MARIELA CARTER

Natural Bridges National Monument (Utah).
Cambridge University Press
Offers amateur astronomers a guide to techniques and available technologies for observing the night sky from an urban location, discussing optimal weather conditions, ways to reduce the effects of light, different types of telescopes, and readily

seen celestial bodies
The Pictorial Turn
Diaphanes
This remarkable history encompasses not only the achievements of the early inventors and astronomers but also the less frequently recounted stories of the instrument makers and of the actual instruments. A model of unsurpassed, comprehensive scholarship, this volume covers many fields, including professional and amateur astronomy. 196 black-and-white illustrations.

Palace of Flies

An inside look at one of the world's most successful real estate companies RE/MAX was founded over 30 years ago in Denver, Colorado, based upon a revolutionary idea for a new system of selling real estate. Since then, RE/MAX has experienced over 380 straight months of explosive growth. In Everybody Wins, authors Phil Harkins and Keith Hollihan reveal how RE/MAX has achieved such phenomenal success

by examining the company's strategy, culture, and leadership. Harkins-- with the full cooperation of RE/MAX -- led a research team that closely studied RE/MAX as well as comparable fast-growing companies. The team observed critical meetings, attended conventions, dug through historical archives, and conducted extensive interviews with more than 50 key RE/MAX leaders. The outcome is an insightful and engaging

account of one of the world's most successful companies. Order your copy today.

The Imperative of Responsibility

Routledge
Provides a complete re-examination of Herschel's entire catalogue; a must-have for amateur astronomers seeking new and exciting observing challenges.

Atlas of the Messier Objects Indiana University Press

Discusses the ethical implications of modern technology and examines

the responsibility of humanity for the fate of the world

Computer Game Worlds

New Vessel Press

"... the book reminds us of an important lesson in the postwar era of big science: that government policy may lead initially to tremendous support for various fields of science and technology."

—Science "... a triumph of historical analysis."

—Choice "This is an excellent record of the beginnings of the NASA planetary astronomy program in the years

1958-70." —American Historical Review "The historical circumstances that led to this country's great leap into space were unique, but it is clear that there are many lessons to be learnt from this enthralling tale and Tatarewicz tells the tale well." —Annals of Science When NASA went looking for expertise on the moon and planets following Sputnik, they found that astronomers had long since turned their telescopes away from our planets and toward the stars. Where were the

scientists who could help the United States explore the solar system? The answer, as this important new study shows, was that NASA had to create them This story of the precipitous rise and decline of planetary astronomy is an important case study of science in an age of state-managed research and development. It demonstrates that the lines between science, technology, politics, and society are anything but fixed and impermeable. *Masterclass* John Day

Company, Incorporated Radio Observatory and Telescope Index -- General Index [Uranometria 2000.0: Deep sky field guide](#) Springer Science & Business Media Praise for Craig Crossen and Gerald Rhemann's, *Sky Vistas Astronomy* "This is a practical and stunningly beautiful guide whose core is a descriptive tour of the best celestial sights: open and globular clusters, nebulae, galaxies, and large areas of sky. The photos in black and white

and color, are magnificent. The text goes beyond ordinary descriptions to tell the reader something about each object's nature." Sky & Telescope "Packed with information that I have encountered nowhere else in amateur-astronomy literature. Sky Vistas also includes 48 full-page color astrophotos by Gerald Rhemann, most of which are magnificent."

Observatories and Telescopes of Modern

Times Cambridge University Press
Hito Steyerl is rightly

considered one of the most exciting artists working today who speculates on the impact of the Internet and digitization on the fabric of our everyday lives. Her films and writings offer an astute, provocative, and often funny analysis of the dizzying speed with which images and data are reconfigured, altered, and dispersed, many times over, accelerating into infinity or crashing into oblivion. Published to accompany the artist's survey exhibitions at the Van Abbemuseum,

Eindhoven, and the Institute of Modern Art, Brisbane, this book gathers a series of essays and close readings of Steyerl's films from the past ten years. Newly commissioned texts by Sven Lütticken, Karen Archey, Ana Teixeira Pinto, and Nick Aikens, alongside writings by Thomas Elsaesser, Pablo Lafuente, David Riff, and Steyerl, are spliced with over one hundred pages of color stills. This publication is a charged slideshow of the artist's extraordinary

investigations into the status, circulation, and materiality of images. *Expressionist Utopias* CUP Archive
 Computer games have become ubiquitous in today's society. Many scholars have speculated on the reasons for their massive success. Yet we haven't considered the most basic questions: Why do computer games exist? What specific circumstances led to the creation of this entirely new type of game? What sorts of knowledge facilitated the requisite

technological and institutional transformations? With *Computer Game Worlds*, Claus Pias sets out to answer these questions. Tracing computer games from their earliest forms to the unstoppable commercial and cultural phenomena they have become today, Pias then provides a careful epistemological reconstruction of the process of playing games, both at computers and by computers themselves. The book makes a valuable theoretical

contribution to the ongoing discussion about computer games. *Hito Steyerl* Springer Science & Business Media
 The 110 star clusters, nebulae and galaxies of Messier's catalog are among the most popular of all the deep sky objects and are beautiful targets for amateur observers of all abilities. This stunning new atlas presents a complete and lively account of all of the Messier objects. Details for each object given include a thoroughly-researched history of its

discovery, historical observations and anecdotes, the latest scientific data detailing its astrophysical findings, and clear observational descriptions from naked eye through to large telescopes. In addition, this atlas has some of the world's finest color astrophotos, inverted and labelled photos pointing to hidden details and neighboring objects, as well as historical sketches alongside new deep sky drawings. Quite simply, this is the most far-reaching and beautiful

reference on the Messier objects there has ever been, and one that no observer should be without!

Spatializing Culture

Penguin

The author shows pictures of a girl as seen from distant distances, both afar and within to view an immense range of perspectives to illuminate a cosmic view of science. Presents a simple framework to illustrate what the world is like.

Sky Vistas Ten Speed Press

Art as research, art-based

research, and research as art have become popular issues since the 1990s. This conceptual understanding aims at combining the methods of arts and sciences, but oftentimes falls short of considering the different forms of knowledge that arts and sciences create. This essay investigates the long tradition of the philosophical struggle with and for the epistemological status of the Aesthetic and its relation to scientific truth. Its aim is to deconstruct and displace the common

terminology that constitutes this struggle. Furthermore, the purpose of this essay is to identify artistic practice as a mode of thought which does not utilize language in its propositional form and therefore cannot be translated into the discursive strategies of science: an aesthetic mode of thought beyond the linguistic turn and the (self-)understanding of philosophical hermeneutics and post-structuralism, a way of thinking which cannot be substituted by any other

system than itself." Brainwaves: A Cultural History of Electroencephalography Routledge Conveys the dreams and disappointments of German artists, architects, and intellectuals from World War I through the social and economic chaos of the Weimar Republic. History of the Royal Astronomical Society, 1820-1920 University of Chicago Press AS A YOUNG WOMAN, Tilly flees home for the hollow underworld of Nevada,

looking for pure souls and finding nothing but bad habits. One day, after Tilly has spent nearly thirty years without a family, drinking herself to the brink of death, her niece Stella—who has been leading her own life of empty promise in New York City—arrives on the doorstep of Tilly's desert trailer. The Gin Closet unravels the strange and powerful intimacy that forms between them. With an uncanny ear for dialogue and a witty, unflinching candor about sex, love, and power,

Leslie Jamison reminds us that no matter how unexpected its turns, the life we're given is all we have: the cruelties that unhinge us, the beauties that clarify us, the addictions that deform us, those fleeting possibilities of grace that fade as quickly as they come. The Gin Closet marks the debut of a stunning new talent in fiction.

The Complete Guide to the Herschel Objects

Courier Corporation
Based on the author's online photography project, this stunning

collection features portraits of 500 women from more than 50 countries, accompanied by revelatory captions that capture their personal stories. Since 2013 photographer Mihaela Noroc has traveled the world with her backpack and camera taking photos of everyday women to showcase the diversity of beauty all around us. The Atlas of Beauty is a collection of her photographs celebrating women from all corners of the world, revealing that beauty is

everywhere, and that it comes in many different sizes and colors. Noroc's colorful and moving portraits feature women in their local communities, ranging from the Amazon rainforest to London city streets, and from markets in India to parks in Harlem, visually juxtaposing the varied physical and social worlds these women inhabit. Packaged as a gift-worthy, hardcover book, The Atlas of Beauty presents a fresh perspective on the global lives of women today.

Stars and Their

Spectra National Geographic Books
Plain-language explanations and a rich set of supporting material help students understand the mathematical concepts and techniques of astronomy.

The Gin Closet Cambridge University Press
This book demonstrates the value of ethnographic theory and methods in understanding space and place, and considers how ethnographically-based spatial analyses can yield insight into prejudices, inequalities and social

exclusion as well as offering people the means for understanding the places where they live, work, shop and socialize. In developing the concept of spatializing culture, Setha Low draws on over twenty years of research to examine social production, social construction, embodied, discursive, emotive and affective, as well as translocal approaches. A global range of fieldwork examples are employed throughout the text to highlight not just the theoretical development

of the idea of spatializing culture, but how it can be used in undertaking ethnographies of space and place. The volume will be valuable for students and scholars from a number of disciplines who are interested in the study of culture through the lens of space and place.

Unmasking Europa John Wiley & Sons
In contrast to the jargon-filled manuals that come with most digital cameras, The Beginner's Photography Guide presents step-by-step

digital slr camera basics, while introducing and demonstrating a wide variety of techniques that will inspire the novice digital photographer. Grouped together by themes-color, composition, natural light, framing, and more-each camera technique is broken down into an easy-to-follow step-by-step sequence, and features annotated photographs and suggestions on getting the best from digital slr cameras and taking eye-catching photos.

The History of the Telescope

Thames Hudson
This absorbing, sensitive novel portrays a famed author in a moment of crisis: an aging Hugo von Hofmannsthal returns to a summer resort outside of Salzburg that he visited as a child. But in the spa town where he once thrilled to the joys of youth, he now feels unproductive and uninspired, adrift in the modern world born after World War One. Over ten days in 1924 in a ramshackle inn that has

been renamed the Grand Hotel, Hofmannsthal fruitlessly attempts to complete a play he's long been wrestling with. The writer is plagued by feelings of loneliness and failure that echo in a buzz of inner monologues, imaginary conversations and nostalgic memories of relationships with glittering cultural figures. Palace of Flies conjures up an individual state of distress and disruption at a time of fundamental societal transformation that speaks eloquently to our own age.
