scholarship found in most American Government texts. This 375-page, peer-reviewed, edited book that combines traditional material with original scholarship will cost students \$27.99, well below market standards. All of the authors are experienced classroom instructors, subject matter experts, and published researchers in the field of American politics.
