"Here, Joseph Meeker expands upon his consideration of comedy and tragedy, not as dramatic motifs for humor and sadness but rather as forms of adaptive behavior in the natural world that either promote our survival (comedy) or estrange us from other life forms (tragedy)." "In this third major edition of his classic work, Meeker examines the role of literature in shaping such behavior. Drawing upon centuries of western writing from Dante to Shakespeare to E. O. Wilson, he demonstrates the universality of comedy in both human and animal behavior and shows how the comic mode helps us to live in harmony with nature. Meeker then defines the tragic view of life, interweaving that behavior with exploitation of the environment. With imagination and flair, the author also introduces the idea of a play ethic, as opposed to a work ethic, and demonstrates the importance of play as a necessary and desirable component of the comic spirit." "The Comedy of Survival is a book for literary critics, environmentalists, human ecologists, philosophers, and anthropologists. General readers, too, will find much to ponder in the author's clear explication of how all of us might become better stewards of this, our home planet Earth."--BOOK JACKET.Title Summary field provided by Blackwell North America, Inc. This volume provides a new perspective on the emergence of the modern study of antiquity, *Altertumswissenschaft*, in eighteenth-century Germany through an exploration of debates that arose over the work of the art historian Johann Joachim Winckelmann between his death in 1768 and the end of the century. Winckelmann's eloquent articulation of the cultural and aesthetic value of studying the ancient Greeks, his adumbration of a new method for studying ancient artworks, and his provision of a model of cultural-historical development in terms of a succession of period styles, influenced both the public and intra-disciplinary self-image of classics long into the twentieth century. Yet this area of Winckelmann's *Nachleben* has received relatively little attention compared with the proliferation of studies concerning his importance for late eighteenth-century German art and literature, for historians of sexuality, and his traditional status as a 'founder figure' within the academic disciplines of classical archaeology and the history of art. Harloe restores the figure of Winckelmann to classicists' understanding of the history of their own discipline and uses debates between important figures, such as Christian Gottlob Heyne, Friedrich August Wolf, and Johann Gottfried Herder, to cast fresh light upon the emergence of the modern paradigm of classics as *Altertumswissenschaft*: the multi-disciplinary, comprehensive, and historicizing study of the ancient world.

Roger Federer is a legend not only in the world of tennis but also

in the wider sporting arena. With a record-breaking tally of 16 Grand Slam titles to his name, he shows no sign of slowing down and in 2010 added another Australian Open win to his collection, as well as taking the trophy in the end-of-season ATP World Wide Tour Finals in London. This authoritative and affectionate biography traces the rise of Federer, from his first tentative strokes with a tennis racket to how he dealt with being sent away to a training academy where he struggled to communicate in a French-speaking part of Switzerland; and how he handled the sudden death of his first real coach and mentor. It looks at his development as a sportsman and how he has matured into a family man with his marriage to Mirka Vavrinec and the birth of their twin girls. It also examines how Roger bounced back from arguably one of the most challenging periods of his career as, following a serious illness and a dip in form, his run of successive Wimbledon championship wins was ended and he was toppled from the number one spot by his long-time rival Rafael Nadal. In characteristic style, Federer silenced his critics by winning the French Open title for the first time, reclaiming his Wimbledon crown and ending 2009 at the number one position for the fifth time.

Given that the dissemination of enlightened thought in Europe was mostly effected through translations, the present collection of essays focuses on how its cultural adaptation took place in various national contexts. For the first time, the theoretical model of 'cultural transfer' (Espagne/Werner) is applied to the eighteenth century: The intercultural dynamics of the Enlightenment become manifest in the transformation process between the original and target cultures, be it by way of acculturation, creative enhancement, or misunderstanding. Resulting in shifts of meaning, translations offer a key not just to contemporary translation practice but to the discursive network of the European Enlightenment in general. The case studies united here explore both how translations contributed to the transnational standardisation of certain key concepts, values and texts, and how they reflect national specifications of enlightened discourses. Hence, the volume contributes to Enlightenment studies, at least as much as to historical translation studies.

«Non ho nessuna nostalgia del tempo perduto. Non era meglio allora. È meglio adesso. L'Italia in cui siamo cresciuti era più povera, più inquinata, più violenta, più maschilista di quella di oggi. C'erano nubi tossiche come a Seveso, il terrorismo, i sequestri. Era un Paese più semplice, senza tv a colori, computer, videogiochi. Però il futuro non era un problema; era un'opportunità.» Aldo Cazzullo racconta ai ragazzi di oggi la storia della sua generazione e quella dei padri e dei nonni, «che non hanno trovato tutto facile; anzi, hanno superato prove che oggi non riusciamo neanche a immaginare. Hanno combattuto guerre, abbattuto dittature, ricostruito macerie. Hanno fatto di ogni piccola gioia un'assoluta felicità anche per conto dei commilitoni caduti nelle trincee di ghiaccio o nel deserto. Mia bisnonna sposò un uomo che non aveva mai visto: non era la persona giusta con cui lamentarmi per le prime pene d'amore. Mio nonno fece la Grande Guerra e vide i suoi amici morire di tifo: non potevo lamentarmi con lui per il morbillio. L'altro nonno da bambino faceva a piedi 15 chilometri per andare al lavoro perché non aveva i soldi per la corriera: come lamentarmi se non mi compravano il motorino?». I nati negli anni Sessanta non hanno vissuto la guerra e la fame; ma sapevano che c'erano state. Hanno assorbito l'energia di un Paese che andava verso il più anziché verso il meno. Hanno letto il libro Cuore, i romanzi di Salgari, Pinocchio, i classici. Non hanno avuto le opportunità dell'era digitale, scrivevano lettere e non mail o sms, ma proprio

per questo hanno conosciuto il tempo in cui le parole avevano un valore. Basta piangere! rievoca personaggi, canzoni, film, libri e oggetti di un'Italia che si accontentava di poco: Yanez e Orzowei, il mago Silvan e le piste per le biglie, i Giochi senza frontiere e la Febbre del sabato sera, i miti dello sport e della musica, le mode effimere e i cambiamenti profondi. Attraverso il racconto degli ultimi decenni, Aldo Cazzullo ricostruisce l'inizio della crisi e il modo in cui se ne può uscire: i quarantenni, anziché beccarsi come i capponi di Renzo, si uniscano per cambiare il Paese. E i ragazzi smettano di piagnucolare per qualcosa che ancora non conoscono e che dipende soprattutto da loro: il futuro.

Literature provides us with otherwise unavailable insights into the ways emotions are produced, experienced and enacted in human social life. It is particularly valuable because it deepens our comprehension of the mutual relations between emotional response and ethical judgment. These are the central claims of Hogan's study, which carefully examines a range of highly esteemed literary works in the context of current neurobiological, psychological, sociological and other empirical research. In this work, he explains the value of literary study for a cognitive science of emotion and outlines the emotional organization of the human mind. He explores the emotions of romantic love, grief, mirth, guilt, shame, jealousy, attachment, compassion and pity - in each case drawing on one work by Shakespeare and one or more works by writers from different historical periods or different cultural backgrounds, such as the eleventh-century Chinese poet Li Ch'ing-Chao and the contemporary Nigerian playwright Wole Soyinka.

Soltanto oggi, però, trova il coraggio di un editore e la possibilità di incontrare un pubblico di lettori. Non ho ritenuto di aggiornare il testo per cercare di mantenere l'immediatezza emotiva di allora nella trama dei rapporti e nel calore delle parole dette e pochi giorni dal drammatico evento. Pertanto le situazioni fattuali, le posizioni personali e professionali dei testimoni sono ferme a quel periodo." (Nota dell'autore) "

**Winckelmann and the Invention of Antiquity** Giunti Editore  
Since its emergence in the seventeenth century as a distinctive cultural system, children's literature has had a culturally inferior status resulting from its existence in a netherworld between the literary system and the educational system. In addition to its official readership—children—it has to be approved of by adults. Writers for children, explains Zohar Shavit, are constrained to respond to these multiple systems of often mutually contradictory demands. Most writers do not try to bypass these constraints, but accept them as a framework for their work. In the most extreme cases an author may ignore one segment of the readership. If the adult reader is ignored, the writer risks rejection, as is the case of popular literature. If the writer utilizes the child as a pseudo addressee in order to appeal to an adult audience, the result can be what Shavit terms an ambivalent work. Shavit analyzes the conventions and the moral aims that have structured children's literature, from the fairy tales collected and reworked by Charles Perrault and the Brothers Grimm—in particular, "Little Red Riding Hood"—through the complex manipulations of Lewis Carroll in Alice's Adventures in Wonderland, to the subversion of the genre's canonical requirements in the chapbooks of the eighteenth century, and in the formulaic Nancy Drew books of the twentieth century. Throughout her study Shavit, explores not only how society has shaped children's literature, but also how society has been reflected in the literary works it produces for its children.

Originally published in 1963, and today considered a landmark in twentieth century Italian literature, Luigi Meneghello's *Deliver Us* is the memoir, not of an extraordinary childhood, but of the very ordinary one the author shared with most of his generation, when Italy was a rural country under the twin authorities of Church and Fascism. His boyhood begins in 1922, the year of Mussolini's March on Rome, and ends when Meneghello, 21, goes up into the hills to join the partisans. Called a romanzo—a story, although not a novel, as that term usually suggests—the book is a genre all of its own that mixes personal and collective memory, amateur ethnography, and reflections on language. Meneghello's sharp insights and narrative skill come together in an original meditation on how words, people, places, and things shape thought itself. Only loosely chronological, *Deliver Us* proceeds by themes—childhood games, Fascist symbols, religious precepts, and the rites of poverty, of death, of eros, and of love. Meneghello's ironic musings and profoundly honest recollections make an utterly unsentimental human comedy of that was the

whole world to his dawning consciousness.

This groundbreaking 2007 volume gathers an international team of historians to present the practice of translation as part of cultural history. Although translation is central to the transmission of ideas, the history of translation has generally been neglected by historians, who have left it to specialists in literature and language. This book seeks to achieve an understanding of the contribution of translation to the spread of information in early modern Europe. It focuses on non-fiction: the translation of books on religion, history, politics and especially on science, or 'natural philosophy', as it was generally known at this time. The chapters cover a wide range of languages, including Latin, Greek, Russian, Turkish and Chinese. The book will appeal to scholars and students of the early modern and later periods, to historians of science and of religion, as well as to anyone interested in translation studies.
