À bientôt 50 ans,
Rodrigo Beenkens est
et reste au fil des
années l'incontestable
journaliste sportif
francophone préféré
des téléspectateurs.
S'il jongle entre

football et cyclisme, le Bruxellois a pris la succession de Théo Mathy en 1990 et commente depuis avec brio le Tour de France et la plupart des classiques cyclistes pour la RTBF. Après 21 Tours de France à son compteur, des milliers d'heures d'antenne en direct, des dizaines de milliers de kilomètres parcourus, le moment est venu pour le commentateur de jeter un œil dans le rétroviseur et de se remémorer les grands moments, les belles rencontres et les anecdotes qui ont jalonné ses Grands Boucles. De Franck Baudoncq, son collègue de la RTBF avec qui il a partagé ses premiers Tours, à Albin Delsault, son chauffeur attitré et homme de confiance,

en passant par les illustres consultants avec qui il a partagé le micro, la voiture et la table, Beenkens nous fait visiter les six coins de l'Hexagone.

Revue Des Français. Année 5 No. 10-année 10. No. 9. Oct. 1910-nov./dč. 1915 Lulu.com
 Hubert Reeves, astrophysicien, a enseigné la cosmologie à Montréal et à Paris. Il a publié au Seuil de nombreux ouvrages dont Patience dans l'azur, Poussières d'étoiles, Je n'aurai pas le temps, L'Univers expliqué à mes petits-enfants, J'ai vu une fleur sauvage qui ont rencontré la faveur d'un très large public. Il est président d'honneur de l'association Humanité et Biodiversité et de la nouvelle Agence française pour la

biodiversité. Près de l'étang de Malicorne, face au grand saule pleureur qui se reflète dans l'eau calme, se trouve un banc de bois : "Le banc du temps qui passe". Je m'y assois pour tenter de sentir ce mince filet du temps qui nous porte tout au long de notre existence. Après un moment de silence, me viennent à l'esprit des pensées qui prolongent ma constante interrogation sur le monde. Méditer sur ce monde qui m'émerveille, me fascine et m'inquiète à la fois, c'est aussi chercher à me rassurer. Ce livre est destiné à tous ceux qui se posent des questions sur le grand mystère de la réalité dans laquelle nous sommes projetés pour un temps. Je veux

partager ici mes réflexions sur des thèmes qui me tiennent à coeur. Je cherche à exprimer ce qui se dégage de mes expériences de vie et de mon métier d'astrophysicien, pour livrer à ceux qui me font l'honneur de s'y intéresser mes convictions intimes, celles qui jouent pour chacun un rôle majeur quand nous avons à juger d'une situation ou à prendre une décision concrète. Mais rien de ces pages n'est définitif. Tout y est provisoire et à remettre à jour - indéfiniment. H. R. Origins, Time and Complexity Lulu.com Proceedings of the EC Contractors' Meeting held in Brussels, June 1-3, 1983

Jules Verne, a 19th-century French author, is famed for such revolutionary science-fiction novels as "Around the World in Eighty Days" and "Twenty Thousand Leagues Under the Sea". He has sometimes been called the "Father of Science Fiction", a title that has also been given to H. G. Wells and Hugo Gernsback. In all, Verne authored more than 60 books (most notably the 54 novels comprising the "Voyages Extraordinaires"), as well as dozens of plays, short stories and librettos. He conjured hundreds of memorable characters and imagined countless innovations

years before their time, including the submarine, space travel, terrestrial flight and deep-sea exploration. Verne is generally considered a major literary author in France and most of Europe, where he has had a wide influence on the literary avant-garde and on surrealism. Verne has been the second most-translated author in the world since 1979, ranking between Agatha Christie and William Shakespeare. Some of the works appear only in their original French texts, due to copyright restrictions.  This book presents the
 proceedings of the
 20th Congress of the
 International
 Ergonomics Association
 (IEA 2018), held on
 August 26-30, 2018, in
 Florence, Italy. By

highlighting the latest theories and models, as well as cutting-edge technologies and applications, and by combining findings from a range of disciplines including engineering, design, robotics, healthcare, management, computer science, human biology and behavioral science, it provides researchers and practitioners alike with a comprehensive, timely guide on human factors and ergonomics. It also offers an excellent source of innovative ideas to stimulate future discussions and developments aimed at applying knowledge and techniques to optimize system performance, while at the same time promoting the health, safety and wellbeing of

individuals. The proceedings include papers from researchers and practitioners, scientists and physicians, institutional leaders, managers and policy makers that contribute to constructing the Human Factors and Ergonomics approach across a variety of methodologies, domains and productive sectors. This volume includes papers addressing the following topics: Ergonomics in Design, Activity Theories for Work Analysis and Design, and Affective Design. Ordinances made and passed Springer
