The Secret History of Hermes Trismegistus Zed Books

Nach 9/11 hat sich die Welt radikal verändert. In seinem 2018 erschienenen Buch IMPOSSIBLE MISSION 9/11 hat sein Autor, Oliver Janisch, die Frage gestellt: Wie haben sie es gemacht? Im vorliegenden Buch wird die Frage gestellt: Warum haben sie es gemacht? Globalisierung ist der Deckmantel für die feindliche Übernahme durch die Finanzeliten dieser Welt. Sie planen es seit langer Zeit, und ihre Absichten sind unglaublich bössartig. Aber erst der Zerfall des Hauptgegenspielers, des Ostblocks mit seinem Zentrum UdSSR, brachte diese Mächte ihrem Ziel näher: Unterwerfung der Welt unter ihre Herrschaft. Diese Herrschaft hat einen Namen: Neue Weltordnung (NWO). So wird die Welt sein für die, die überleben werden: Was wir bekommen: Freier Transfer von Waren, Kapital und Arbeitskraft Unkontrollierter Kapitalismus Monokultur RFID-Chip implantiert Totale Kontrolle der Menschen Gedankenkontrolle (Mind Control) Kadavergehorsam Impfwang Künstliche Krankheiten Genom Engineering Eugenik Gentechnische Veränderung von Pflanze, Tier und Mensch Retortengeburt

Einstein on Race and Racism Edition.Engdahl

For the faction that controls the Pentagon, the military industry and the oil industry, the Cold War never ended. It went on 'below the radar' creating a global network of bases and conflicts to advance their long-term goal of Full Spectrum Dominance, the total control of the planet: land, sea, air, space, outer space and cyberspace. Their methods included control of propaganda, use of NGOs for regime change, Color Revolutions to advance NATO east, and a vast array of psychological and economic warfare techniques, a Revolution in Military Affairs as they termed it. The events of September 11, 2001 would allow an American President to declare a war on an enemy who was everywhere and nowhere, who justified a Patriot Act that destroyed that very freedom in the name of the new worldwide War on Terror. This book gives a disturbing look at that strategy of Full Spectrum Dominance.

Gods of Money Cornell University Press

While the flames of World War II still raged, Roosevelt, Churchill, and Stalin issued a warning to the Nazi leaders. Those responsible for the torture and murder of millions of innocent and defenseless civilians were promised that "... the three Allied Powers will pursue them to the furthest corners of the earth and deliver them to their judges so that justice may be done." That promise was not kept. Justice was not done. In 1945, twelve of the most notorious Nazis were tried for crimes against humanity and sentenced to death by the International Military Tribunal convened at Nuremberg. (Martin Bormann, his whereabouts unknown, had been tried and convicted in absentia.) Subsequent war-crimes trials ended in the conviction of other offenders. But the majority of the torturers and murderers escaped, found sanctuary, and continued to work effectively toward the concept of eventual world domination. Nazism did not die at Nuremberg. This survival and resurgence was the result of a plan for the creation of a "brotherhood" initiated long before the end of the war by the least visible and most powerful of the Nazi war lords--Martin Bormann. The Brotherhood, backed by virtually unlimited funds, established "safe" houses inside Germany, escape routes to other countries and continents, and an extensive international group of industrial firms as financial reservoirs and as "fronts" for escaped Nazis. This chronicle, based upon independent investigation, including numerous exclusive interviews and the examination of declassified and revealing documents, casts a new light upon Bormann, his strange role in the Third Reich, and his devastating influence, which cuts mercilessly into our present. This is essential reading, as fascinating as it is meaningful.

Plato's Conception of Justice and the Question of Human Dignity BoD - Books on Demand

In this first comprehensive study of Plato's conception of justice, apprehension of human dignity plays a crucial role for understanding an individual in relation to law and state. Plato's philosophy turns out to provide foundations for modern-day human rights protection rather than for totalitarian approaches.

Applied Ethics Univ of California Press

Sex, more than just a part of our experience, troubles our conceptions of existence. Drawing on a fascinating array of sources, ancient and modern, philosophical and literary, Jean-Luc Nancy explores and upholds the form-giving thrust of the drive. Nancy reminds us that we are more comfortable with the drama of prohibitions, ideals, repression, transgression, and destruction, which often hamper thinking about sex and gender, than with the affirmation of an originary trouble at the limits of language that divides being and opens the world. Sexistence develops a new philosophical account of sexuality that resonates with contemporary research on gender and biopolitics. Without attempting to be comprehensive, the book ranges from the ancient world through psychoanalysis to discover the turbulence of the drive at the heart of existence.

Fer de Lance Routledge

Once upon a time, before my sharks were finned, we met at sunset . . . In Tahiti I watched the sharks, to learn what they are like as animals and individuals. Over the years, I was accepted into their community and documented much intelligent behavior during our meetings at sunset. When I got an Internet connection, I found that no one had ever done such a thing, and that most people thought that sharks were vicious. After my findings were presented at an International symposium on cognition, the BBC came to film my work for Shark Week. But by then the sharks were being finned for the shark fin soup racket, and to add insult to injury, my efforts to get their news out of the country were blocked by the media. So I wrote down

their story, so that the world would find out what they were like, the strange and startling things that happened, and the terrible loss when the shark finning industry arrived in those innocent islands . . .

Kant in Imperial Russia Greenwood

Applied Ethics focuses the central concepts of traditional morality - rights, justice, the good, virtue, and the fundamental value of human life - on a number of pressing contemporary problems, including abortion, euthanasia, animals, capital punishment, and war.

Memoirs of a British Agent Philosophy and Cultural Studies Revisited / Historisch-genetische Studien zur Philosophie und Kulturgeschichte

Brings together a complete picture of the past, present, and future of Jewish political participation.

Genocide in Cambodia and Rwanda tredition

Pride, greed, and power have driven men to do the unthinkable-including selling out their nations and unsuspected citizens to the most corrupt and destructive "invisible" global leaders on Earth. But how did this happen on American soil? How did the downfall begin and who were the predators that the "land of the free and home of the brave" fell victim to? And is all hope lost? This book captures details of the last 200 years of American history that mainstream media does not want you to know. It dissects the "legalized" system of the private central banks that has gone unchecked, and delivers gut-wrenching truths about the real domestic and foreign enemies of the United States. With over 1000 footnotes and quotes from former presidents, prime ministers, and state officials, it will equip you with the facts that the elites have covered up for centuries and empower you to stand up for the truth.

Language, Society, and the State Wiley-Blackwell

Nearly fifty years after his death, Albert Einstein remains one of America's foremost cultural icons. A thicket of materials, ranging from scholarly to popular, have been written, compiled, produced, and published about his life and his teachings. Among the ocean of Einsteinia-scientific monographs, biographies, anthologies, bibliographies, calendars, postcards, posters, and Hollywood films-however, there is a peculiar void when it comes to the connection that the brilliant scientist had with the African American community. Nowhere is there any mention of his close relationship with Paul Robeson, despite Einstein's close friendship with him, or W.E.B. Du Bois, despite Einstein's support for him. This unique volume is the first to bring together a wealth of writings by the scientist on the topic of race. Although his activism in this area is less well known than his efforts on behalf of international peace and scientific cooperation, Einstein spoke out vigorously against racism both in the United States and around the world. Fred Jerome and Rodger Taylor suggest that one explanation for this historical amnesia is that Einstein's biographers avoided "controversial" topics, such as his friendships with African Americans and his political activities, including his involvement as co-chair of an antilynching campaign, fearing that mention of these details may tarnish the feel-good impression his image lends topics of science, history, and America. Combining the scientist's letters, speeches, and articles with engaging narrative and historical discussions that place his public statements in the context of his life and times, this important collection not only brings attention to Einstein's antiracist public activities, but also provides insight into the complexities of antiracist culture in America. The volume also features a selection of candid interviews with African Americans who knew Einstein as children. For a man whose words and reflections have influenced so many, it is long overdue that Einstein's thoughts on this vital topic are made easily accessible to the general public.

The Panama Papers Melville House

In this latest installment of his remarkable series of books of alternative science and history, Joseph P. Farrell outlines the consistent pattern and strategy of bankers in ancient and modern times, and their desire to suppress the public development of alternative physics and energy technologies, usurp the money creating and issuing power of the state, and substitute a facsimile of money-as-debt. Here, Farrell peels back the layers of deception to reveal the possible deep physics that the "banksters" have used to aid them in their financial policies. Feral House also published Farrell's Philosopher's Stone: Alchemy and the Secret Research for Exotic Matter.

Why is Your Country at War and what Happens to You After the War, and Related Subjects Feral House

Topics: The nature of conspiracy. Its pervasive role in life and history. Secret societies. Philosophy and fallacies of conspiratorial thinking. A science of conspirology. World conspiracies. Skull & Bones Club. 9/11 and the rise of Osama bin Laden-Al Qaeda conspiracy theory, unsupported by evidence. Countervailing theories. WTC, Pentagon. The great game. Drugs, finance, and the CIA. Oil, war and peace. Puppets of empire in the third world and fourth estate.--From verso of title page.

Moving the Mountain Frontline Books

Der Autor, der immerhin seit 55 Jahren in Deutschland lebt, war noch nie so beunruhigt über den Zustand der Demokratie wie jetzt im Jahr 2020. Unser Bundespräsident fordert dazu auf, die Demokratie tagtäglich zu verteidigen. Welche Demokratie meint der Bundespräsident? In Deutschland haben wir eine Parteiendemokratie, die mit Sicherheit bei Gründung der Bundesrepublik ihre Berechtigung hatte. Die politische Elite inklusive CDU/CSU und SPD hat es versäumt, nach der Wiedervereinigung eine neue Verfassung auszuarbeiten und vom Volk annehmen zu lassen. So wie es im Paragraf 146 unseres Grundgesetzes vorgesehen ist. Die Parteien haben sich jedoch aus Angst vor dem Verlust ihrer Macht dieser Aufgabe verweigert. Die Möglichkeit eines Wählers, in einer Parteiendemokratie die Demokratie zu verteidigen, ist mehr als dürrtig. Denn er hat gar kein Mitspracherecht, geschweige denn eine reale Wahl zwischen Personen der Legislative und der Exekutive. Die Parteien bestimmen über die Listen die

gesamte Legislative, sie bestimmen über die Exekutive und sogar die Justiz. Selbst die angeblich neutralen öffentlichen Medien werden von den Parteien beherrscht. Insoweit ist der Aufruf des Bundespräsidenten - so notwendig er ist - eine Sonntagsrede.

The Killing of Uncle Sam Rowman & Littlefield

This volume deals with aspects of genocide in Rwanda and Cambodia that have been largely unexplored to date, including the impact of regional politics and the role played by social institutions in perpetrating genocide. Although the "story" of the Cambodian genocide of 1975-1979 and that of the Rwandan genocide of 1994 have been written about in detail, most have focused on how the genocides took place, what the ideas and motives were that led extremist factions to attempt to kill whole sections of their country's population, and who their victims were. This volume builds on our understanding of genocide in Cambodia and Rwanda by bringing new issues, sources, and approaches into focus. The chapters in this book are grouped so that a single theme is explored in both the Cambodian and Rwandan contexts; their ordering is designed to facilitate comparative analysis. The first three chapters emphasize the importance of political discourse in the genocidal process. Chapters 4 and 5 examine social institutions and explore their role in the genocidal process. Chapters 6 and 7 describe the military trajectories of the genocidal regimes in Cambodia and Rwanda after their overthrow, showing that genocide and genocidal intents as a political program do not cease the moment the massacres subside. The final chapters deal with private and public efforts to memorialize the genocides in the months and years following the killing. Drawing on ten years of genocide studies at Yale, this excellent anthology assembles high-quality new research from a variety of continents, disciplines, and languages. It will be an important addition to ongoing research on genocide.

Target Mine.Books

Using Taiwan as a case study, this book constructs an innovative theory of a political sociology of language. Through documentary and ethnographic data and a comparative-historical method the book illustrates how language mediates interactions between society and the state and becomes politicized as a result; how language, politics and power are intertwined processes; and how these processes are not isolated in institutions but socially embedded.

Why Philosophy? Library of Alexandria

Do we really need philosophy? The present collection of jargon-free essays aims at answering the question of why philosophy matters. Each essay considers the central question (Why Philosophy?) from different angles: the unavoidability of doing philosophy, the practical consequences of philosophy, philosophy as a therapy for the whole person, the benefits of philosophy for improving public policy, etc.

Beyond Chutzpah University of Chicago Press

"Control the oil and you control entire nations," said Kissinger. Oil is an instrument of world domination in the grip of the Anglo-American empire. This

is a story about power, power over entire nations and continents. Century of War is a gripping account of the murky world of the international oil industry and its role in world politics. Scandals about oil are familiar to most of us. From George W. Bush's election victory to the wars in Iraq and Afghanistan, US politics and oil enjoy a controversially close relationship. William Engdahl takes the reader through a history of the oil industry's grip on the world economy. His revelations are startling. A thin red line runs through modern world history, covered in oil and blood. This book is not for the faint of heart, but for those who can see beyond the daily media manipulation of reality that is called news.

Jews in American Politics John Kountouris

"The Arabs is an interpretative essay based upon a great deal of reading and research, and like other writings of the author, brilliant and insightful.

Rodinson's response to the question Who are the Arabs? traces the career of the Arab people from their first appearance about twenty-nine centuries ago up to the present day. The purpose of the book is to make the reader aware of an undeniable Arab being, of its historic performance and its contemporary situation, on the basis of a scientifically careful but sympathetic study and statement."--Back cover.

Geheimakte NGOs Springer

This volume corrects the historical record of anti-Semitism, revealing recent scholarly consensus on the hottest issues of the Israel-Palestine conflict, especially human rights.

The Lost Hegemon Walter de Gruyter GmbH & Co KG

Deutschland schläft seit 14 Jahren. Dieser Schlaf wurde mehr oder weniger von der politischen Elite, namentlich Angela Merkel und den durch ihr Verhalten geprägten sozialen, ökonomischen und politischen Eliten zelebriert. Sie wurde als alternativlos gepriesen und es wurde ein Hype um sie gemacht. Sie hat dem Volk Valium verabreicht und die Probleme der Gesellschaft bewusst unter den Teppich gekehrt. Dies betrifft nicht nur die Person von Angela Merkel, sondern vor allem die gesamte Berliner Republik, die sich in eine Arche eingekapselt hat. Die Verfallssymptome Deutschlands lassen sich aus dem Ausland mehr denn je erkennen, und zwar in allen Bereichen. Die Zunahme von Gewalt, die Verfehlungen der Gesellschaft, die Schwächung von staatlichen Aufgaben, die Schwächung der inneren Sicherheit, eine falsch durchgeführte Globalisierung, die Angst um den Arbeitsplatz, die Vernachlässigung der Erziehung der Kinder, die Individualisierung der Gesellschaft führen dazu, dass diese Gesellschaft immer mehr zerfällt. All diese Verfallssymptome haben in den letzten 14 Jahren in erheblichem Maße zugenommen. In dem vorliegenden Buch werden alle Bereiche beschrieben, die diese Symptome aufweisen. Der Autor beabsichtigt damit nicht, Deutschland in ein schlechtes Licht zu stellen. Im Gegenteil: Er ist besorgt über den Zustand dieses Landes. Der Autor ist kein Besserwisser, der einfache Lösungen bieten kann. Er besinnt sich lediglich auf Grundsätze der Ethik und Moral zurück und versucht einen langwierigen und schmerzhaften Prozess zu beschreiben, mit dem die Verfallsprozesse gebremst und gestoppt werden. Auf die Herausforderungen durch technische Revolutionen und die unsichere weltweite geopolitische Lage ist die deutsche Gesellschaft nicht vorbereitet.
