This guide shows how to design and set up mixture experiments, then analyze the data and draw inferences from the results. Virtually every technique that has appeared in the literature of mixtures can be found here and, for each method, computing formulas are provided with completely worked examples. Coverage begins with Scheffe lattice designs, introducing the use of independent variables and ends with the most current methods. Almost all of the numerical examples are taken from real experiments. It should serve as a supplementary text for courses on experimental design and statistical methods as well as a ready reference to important techniques for research workers in such fields as engineering, the physical sciences, agriculture and medicine.

Un Grand Médecin et Biologiste Casimir-Joseph Davaine (1812–1882) Univ. Press of Mississippi

In the four months following the January 20, 1783, armistice that ended the War for American Independence, Franklin was remarkably energetic as he helped oversee the transition to peace and waged a multifaceted campaign to publicize the ideals of the new nation. Though political turmoil in Britain delayed negotiations for the definitive peace treaty, Franklin deftly negotiated America's first commercial treaty with a neutral nation, Sweden, which was signed in secret. He distributed his richly symbolic *Libertas Americana* medal, worked toward the publication of his French edition of the American state constitutions, and fielded scores of letters from people all over Europe who sought to emigrate, to establish trade connections with the United States, to become consuls, and to offer congratulations and advice.

The Dictionary of Louisiana French (DLF) provides the richest inventory of French vocabulary in Louisiana and reflects precisely the speech of the period from 1930 to the present. This dictionary describes the current usage of French-speaking peoples in the five broad regions of South Louisiana: the coastal marshes, the banks of the Mississippi River, the central area, the north, and the western prairie. Data were collected during interviews from at least five persons in each of twenty-four areas in these regions. In addition to the data collected from fieldwork, the dictionary contains material compiled from existing lexical inventories, from texts published after 1930, and from archival recordings. The new authoritative resource, the DLF not only contains the largest number of words and expressions but also provides the most complete information available for each entry. Entries include the word in the conventional French spelling, the pronunciation (including attested variants), the part of speech classification, the English equivalent, and the word's use in common phrases. The DLF features a wealth of illustrative examples derived from fieldwork and textual sources and identification of the parish where the entry was collected or the source from which it was compiled. An English-to-Louisiana French index enables readers to find out how particular notions would be expressed in la Louisiane .
