LARSON BROOKLYN

Differentiation Strategies for Language Arts Routledge

Aware that categorical thinking imposes restrictions on the ways we communicate, the author proposes discourse studies as an alternative to rhetoric and philosophy. He introduces a theoretical framework for focusing on discourse rather than the conceptual schemes which surround it.

Sales, What a Concept!: A Guidebook for Sales Process Performance Improvement Shell Education

Differentiation is an approach to education in which every student's individuality and special needs are taken into account. Practical and accessible, HOW TO SUCCEED IN DIFFERENTIATION reveals the approach taken in the high-achieving Finnish education system, where the national curriculum obligates all teachers to differentiate their teaching from the get-go. The book is divided into four parts. Part I explains the background of Finnish education and differentiation in the Finnish context. Part II investigates the theoretical basis for differentiation and strives to offer new perspectives for the most common challenges of differentiation. In addition, Part II introduces the reader to the imaginary example students, whose problems are attempted to be solved later in the book. In Part III, differentiation is approached through the five-dimensional model of differentiation, which the authors have created and which, in their opinion, covers the most central areas of teaching, in which differentiation should be acknowledged. In Part IV, differentiation is exemplified in language and literature, mathematics and foreign languages.

STPM 2018 MT Term 2 Chapter 08 Differentiation - STPM Mathematics (T) Past Year Q & A John Catt Bowen theory views the family as an emotional unit. The family is a natural system that has evolved, like all living systems. The elegance and unity of the concept of differentiation of self, and of Bowen theory in its entirety, is that they describe the basis of individual functioning in relation to others within the emotional systems of family, occupation, community, and larger society. This volume consists of essays elucidating and applying differentiation of self, the central concept of Bowen family systems theory and therapy. The purpose of the volume is fourfold: • to describe the historical evolution of differentiation of self • to analyze the complex dimension of this concept as the integrating cornerstone of Bowen theory • to present applications of the concept for both the therapist/coach and in clinical practice • to examine the problems and possibilities of researching differentiation of self The largest part of this volume is the presentation of in-depth case studies of clients or therapists in their efforts to differentiate or define self. This provides an understanding of the what and how that go into the differentiation of self. Contributed to by professionals who have studied, applied, and taught Bowen theory in their own lives, practices, educational settings, and training settings, this volume is a must-have for any therapist/coach working within a systems perspective.

Learning to Plan Modern Languages Lessons contains a wealth of guidance and ideas for those learning to teach in secondary schools. Drawing on extensive experience and research in the field, it offers detailed explanation of basic lesson planning methods and the principles that underpin them, illustrated by worked examples of well-planned lessons. The book shows how to progress from planning smaller activities to full lessons to sequences of lessons, and how to ensure progression for your students. Specific aspects of language learning such as grammar and culture are explored, together with ideas for how to make your planning skills more effective in long-term collaborative and reflective practice. Starting from a presentation, practice, production (PPP) model of language teaching, the book aims to: provide structured, practical starting points in lesson planning for beginning teachers of modern languages (ML); deepen knowledge and understanding of ML as a subject and how it is learnt (pedagogical subject knowledge), in order to inform and support planning decisions; develop understanding of lesson planning as part of a planning cycle; enhance understanding of strategies and professional development opportunities to promote the further development of planning abilities. Including reflective/discussion tasks and example lesson plans Learning to Plan Modern Languages Lessons is a must-read book for beginning and more experienced teachers of any modern language.
