ThePediatric First Aid, CPR & AEDmanual is 153 pages and full-color. It covers the material included in a 6.5 to 8.5 hour course. This book is for anyone who takes care of children, including parents, daycare and other childcare workers, teachers and others. The focus is on preventing childhood injury where possible, how to recognize and act in a pediatric emergency and sustain life until professional help can arrive. Along with basic first aid components such as bleeding control and shock, the book covers child abuse and common childhood illnesses. Comprehensive information about preventing infection and illness, preventing injuries, and making places safe for children have been added. This text has been updated to include the new 2005 guideline changes.

"In 1994, as his country descended into madness, Paul Rusesabagina, the hotel manager of a Belgian-owned luxury hotel in Kigali, the capital of Rwanda, used cunning and courage to save 1,268 people from certain death while the rest of the world closed its eyes. His real-life story inspired writer Terry George to make the film, Hotel Rwanda." "Now, in the only official companion book, comes the filmmaking story, with first-person pieces by Terry George and co-screenwriter Keir Pearson about their three-year struggle to gain support and financing, as well as a brief history of Rwanda with details on the actual events portrayed in the movie."--BOOK JACKET.

This manual is designed to orient helpers to offer psychological first aid (PFA) to people following a serious crisis event. PFA involves humane, supportive and practical assistance for people who are distressed, in ways that respect their dignity, culture and abilities. The instructions and materials in this manual are for a half-day orientation (4 hours excluding breaks) to prepare helpers to support people recently affected by very stressful events. If you have more time available for the orientation, extra activities and slides are included in text boxes to deliver a full day orientation (five and a half hours excluding breaks). Where possible, one should organize full day orientations to allow for deeper learning. It is important to adapt the orientation and materials to the local culture, language and context, and to the likely kinds of crisis situations in which your participants would be helping. This facilitator's manual is to be used together with Psychological First Aid: Guide for Field Workers.

This New American Red Cross CPR/AED for the Professional Rescuer Participant's Manual and course reflect changes based on the 2005 Consensus on Science for CPR and Emergency Cardiovascular Care (ECC) and the Guidelines 2005 for First Aid. Changes to this program and manual include simplifications to many of the CPR skill sequences, which helps improve retention. There have also been changes to help improve the quality of CPR. The integration of CPR skills into the operation of AEDs had changed to help improve survival from sudden cardiac

arrest. Professional rescuers are now trained to use AEDs on adults and children. Information has been updated and added to this program to help professional rescuers administer epinephrine, aspirin and fixed-flow-rate oxygen. The skills learned in this course include adult, child and infant rescue breathing, conscious and unconscious choking, CPR, two-rescuer CPR and adult and child AED. Additional training can be added to this course including bloodborne pathogens training and emergency oxygen administration. While the skills and knowledge that professional rescuers use are increasing, this training will help you meet your most important responsibility as a professional rescuer- the responsibility to save lives.
