The peaceful end of apartheid in South Africa was a monumental event

in late twentieth century history. A racist regime built upon a foundation of colonialist exploitation, South Africa had become by that point a tinderbox: suffused with day-to-day violence and political extremism on all sides. Yet two decades later it was a stable democracy with a growing economy. How did such a deeply divided, conflicted society manage this remarkable transition? In *When Political Transitions Work*, Fanie du Toit, who has been a participant and close observer in post-

conflict developments throughout Africa for decades, offers a new theory for why South Africa's reconciliation worked and why its lessons remain relevant for other nations emerging from civil conflicts. He uses reconciliation as a framework for political transition and seeks to answer three key questions: how do the reconciliation processes begin; how can political transitions result in inclusive and fair institutional change; and

to what extent does reconciliation change the way a society functions? Looking at South Africa, one of reconciliation's most celebrated cases, du Toit shows that the key ingredient to successful reconciliations is acknowledging the centrality of relationships. He further develops his own theoretical approach to reconciliation-as-interdependence-the idea that reconciliation is the result of an integrated process of courageous leadership, fair and inclusive institutions, and

social change built toward a mutual goal of prosperity. As du Toit conveys, the motivation for reconciliation is the long-term well-being of one's own community, as well as that of enemy groups. Without ensuring the conditions in which one's enemy can flourish, one's own community is unlikely to prosper sustainably.

As a major economic, relational, and identity resource, communication is crucial to the well-being

and success of young people. And yet adolescents are typically characterized in the media as inadequate communicators, whose language practices adults bemoan as unintelligible and deleterious. In looking to critique these pervasive stereotypes, the editors of *Talking Adolescence* have brought together some of the world's leading experts on youth and adolescence, whose interdisciplinary research demonstrates how communication powerfully structures and

meaningfully facilitates the lives of young people. Adding to the growing literature on intergenerational and lifespan communication, *Talking Adolescence* is the first substantive volume devoted to young people. *The Hidden Life of Hanna* *Why Rough Guides* Limited  
About 50km outside of Cape Town lies the beautiful town of Stellenbosch, nestled against vineyards and blue mountains that stretch to the sky. Here reside some of South

Africa's wealthiest individuals: all male, all Afrikaans – and all stinking rich. Johann Rupert, Jannie Mouton, Markus Jooste and Christo Weise, to name a few. Julius Malema refers to them scathingly as 'The Stellenbosch Mafia', the very worst example of white monopoly capital. But who really are these mega-wealthy individuals, and what influence do they exert not only on Stellenbosch but more broadly on South African society? Author Pieter du Toit begins by exploring

the roots of Stellenbosch, one of the wealthiest towns in South Africa and arguably the cradle of Afrikanerdom. This is the birthplace of apartheid leaders, intellectuals, newspaper empires and more. He then closely examines this 'club' of billionaires. Who are they and, crucially, how are they connected? What network of boardroom membership, alliances and family connections exist? Who are the 'old guard' and who are the 'inkommers', and what about the youngsters

desperate to make their mark? He looks at the collapse of Steinhoff: what went wrong, and whether there are other companies at risk of a similar fate. He examines the control these men have over cultural life, including pulling the strings in South Africa rugby. *Farthest North* Random House

Relying on a wealth of ethnographic and statistical data, this groundbreaking volume documents the many constraints and social forces that prevent Mexican-origin adolescents from constructing the kinds of networks that provide access to important forms of social support. Special attention is paid to those forms of support privileged youth normally receive and working-class youth do not, such as expert guidance regarding college opportunities. The

author also reveals how some working-class ethnic minority youth become the exception, weaving social webs that promote success in school as well as empowering forms of resiliency. In both cases, the role of social networks in shaping young people's chances is illuminated. "In this badly needed alternative to the individualism that pervades most debates about American education, Stanton-Salazar explores how Latino teenagers' lives are embedded within social

networks from home, community, and school. This grand work shows how school programs can confound or can draw from the strengths of such networks to build better lives for all.” —Bruce J. Biddle, Professor Emeritus of Psychology and Sociology, University of Missouri-Columbia “A beautifully written and inspiring book that announces a new generation of Mexican/Latino scholars. . . This is a book which tells the tale about Mexican/Latino

adolescents but, in reality, it is a book about how working-class adolescent life is socially constructed, defined, and elaborated in the United States. An eloquent rendering, indeed.” —Carlos G. Vélez-Ibáñez, Presidential Chair in Anthropology, University of California, Riverside “Using creative theorizing and rigorous methodology, *Manufacturing Hope and Despair* illuminates brilliantly the supposed mystery of persistent race/class inequities in American society.”

The Book of Squares by Fibonacci is a gem in the mathematical literature and one of the most important mathematical treatises written in the Middle Ages. It is a collection of theorems on

indeterminate analysis and equations of second degree which yield, among other results, a solution to a problem proposed by Master John of Palermo to Leonardo at the Court of Frederick II. The book was dedicated and presented to the Emperor at Pisa in 1225. Dating back to the 13th century the book exhibits the early and continued fascination of men with our number system and the relationship among numbers with special properties such as prime numbers, squares, and

odd numbers. The faithful translation into modern English and the commentary by the translator make this book accessible to professional mathematicians and amateurs who have always been intrigued by the lure of our number system.

Set in South Africa, MindF\*\*k is a powerful, disturbing, and at times frightening story. Chris Burns, and his friends - Kerbs and Sky Eyes - take to the road, heading for

the MindF\*\*k rock festival. Along the way they pick up the gorgeous Partygirl. Burns and Partygirl connect immediately. But on the first night, while the rockmusic blasts from the stage, something unexpected happens - Burns's world gets turned on its head as one of the boys emerges from the tent with blood on his hands. MindF\*\*k is a real page-turner. The gripping, character-focused, first-person narrative delves right to the heart of a life on-the-edge and virtually out of control. Gritty,

hard-hitting, and often shocking, it is packed with drama, emotion, suspense and intrigue from one page to the next. And there is a serious sting in the tail. MindF\*\*k is part of the Cutting Edge series: fast-paced, quick reads for teens and young adults looking for fiction which chimes with their perspective on life. Mindf\*\*k is a title in the highly contemporary Cutting Edge fiction series for young adults. The series features fast-paced quick reads. Each book focuses on difficult topics

and situations that many teenagers will have experienced first-hand or through friends. Cutting Edge is ideal for readers aged 14+ with a reading age of 12+.

Mapping Applied

Linguistics: A Guide for Students and Practitioners provides an innovative and wide-ranging introduction to the full scope of applied linguistics. Incorporating both socio-cultural and cognitive perspectives, the book maps the diverse and constantly expanding range of theories, methods and issues faced by students and practitioners alike. Practically oriented and

ideally suited to students new to the subject area, the book provides in-depth coverage of: language teaching and education, literacy and language disorders language variation and world Englishes language policy and planning lexicography and forensic linguistics multilingualism and translation. Including real data and international examples, the book features further reading and exercises in each chapter, fieldwork suggestions and a full glossary of key terms. An

interactive Companion Website also provides a wealth of additional resources. This book will be essential reading for students studying applied linguistics, TESOL, general linguistics, and education at the advanced undergraduate or master's degree level. It is also the ideal gateway for practitioners to better understand the wider scope of their work. Talking Adolescence Arrow Press Focusing on the use of African languages in higher education, this

book showcases South African higher education practitioners' attempts to promote a multilingual ethos in their classes. It is a first-time overview of multilingual teaching and learning strategies that have been tried and tested in a number of higher education institutions in South Africa. Despite language-in-education policies that extol the virtues of multilingualism, practice remains oriented towards English-only learning and teaching. In the multilingual contexts of

local campuses, this book shows how students and lecturers attempt to understand their multiple identities and use the available languages to create multilingual learning environments. The Neglected Tradition Teachers College Press This book is the first comprehensive monograph on the Function Theory of Lexicography, which originated at the Aarhus School of Business (Aarhus University). Function Theory considers

dictionaries to be tools that are constructed for assisting specific users with punctual needs in specific usage situations, e.g. communicative-oriented situations and cognitive-oriented situations. The book's main focus is on defending the independent academic status of lexicography and its corollary: The process of designing, compiling and updating (specialised) online dictionaries needs a theoretical framework that addresses general and specific aspects. The

former are common to all types of information tools, the latter are mainly dependent on the media for which the information tool is constructed and their specific target users. This book offers both aspects and moves from the highest level of abstraction to very detailed aspects of lexicographic work, e.g. how to convert an originally-conceived polyfunctional online dictionary into several monofunctional usage-based ones. The book

illustrates that the theory and the methodology currently used by advocates of the Function Theory of Lexicography offers better results than other approaches and therefore makes its case for proposing the Function Theory for terminological/terminographical work.

This edited book brings together an international cast of contributors to examine how academic literacy is learned and mastered in different

tertiary education settings around the world. Bringing to the fore the value of qualitative enquiry through ethnographic methods, the authors illustrate in-depth descriptions of genre knowledge and academic literacy development in first and second language writing. All of the data presented in the chapters are original, as well as innovative in the field in terms of content and scope, and thought-provoking regarding theoretical,

methodological and educational approaches. The contributions are also representative of both novice and advanced academic writing experiences, providing further insights into different stages of academic literacy development throughout the career-span of a researcher. Set against the backdrop of internationalisation trends in Higher Education and the pressure on multilingual academics to publish their research outcomes in English, this

volume will be of use to academics and practitioners interested in the fields of Languages for Academic Purposes, Applied Linguistics, Literacy Skills, Genre

Analysis and Acquisition and Language Education.
