The Erotics of War in German Romanticism
Cornell University Press
This collection brings methods and questions from humanities, law and social sciences disciplines to examine different instances of lawmaking. Contributors explore the problematic of past law in present historical analysis across indigenous Australia and New Zealand, from post-Franco Spain to current international law and maritime regulation, from settler colonial humanitarian debates to efforts to end cruelty to children and animals. They highlight problems

both national and international in their implication. From different disciplines and theoretical positions, they illustrate the diverse and complex study of law's history. *The Great Art of Government* SAGE
The Obama administration's overreaching and pervasive secularist policies represent the greatest government-directed assault on religious freedom in American history. So argue conservative movement leader Phyllis Schlafly and journalist George Neumayr in their new book, *No Higher Power*. In *No Higher Power*, Schlafly and Neumayr show how Obama is waging war on our religious liberties and

actively working to create one nation under him rather than one nation under God. "Obama views traditional religion as a temporary opiate for the poor, confused, and jobless—a drug that will dissipate as the federal government assumes more God-like powers, and his new secularist beliefs and policies gain adherents," write Schlafly and Neumayr. From cutting funding for religious schools to Obama's deliberate omission of God and religion in public speeches to his assault on the Catholic church, *No Higher Power* is a shocking and comprehensive look at how Obama is violating one of our most fundamental rights—and

remaking our country into a nation our Founding Fathers would hardly recognize.

PARENTING NEVER ENDS.

From the founders of the #1 site for parents of teens and young adults comes an essential guide for building strong relationships with your teens and preparing them to successfully launch into adulthood The high school and college years: an extended roller coaster of academics, friends, first loves, first break-ups, driver's ed, jobs, and everything in between. Kids are constantly changing and how we parent them must change, too. But how do we stay close as a family as our lives move apart? Enter the co-founders of *Grown and Flown*, Lisa Heffernan and Mary Dell Harrington. In the midst of guiding their own kids through this transition,

they launched what has become the largest website and online community for parents of fifteen to twenty-five year olds. Now they've compiled new takeaways and fresh insights from all that they've learned into this handy, must-have guide. *Grown and Flown* is a one-stop resource for parenting teenagers, leading up to—and through—high school and those first years of independence. It covers everything from the monumental (how to let your kids go) to the mundane (how to shop for a dorm room). Organized by topic—such as academics, anxiety and mental health, college life—it features a combination of stories, advice from professionals, and practical sidebars. Consider this your parenting lifeline: an easy-to-use manual that offers support and perspective. *Grown and Flown* is required reading for anyone looking to raise an adult with whom you have an enduring, profound connection.

The Second Treatise on Civil Government

In *The Erotics of War* in German Romanticism, Patricia Anne Simpson explores the ways early

nineteenth-century German philosophers, poets, and artists represent war and erotic desire. The author argues that gender is connected to a larger debate about the construction of the self in relation to a community at a time that this definition is under revision. She analyzes the culture of war as it shapes the bonds of fraternal, familial, and eventually national identity. Simpson defines the erotics of war as discursive attempts to assert the priority of ethical identity and citizenship over individualized desire. The seemingly ancillary problem of female desire emerges not as a marginal issue, but as the focal point of a debate about identity.

Social science researchers in the global South, and in South Africa particularly, utilise research methods in innovative ways in order to respond to contexts characterised by

diversity, racial and political tensions, socioeconomic disparities and gender inequalities. These methods often remain undocumented – a gap that this book starts to address. Written by experts from various methodological fields, *Transforming Research Methods in the Social Sciences* is a comprehensive collation of original essays and cutting-edge research that demonstrates the variety of novel techniques and research methods available to researchers responding to these context-bound issues. It is particularly relevant for study and research in the fields of applied psychology, sociology, ethnography, biography and anthropology. In addition to their unique combination of conceptual and application issues, the chapters also include discussions on ethical considerations relevant to the method in similar global South contexts. *Transforming Research Methods in the Social Sciences* has much to offer to researchers, professionals and others involved in social science research both locally and internationally.

Updated and reorganized, *Conducting and Reading Research in Kinesiology, Sixth Edition* teaches students how to conduct their own research and how to read--with understanding--the research that others in the field have done. This text is comprehensive yet practical and understandable, incorporating many examples of the application of various research methods and techniques in an attempt to increase students' grasp of the research process. Written for those students with little research background, and those who may not write a master's thesis, the text helps readers develop an appreciation for research and an understanding of how different types of research are conducted so they will become good consumers and readers of the research of others.

Conducting and Reading Research in Kinesiology, Sixth Edition will also serve the need of students beginning the introduction to research

course knowing they will write a master's thesis or complete a master's project, as it highlights the numerous

Explores the meanings of photographic 19th century photographic discourse, both visual and verbal, as it related to the status and image of women and children. Of particular importance to the author is how the work of women photographers addressed issues of early feminism. In the course of the book she attempts to use the material to help form the basis of a new critical theory of photography which can take a place next to the more mature theory of film. of Charles Lamb, a master of the English essay, and his sister Mary Anne published in this definitive, scrupulously edited work. The letters, many of them written to illustrious figures of the Romantic period, are generally agreed to rank among the finest in the English language.

Transcribing where possible from the originals or facsimiles, Professor Marrs corrects textual errors found in previous editions, and he pays particular attention to establishing precise dates for the correspondence. He includes letters that were omitted from the last collection (published in 1935 and long out of print), and he has uncovered more than eighty letters never published before. The Letters of Charles and Mary Anne Lamb totals five or six volumes, and presents nearly 1200 letters written by Charles and Mary, singly or together. The correspondence is fully annotated, the volumes are illustrated, and the holographic idiosyncrasies of the originals are rendered typographically wherever possible. Rich in revelations about the extraordinary lives of the Lambs, these beautifully

written letters are an inexhaustible store of information about the Romantic era and its major figures-Wordsworth, Keats, and Coleridge. The publication of unexpurgated and authoritative texts is an important literary event. *News Letter* Simon and Schuster

As one of the early Enlightenment philosophers in England, John Locke sought to bring reason and critical intelligence to the discussion of the origins of civil society. Endeavoring to reconstruct the nature and purpose of government, a social contract theory is proposed. The Second Treatise sets forth a detailed discussion of how civil society came to be and the nature of its inception. Locke's discussion of tacit consent, separation of powers, and the right of citizens to revolt against repressive governments, has made The Second Treatise one of the most influential essays in the history of political philosophy.

Power Over Power Manchester University Press

In 1954, a pastor named Jim Jones opened a church in Indianapolis called Peoples Temple Full Gospel Church. He was a charismatic preacher with idealistic beliefs, and he quickly filled his pews with an audience eager to hear his sermons on social justice. As Jones's

behavior became erratic and his message more ominous, his followers leaned on each other to recapture the sense of equality that had drawn them to his church. But even as the congregation thrived, Jones made it increasingly difficult for members to leave. By the time Jones moved his congregation to a remote jungle in Guyana and the US government began to investigate allegations of abuse and false imprisonment in Jonestown, it was too late. *A Thousand Lives* is the story of Jonestown as it has never been told. New York Times bestselling author Julia Scheeres drew from tens of thousands of recently declassified FBI documents and audiotapes, as well as rare videos and interviews, to piece together an unprecedented and compelling history of the doomed camp, focusing on the people who lived there. The people who built Jonestown wanted to forge a better life for themselves and their children. In South America, however, they found themselves trapped in Jonestown and cut off from the outside world as their leader goaded them

toward committing "revolutionary suicide" and deprived them of food, sleep, and hope. Vividly written and impossible to forget, *A Thousand Lives* is a story of blind loyalty and daring escapes, of corrupted ideals and senseless, haunting loss. [A Dictionary of Christian Antiquities](#) Fairleigh Dickinson Univ Press Children develop and learn best when their environment is tailored to their individual needs, supported through careful observation, informed assessment and dynamic planning - a cycle which is the bedrock of good early years practice. Although the EYFS recommends that observation, assessment and planning should be linked in a constant, cyclical process, in practice this can be a significant challenge. This book presents an integrated framework which puts the cycle into practical terms, bringing it all together to ensure a seamless process and to support you in this vital part of your work. The focus is on the critical links within the cycle and combines theory with proven good practice, including: Making and recording observations effectively and efficiently

How observations should inform next steps, assessment and planning Bringing all the information together into a cyclical process Exploring potential challenges Using reflective practice to refine and improve your techniques Rich in practical examples and case studies that illustrate how the cyclical framework works in practice, this is an excellent resource for early years practitioners and students looking to improve their observation, assessment and planning techniques. "Observation, Assessment and Planning in the Early Years - Bringing it All Together, actually does bring it all together. Kathy Brodie has linked theorists from the past to the present, skilfully connecting to the revised EYFS. Early Years students and practitioners will have the opportunity to reflect on the innovative ideas that she has suggested. Kathy has also included detailed information on observing SEN children. This modern update to observation, assessment and planning is a must read for the early years sector." Laura Henry, Managing Director, Childcare Consultancy "This is a very well

researched and practical guide to observation, planning and assessment in the Early Years. Kathy has collected together both historical and current thinking and ideas around the subject and then presented them in a way that is easy for the reader to access, understand and, more importantly, apply. The structure and format of the book helps the reader to check their understanding of the key learning points and then supports them in working through any challenges that they may have along with answers to key questions. *Observation, Planning and Assessment in the Early Years* is an essential read for all Early Years Practitioners from those with experience to those just starting out." Alistair Bryce-Clegg, Early Years Consultant "This is a wonderful and timely resource to help practitioners make and use well informed judgements of young children's learning and achievement. The four threads of observation, assessment, next steps and planning are skilfully woven together. Plentiful exemplifications and case studies vividly illustrate theoretical points and give young children a central place in the book."

 Doing Children's Geographies provides a useful resource for all those embarking on research with young people. Drawing on reflections from original cutting-edge research undertaken across three continents, the book focuses on the challenges researchers face when working with children, youth and their families. The book is divided into three sections. The first section provides alternatives to some of the difficulties researchers face and highlights methodological innovations as geographers uncover new and exciting ways of working. The second part specifically addresses the issues surrounding children and youth's participation providing critiques of current practice and offering alternatives for increasing young people's involvement in research design. Finally, the book broadens to a consideration of wider areas of concern for those working with children and

youth. This section discusses the nature of childhood in relation to research, the place of emotions in research with young people and the process of undertaking applied research. This book was previously published as a special issue of *Children's Geographies*

 A major dimension of modern Jewish life has been the revival of conscious political activity on the part of the Jewish people, whether through reestablishment of the State of Israel, new forms of diaspora community organization, or the common Jewish fight against anti-Semitism. Precisely because contemporary Jewry has moved increasingly toward self-definition in political terms, a significant part of the search for roots and meaning must take place within the political realm.
