The Unofficial Guide to Walt Disney World with Kids Disney Electronic Content
At the Mountains of Madness is a novella

by horror writer H. P. Lovecraft. The story has inadvertently popularized the concept of ancient astronauts, as well as Antarctica's place in the "ancient astronaut mythology". The story is told in first-person perspective by the geologist William Dyer, a professor at Miskatonic University. He writes to disclose hitherto unknown and closely kept secrets in the hope that he can deter a planned and much publicized scientific expedition to Antarctica. On a previous expedition there, scholars from Miskatonic University led by Dyer discovered fantastic and horrific ruins and a dangerous secret beyond a range of mountains higher than the Himalayas. A smaller advance group, led by Professor

Lake, discovered and crossed the mountains and found the remains of fourteen ancient life forms, completely unknown to science and unidentifiable as either plants or animals. Six of the specimens are badly damaged and the others uncannily pristine. Their highly evolved features are problematic: their stratum location puts them at a point on the geologic time scale much too early for such features to have naturally evolved. When the main expedition loses contact with Lake's party, Dyer and the rest of his colleagues travel to their last known location to investigate. Lake's camp is devastated, and both the men and the dogs slaughtered, while a man named

Gedney and another dog are unaccounted for. Near the camp they find six star-shaped snow mounds, and one specimen buried under each. They discover that the better preserved life forms have vanished, and that some form of dissection experiment has been done on an unnamed man and a dog. Dyer elects to close off the area from which they took their samples. Dyer and a graduate student named Danforth fly an airplane over the mountains, which they soon realize are the outer walls of a huge, abandoned stone city of cubes and cones, utterly alien compared with any human architecture. Because of their resemblance to creatures of myth mentioned in the Necronomicon, the builders of this lost civilization are dubbed the "Elder Things". By exploring these fantastic structures, the men are able to learn the history of the Elder Things through interpreting their magnificent hieroglyphic murals: The Elder Things first came to Earth shortly after the Moon was pulled loose from the planet and were the creators of life. They built their cities with the help of "Shoggoths", biological entities created to perform any task, assume any form, and reflect any

thought. As more buildings are explored, a fantastic vista opens of the history of races beyond the scope of man's understanding, including the Elder Things' conflicts with the Star-spawn of Cthulhu and the Mi-go, who arrived on Earth some time after the Elder Things themselves.
