Little Skill Seekers:  
Preschool Workbook  
Scholastic Teaching Resources

The animal- and nature-themed activities in this fun compendium focus on colors, numbers, and shapes, and go from simple to complex as the child develops. Kids can count the number of quills on a porcupine, color in the different parts of a beautiful butterfly, explore a mole's tunnel by joining the dots, and much more. Twenty-four pages of stickers make learning more tactile and interactive.

"Fun, fanciful, and even informative."  
—People The first comprehensive history of felines—from the laps of pagan gods to

present-day status as meme stars—as revealed by a very learned tabby with a knack for hunting down facts. Since the dawn of civilization, felines have prowled alongside mankind as they expanded their territory and spread the myth of human greatness. And today, cats are peddled on social media as silly creatures here to amuse humans with their antics. But this is an absurd, self-centered fantasy. The true history of felines is one of heroism, love, tragedy, sacrifice, and gravitas. Not entirely convinced? Well, get ready, because Baba the Cat is here to set the record straight. Spanning almost every continent and thousands—yes, thousands—of years,

Baba's complex story of feline survival presents readers with a diverse cast of cats long forgotten: from her prehistoric feline ancestors and the ancient Egyptian cat goddess Bastet to the daring mariners at the height of oceanic discovery, key intellectuals in the Enlightenment period, revered heroes from World Wars I and II, and the infamous American tabbies. Baba, a talented model in addition to a scholar, goes beyond surface-level scratches, pairing her freshly unearthed research with a series of stunning costume portraits to bring history to life. A paws-on journey through the feline hall of fame, with in-depth research and four-legged testaments that will make you

rethink who defines history, *A Cat's Tale* is a one-of-a-kind chronicle that introduces readers to the illustrious ancestors of their closest companions and shows, once and for all, that cats know exactly what they're doing.
