Press Technology has always been important to organizations and a crucial aspect of their continued development. Organizations that already relied on the most up-to-date technology and provided forward-thinking leadership had a smoother transition during the COVID-19 pandemic, which created turmoil for other organizations that were lacking in this type of

leadership. Leadership that implements current and future technology is vital to thrive in the post-pandemic world. Further study on this type of management and practice is required to ensure businesses are prepared and knowledgeable. Business Models to Promote Technology, Culture, and Leadership in Post-COVID-19 Organizations delves into how virtual technology

has evolved to create remote offices and remote teaming in areas such as health, education, engineering, and other business solutions. The book also explores culture in a business and how individuals may interface, communicate, and collaborate in past, current, and future business models. Covering key topics such as management, public health, and society, this reference

work is ideal for business owners, managers, human resource professionals, supervisors, scholars, researchers, academicians, practitioners, instructors, and students. *Business Models to Promote Technology, Culture, and Leadership in Post-COVID-19 Organizations* John Wiley & Sons Superior program management begins with superior information and strategy Program

Environmental sustainability creates both tremendous business opportunities and formidable threats to established companies

across virtually all industry sectors. Yet many companies tackle the issue in a superficial or passive way, rather than considering fundamental changes to their existing business models. By ignoring the opportunities of Green Business Model Transformations, companies exclude themselves from a large variety of potential means to create economic

value. In addition to ordinary product and process innovations, they can change “the rules of the game” within an industry towards environmental sustainability. Green Business Model Transformations, however, are challenging ventures: New, green business models with all their uncertainties and inherent complex systemic characteristics are difficult to

design, assess, and implement successfully, particularly in the context of established companies that often entail complex structures and considerable inertia. As a result, there is a great need for guidance in management practice. This publication addresses this need with a general approach to Managing Green Business Model Transformations that is based on a broad

theoretical foundation, illustrated by many real-world examples from various industry sectors. *From Talent Management to Talent Liberation* Taylor & Francis An essential business guide on how to develop an organization's innovation culture and internal entrepreneurs (intrapreneurs) The Intrapreneur's Journey: Empowering Employees to Drive Growth is an essential

guide on effectively creating and implementing a sustainable culture of innovation and entrepreneurship within organizations. The book is based on the insight that established organizations see continuous delivery of innovative products, services and processes when they enable teams of entrepreneurial employees to think and behave like start-ups. Three

qualities make this book unique. First, it explores the theory and practice of intrapreneurship and innovation with a particular, but not exclusive focus on key African contexts. Second, it includes a large, diverse set of instructive examples and case studies of intrapreneurship and innovation in organizations in Africa. And third, it features a useful toolkit:

the Intrapreneurship Empowerment Model, a simple yet complete implementation framework. The book includes key resources of practical, real-world tools and assets used by some of the world's most intrapreneurial and innovative organizations. The Intrapreneur's Journey adds value for both practitioners and scholars of intrapreneurship and innovation in

Africa and other parts of the world.
