Through this book you will get to know them better, explore their physiology, their defence and reproduction mechanisms and their most noteworthy features, and uncover

the secrets behind the complicated patterns and amazing colours that characterize their appearance. We will also focus on the dangers that these wonderful insects face today due to pollution and human intervention that is putting at serious risk the life of a species that we need to protect at any cost, for example by following the instructions at the end of the book that explain how to set out your garden or balcony in order to attract - and help - these most heavenly insects.
