Inside Out Advanced MacMillan

The papers published in this volume were originally presented at the Sixth International Conference on Teaching and Language Corpora (4-7 July 2004 Granada, Spain) and reflect the latest developments that have taken place in the field of the teaching applications of text corpora, with a special emphasis on their use in the foreign language classroom. The book is divided into three main sections. The first section sets the scene for what this collection of essays aims to be. It deals with the issue of what corpus linguistics can do not only for the understanding of the nature of language itself but also for so fundamental and miraculous a matter such as language learning and language acquisition. The second section tackles the issues of corpus design and corpus exploitation and provides the reader with a great variety of evidence in favour of corpora exploitation for the building of a successful teaching environment. The final section deals with practical applications of corpora in the foreign language classroom. Although each of the papers here reports particular experiences in very different teaching and learning contexts, as a whole they show that corpora can be used on the spot in a language teaching context by teachers and learners

without extensive training in computational tools, and studies of linguistics features can be tailored to specific pedagogic context and learning requirements. The book represents a solid contribution to linguistic studies and language teaching and it is a good example of the diversity of the scientific lines in which corpus linguistics is involved at the present moment.

The articles in this edited volume represent a broad coverage of areas. They discuss the role and effectiveness of corpora and corpus-linguistic techniques for language teaching but also deal with broader issues such as the relationship between corpora and second language teaching and how the different perspectives of foreign language teachers and applied linguists can be reconciled. A number of concrete examples are given of how authentic

corpus material can be used for different learning activities in the classroom. It is also shown how specific learner problems for example in the area of phraseology can be studied on the basis of learner corpora and textbook corpora. On the basis of learner corpora of speech and writing it is further shown that even advanced learners of English are uncertain about stylistic and text type differences.

New Inside Out Orb Books

An early novel from Science Fiction legend Kim Stanley Robinson, now available for the first time in decades: Icehenge. On the North Pole of Pluto there stands an enigma: a huge circle of standing blocks of ice, built on the pattern of Earth's Stonehenge--but ten times the size, standing alone at the farthest reaches of the Solar System. What is it? Who came there to build it? The secret lies, perhaps, in the chaotic decades of the Martian Revolution, in the lost memories of those who have lived for centuries. This book addresses the key role of phraseology in second language acquisition and instruction. It is divided into three main sections: Extracting and Describing Phraseological Units investigates the role played by native and learner corpora in the extraction and description of multiword units, two initial and crucial steps in informing language pedagogy; Learning Phraseological Units deals with the learning aspect, an oft-neglected yet essential dimension of phraseology in second/foreign language pedagogy, this section also addresses issues in new literacies; and Recording and Exploiting Phraseological Units focuses on pedagogical tools, notably monolingual and bilingual dictionaries and textbooks. This stimulating collection presents cutting edge research in the field and identifies major avenues for future theoretical and applied work. It is of particular relevance to researchers and teachers interested in the patterned nature of language.
