Modern Construction Envelopes deals with the facade and roof as an integral part of the building, allowing a holistic approach to the design of the building envelope and providing greater design freedom. The book is aimed at readers who want to extend their knowledge of wall and roof construction beyond the information given in the Modern Construction Handbook, using state-of-the-art construction principles of modern facade and roof systems. The third edition of this classic has been fully brought up to date; it contains new examples in all chapters and presents

the projects in revised, new 3D drawings and in 27 AR applications that can be accessed free of charge via smartphone and tablet.

 Nondestructive testing has become the leading product testing standard, and
 Handbook of Non-Destructive Evaluations by Chuck Hellier is the unparalleled one-stop, A-to-Z guide to this subject. Covering the background, benefits, limitations, and applications of each, this decision-simplifying resource looks at both the major and emerging nondestructive evaluation methods, including: visual testing...penetrant testing...magnetic particle testing...radiographic testing...Ultrasonic testing... eddy current testing...thermal infrared testing...and acoustic emission testing. In clear, understandable terms,

the Handbook shows you how to interpret results and formulate the right decisions based on them, making it a welcome resource for engineers, metallurgists, quality control specialists, and anyone else involved in product design, manufacture, or maintenance. The Handbook is also the ideal prep tool if you're seeking certification in AWS/CSWIP, ASNT Level III, ACCP, and IRRSP programs. If you're looking for a one-stop answer to all your nondestructive testing questions, your search ends here.
