It is intended both for students

who have a degree in computer science (but are missing some of this basic theory) and also for students with a good theoretical background (e.g. a degree in mathematics) but no exposure to theoretical computer science. Foundations of Computer Science The artifacts of programming are computer programs or software. The engineering disciplines we try to apply in the software development process to produce quality software is called software engineering. So computer science is more about problem solving than computers. Computing science is probably a more appropriate name for this discipline.
