I will make this bold statement straight away, "This book finds big priced winners in UK handicap horse races" easily and consistently! I need to make a very important statement here backing double figure priced horses can return some huge profits but you must remember they all do not win, more will lose races which is to be expected. There is a reason why the horse is such a big price it is mainly due to the

fact the horse has not won for a long time. Another reason is that a horse could be out of its depth in other words running in a higher class of race. Most punters want winners every day at any odds this makes them feel good. They think they are making a profit, how wrong they are and the bookmakers take their money every day with a smile on their faces. Another mistake the average punter makes is that they will take current SP starting price of a horse and not look for a larger price. So say a horse is 2/1 that's decimal odds 3.0 on the Betfair betting exchange. They will readily take these odds. A more profitable approach is to take higher odds like

decimal odds 3.5. Ok you might think there is not much difference between decimal odds 3.0 and 3.5 but it adds up over a year and that is where your profit is. The only way to profit in horse racing is to back horses at larger odds than what is being offered. The betting exchanges show the true odds of a horse just before the race starts. As these odds are derived from many punters and bookmakers who are using the betting exchanges then the price of the horse before the race starts is its true odds. This price is a consolidated view and it is normally correct and near the mark. This system also finds large priced horses that are placed 1st 2nd 3rd

or 4th regularly in a horse race and these can be exploited in the Betfair place market at some juicy odds. I have taken decimal odds of 7.0 on four places in a horse race and mopped up.

The Miller's Guide has settled pub debates on racing and sport for more than a century. The 800-page book contains place getters for all Australian Group races as well as thousands of sporting results dating back to the 1880s. This sporting annual has been associated with the 'Sport of Kings' since the early 1880s when racehorse owner, breeder and bookmaker J. J. Miller printed his first guide to aid punters betting on the Caulfield and Melbourne Cups. Initially called J. J. Miller's Sporting Pamphlet and later the J. J. Miller's Sporting Annual, this publication came to be known to its many readers as the Miller's Guide.

Exotic Betting at the Racetrack is unique as it covers the efficient-inefficient strategy to price and find profitable

racetrack bets, along with handicapping that provides actual bets made by the author on essentially all of the major wagers offered at US racetracks. The book starts with efficiency, accuracy of the win odds, arbitrage, and optimal betting strategies. Examples and actual bets are shown for various wagers including win, place and show, exacta, quinella, double, trifecta, superfecta, Pick 3, 4 and 6 and rainbow pick 5 and 6. There are discussions of major races including the Breeders' Cup, Pegasus, Dubai World Cup and the US Triple Crown from 2012-2018. Dosage analysis is also described and used. An additional feature concerns great horses such as the great mares Rachel Alexandra, Zenyatta, Goldikova, Treve, Beholder and Song Bird. There is a discussion of horse ownership and a tour through arguably the world's top trainer Frederico Tesio and his stables and horses in Italy. [Related Link\(s\)](#)

Why throw money away? Imagine you go into your local betting shop or via the internet betting sites etc. and place your bets (Yankee, Lucky 15 etc.) . As you

place your bet you can see your winnings, thinking how happy you will be, then at 6pm that evening you say to yourself, 'oh it lost never mind, it was only a bit of fun!' as you try to convince yourself. It's not fun losing, it is miserable you have just thrown away a percentage of your salary. How long did it take you to earn that money, add up all the losing days/weeks and you will be surprised, probably a week's holiday in Spain etc. Get the picture! The intelligent people do their homework first, understanding horse form is the key, you cannot guess. I will show you how to understand horse form quickly using the Racing post on the internet and following a simple 6 step method. You can practice the method first without putting any money down. Try the method on a couple of races and then check the horse race results later. Practice and temperament is the key.

28.8 will teach you how to rate horse fitness from monitors or live on-course to win and trade. Trading, for the inexperienced, is where a punter backs a horse at high odds, before later laying the same horse at lower odds, or vice versa, in

order to guarantee a profit. For example, you have \$10 on a soft-ground specialist in the ante-post markets for a big race at 20.00. After a few days of persistent rain, the horse's odds shorten to 10.00. You lay the same horse for \$20. If the horse wins, you pick up \$190 profit on your back bet, but pay out \$180 on your lay bet, for an overall profit of \$10. If the horse loses, you lose your \$10 back stake, but win the \$20 you laid, again for a \$10 overall profit. It's the betting world's version of traders' attempts to buy-low and sell-high.

Imagine if you had an Almanac with tomorrow's sports results and events? Imagine what you could do if you knew the outcome before it actually happened. Impossible? This book teaches you how sports investing works and how you can win consistently from sports betting. Sports has been my life since childhood. I was trying to crunch the code to predict tomorrow's games. In fact, this may sound a little bit like a back to the future fairytale, but I've come as close as I can to the results of Tomorrow's Almanac. During the last 13 years, I've been gathering sports data for Major League sports like Major League Baseball, NHL Hockey, the NFL football and NBA basketball. I'm crunching the numbers and I'm comparing the stats. I'm analyzing and back testing everything for years and years to crack the sports code and to find those repeating patterns and trends. This makes me understand what makes teams win and what makes teams lose. And you know what I found? I found that history always repeats itself. This is true, especially in sports where the rules are strictly defined. The outcomes in these

situations are very predictable. Of course there are lucky strikes and conditions that are impossible to put into perspective. However, those are very small percentages. If you know the past outcome of an event, you can predict the results for the game in similar circumstances with a high degree of probability. As I said before, the past is never a full indication of what will happen in the future and there is always room for surprises, but again, this is what makes sports fun to watch. Am I right? However, what is the chance that a team with similar power and player statistics will produce a similar outcome in a similar game in similar circumstances? What's that percentage? 86.5% that's right. An 86.5% of the cases there will be no surprises and the prediction will come absolutely. The Zcode investing software is the best system in the market because it keeps making investors consistent gains each and every month. Truth is we love sports, but we hate to gamble and that's why we call this sports investing, which is similar to any other trading like stocks, stock options, and forex trades. This is just way more predictable than today's flawed

economic models with crisis's and bankruptcy events. Every day the software is gathering thousands and thousands of sports data and results: every single event, every single detail, every single player and every single team. I start the simulation with over 80 parameters in the zcode formula to come up with a precise and easy to use prediction and not only tell you who is going to win, but also and most importantly, where the value is, which means more money can be made guessing. To learn more about how you can create a consistent \$1500 monthly from sports betting following our guide, just order this book right now!

There is growing interest among academics and policymakers in the economics of gambling, which has been stimulated by major regulatory and tax changes in the U.S., U.K. Continental Europe, Asia, Australia and elsewhere. Unfortunately, there is no comprehensive source of path-breaking research on this topic. To fill this gap, we commissioned chapters from leading economists on all

aspects of gambling research. Topics covered include the optimal taxation structure for various forms of gambling, factors influencing the demand and supply of gambling services, forecasting of gambling trends, regulation of gambling, the efficiency of racetrack and sports betting markets, gambling prevalence and behavior, modeling the demand for gambling services, the economic impact of gambling, substitution and complementarities among different types of gambling activity, and the relationship between gambling and other sectors of the economy. These are all important issues, with significant global implications. Specifically, we divide the Handbook into sections on casinos, sports betting, horserace betting, betting strategy, motivation, behavior and decision-making in betting markets, prediction markets and political betting, and lotteries and gambling machines

Are your trading results a little random? Do you find all progress is consistently wiped out by one big loss? One of biggest problems amongst new traders is the lack

of understanding, when trading an active market all the numbers, graphs and activity often appears quite daunting. Especially when it means very little to you. With all the opportunity on offer it's hard not to get sucked in, but you fail time and again. It's important to understand the reasons behind market behaviour. In doing so, it allows us to identify situations and adapt should they change over time. Much like that saying goes: "Give a man a fish and you feed him for a day. Teach a man to fish and you feed him for a lifetime" The Guide is written without any additional 'padding' to make it clear and easy to understand quickly. Previous readers have reported a rapid change in results within a week. It's important to remember trading isn't just about winning large sums of money, it's about not losing too! After a first read, that alone should have an impact on your results. This guide is more than a strategy that works, it's the explanation behind what I do and why I consider certain indicators important! The Pre-Race Trading Guide is simple, it will help you in: - Understanding of how the markets function, the motivation behind the numbers - Identify profitable

situations, ready in anticipation to squeeze as much profit from them as possible - Spot difficult situations to trade, avoiding losses before they even happen - Effectively implementing yourself in the market, execution is the key to maximum efficiency

I have written many books about UK horse racing betting systems e.g horse laying in 6f 7f races, horse dutching to 35% book, large betfair place market decimal odds betting systems and many more. I have been able to do this as I have modelled these horse racing betting systems on my own database using my own computer code. I am fortunate I have I.T background and have computer science degree which has helped me a great deal in my quest for the perfect horse racing systems. This book is different as I feel that this horse racing betting system helps punters see the light when selecting horses for a bet. The system is so simple to follow that punters who have busy lives can apply this system very quickly and accurately. The system uses the free racing post on the internet so there are no further costs. The

book is priced to reflect 'seeing the light' many punters are in the dark!

The Punt Mark Horrocks

My Background I graduated from University with a computer science degree many years ago when a degree meant something! I was always interested in horse racing and was fascinated in solving the UK horse racing form puzzle. I started my own computer business in my early 20's where I made good money and travelled across Europe. It was at this point in my life I decided to start a horse tipping business where I had weekly full page colour adverts in the Racing Post at £2K per advert and offices. I left the running of this horse tipping business to staff who were responsible for all parts of the business while I concentrated on my computer business. In my late 30's around 1990 I decided to use my computer skills to computerise and model UK horse racing form using a database built with 10 years of detailed horse racing form. It was over a period of 2 years that I concentrated my efforts on UK handicap races in conjunction with the betting exchange Betfair. This is where I believed maximum profit could be gained. The computer

model allowed me to process 100's of handicap races per day and then formulate my system tweaking a horse's weight and BHB or OR (Official Rating). I must confess this was a difficult puzzle to crack even with a computer program that I wrote to crunch the data. I eventually found the correct weight and BHB rating for a horse based on it's last performances in handicap races. This eBook outlines this system and can be manually applied easily using the Racing Post on the internet. Punter's can be fickle people which 95% of them have no understanding of horse form and probability. If you can back horses at higher prices then you will make money! I regularly back horses that have a starting price of 2/1 and get 10/1! Most punters want winners everyday regardless of the price and the horse's real chance of winning that race, this is where the bookmakers clean up.

This UK and Irish Handicap horse racing betting system contains 4 simple steps to identify potential winning horses in a horse race. I wrote this system so that busy punters using the excellent racing post on the internet for free can find profitable horses quickly in handicap horse races. I like this book because I have added some optional extra filters to the horse racing system to improve the quality of selections and to achieve a better strike

rate. I have written numerous books on horse racing but this is my favourite and most profitable UK and Irish horse racing system.

Sure, Nevada had casinos, but nowhere else. There were

no lotteries, no riverboats, no Internet. Horse racing was not just the only legal gambling option, but it was also one of America's most popular sporting events. Only baseball could rival horse racing for fan appeal and newspaper headlines. It was a time of Seabiscuit, War Admiral, and Whirlaway. Flash forward to today. Some form of gambling is available in almost every state. There are casinos damn near everywhere, on land, on water, on reservations. Mega-jackpot state lotteries flourish. Daily Fantasy Sports are the latest "next big thing" online, and, of course, we've gone through a boom-and-bust-and-reborn cycle with online poker. And racing? Long proclaimed dead more than once, horse racing, specifically Thoroughbred racing, is alive and well. Who doesn't know about American Pharoah, the first Triple Crown AND Breeder's Cup winner ever? There are new tracks popping up across the country, and horse racing is as strong as ever overseas, as England, Europe, Australia, New Zealand, Japan, and Hong Kong have strong racing programs. And, thanks to the Internet, you can wager on ALL OF IT. The ABC's of Online Horse Racing looks at the

various online websites that provide you with a box seat on the action. Every aspect of setting up an account and learning the betting pad are covered, and later chapters teach you how to handicap like the professionals. Geared to gamblers who have never considered betting the ponies, *The ABC's of Online Horse Racing* is a beginner's guide to online horse racing, teaching you how and where to watch, wager, and win in the 21st Century version of this great sport.

Picking Winners No Problem Mark Horrocks

Trading the Betfair and sporting markets in-play is rapidly growing in popularity thanks to the increased sporting coverage available on many different satellite and cable channels. Many people start by just using Betfair to obtain better odds than those available at the traditional bookmakers. They then perhaps do a little more research and learn to trade the markets, but to make a regular profit a serious, disciplined and planned approach needs to be employed in order to not only win but keep on winning. 'Mastering Betfair' will take the reader through many

of the low-risk strategies developed by the author over the past 3 years. The book also aims to highlight to the Betfair user the importance of employing disciplines - such as managing risk - that are normally associated with the financial markets, and indeed it is hoped that the book will also highlight to the financial trader the unique opportunities that are available on Betfair. The system works for UK Handicap and Non Handicap races but I tend to favour Handicap races as the prices are larger. I will concentrate only on Handicap races in this book. In summary the system works on two form variables that can be obtained from the Racing Post website and a race can be assessed in 5 minutes. This horse racing system can find winners of a UK horse race very quickly and allows punters who have busy lives to assess horse form very quickly. I wrote this horse racing system as I had many emails from punters who wanted to have a bet on Saturday or day at the races but did not want to spend hours reading horse form. This system can benefit novice to professional punters.
