This book explores the ways in which statues have been experienced in public in different cultures and the role that has been played by statues in defining publicness itself. The meaning of public statues is examined through discussion of their appearance and their spatial context and of written discourses having to do with how they were experienced. Bringing together experts working on statues in different cultures, the book sheds light on similarities and differences in the role that public statues had in different times and places throughout history. The book will also provide insight into the diverse methods and approaches that scholars working on these different periods use to investigate statues. The book will appeal to historians, art historians and archaeologists of all periods who have an interest in the display of sculpture, the reception of public art or the significance of public monuments.

In 2006 it will be 75 years since excavations by the American School of Classical Studies at Athens started in the ancient Agora. Almost every year since 1931 new areas of the ancient civic center have been cleared and exciting discoveries made, and this book presents the latest, detailed, account of the monuments and artifacts that can be seen on a visit to the site. After a short introduction to the history of the Agora, each monument is described in turn. Famous buildings like the Tholos or Stoa of Attalos are discussed in detail, but also lesser-known areas, passed over by other books, are revealed. Plans and color illustrations help locate the reader, while a large fold-out map at the back of the book distinguishes the different chronological phases of the Agora. For the first time this map also shows discoveries made in the last few years at the northern edge of the

site. A final section presents a guide to the museum, substantially reorganized in preparation for the 2004 Olympic Games. Written by the director of the Agora excavations for over a decade, this book presents the most detailed and up-to-date coverage available of the birthplace of democracy. It will be invaluable for any visitor to or student of the site.

Named after its donor, the King of Pergamon, the Stoa of Attalos was originally built around 150 B.C. Between 1953 and 1956 this long, columned, marble building was rebuilt by the American School of Classical Studies to store and display finds from the Agora excavations. Using original materials and techniques, the modern builders learned much about the construction and purpose of the stoa, a ubiquitous classical building type. This heavily illustrated account presents some of their findings.

Written for the general visitor, the Athenian Agora Museum Guide is a companion to the 2010 edition of the Athenian Agora Site Guide and leads the reader through all of the display spaces within the Stoa of Attalos in the Athenian Agora - the terrace, the ground-floor colonnade, and the newly opened upper story. The guide also discusses each case in the museum gallery chronologically, beginning with the prehistoric and continuing with the Geometric, Archaic, Classical, Hellenistic, Roman, and Byzantine periods. Hundreds of artifacts, ranging from common pottery to elite jewelry held in 81 cases, are described and illustrated in color for the very first time. Through focus boxes, readers can learn about marble-working, early burial practices, pottery production, ostracism, home life, and the wells that dotted the ancient site. A timeline, maps, and plans accompany the text. For those who wish to learn more about what they see in the museum, a list of further reading follows each entry.

This volume is one of the most important works on ancient Athens in the last fifty years. The focus is on the early city, from the end of the Bronze Age--ca. 1200 BCE--to the Archaic period, when Athens became the largest city of the Classical period, only to be destroyed by the Persians in 480/479 BCE. From a systematic study of all the excavation reports and surveys in central Athens, the author has synthesized a detailed diachronic overview of the city from the Submycenaean

period through the Archaic. It is a treasure trove of information for archaeologists who work in this period. Of great value as well are the detailed maps included, which present features of ancient settlements and cemeteries, the repositories of the human physical record. Over eighty additional large-scale, interactive maps are available online to complement the book.
