This edited book is a collection of papers, written by language assessment professionals to reflect the guidance of Professor Lyle F. Bachman, one of the leading second language assessment experts in the field for decades. It has three sub-themes: assessment of evolving language ability constructs, validity and validation of language assessments, and understanding internal structures of language assessments. It provides theoretical guidelines for practical language assessment challenges. Chapters are written by language assessment researchers who graduated from the University of California, Los Angeles, where Professor Bachman trained them including the book editors.

This book constitutes the refereed proceedings of the 7th International Workshop on Probabilistic Graphical Models, PGM 2014, held in Utrecht, The Netherlands, in September 2014. The 38 revised full papers presented in this book were carefully reviewed and selected from 44 submissions. The papers cover all aspects of graphical models for probabilistic reasoning, decision making,

and learning.

Methods in Stream Ecology: Volume 2: Ecosystem Structure, Third Edition, provides a complete series of field and laboratory protocols in stream ecology that are ideal for teaching or conducting research. This new two-part edition is updated to reflect recent advances in the technology associated with ecological assessment of streams, including remote sensing. Volume two covers community interactions, ecosystem processes and ecosystem quality. With a student-friendly price, this new edition is key for all students and researchers in stream and freshwater ecology, freshwater biology, marine ecology and river ecology. This book is also supportive as a supplementary text for courses in watershed ecology/science, hydrology, fluvial geomorphology and landscape ecology. Provides a variety of exercises in each chapter Includes detailed instructions, illustrations, formulae and data sheets for in-field research for students Presents taxonomic keys to common stream invertebrates and algae Includes website with tables and a links written by leading experts in stream ecology

Grammaticalization Scenarios from Europe and Asia

Walter de Gruyter GmbH & Co KG
The Sustainable Development Goals (SDGs) (2016-2030) set by the United Nations in 2015 restated the importance of universal primary education for all, and specifically discuss quality, equity, and inclusion in basic education. To achieve this, the role of community has been emphasized and participation has become a "buzzword" in international development over the past several decades. Despite the growing attention to community participation in school management, previous literature has shown mixed results in terms of its actual practice and its impacts on quality, equity, and

inclusion in education. This book deepens the contextual understanding of community in developing countries and its involvement in schools in general, and its impact on quality, equity, and inclusion of school education in particular. By presenting various case studies in Asia, Africa, Latin America, and a post-conflict state in Europe, the book analyses commonalities and differences in the ways communities are involved and cast their impacts and challenges. The book contributes knowledge on the ways in which community involvement could work in developing countries, the detailed processes and factors that make community participation work in different dimensions, and remaining challenges that scholars and practitioners still need to be concerned and mindful in the field. This book will appeal to both researchers and practitioners who are concerned about the community participation approach for the SDGs.

This is the first book that presents a comprehensive introduction to and overview of electro-magnetic tissue property imaging techniques using MRI, focusing on Magnetic Resonance Electrical Impedance Tomography (MREIT), Electrical Properties Tomography (EPT) and Quantitative Susceptibility Mapping (QSM). The contrast information from these novel imaging modalities is unique since there is currently no other method to reconstruct high-resolution images of the electro-magnetic tissue properties including electrical conductivity, permittivity, and magnetic susceptibility. These three imaging modalities are based on Maxwell's equations and MRI data acquisition techniques. They are expanding MRI's ability to provide new contrast information on tissue structures and functions. To facilitate further technical progress, the book provides in-depth descriptions of the most updated research outcomes, including underlying physics, mathematical theories and models, measurement techniques, computation issues, and other challenging problems. Testing Jones & Bartlett Publishers *Understanding and Treating Hot Flashes in Menopause with Chinese Medicine* is the first book in history to be written on the subject. This book combines Chinese medicine concepts with current Western medicine frameworks of science and understanding of patho-mechanisms for a contemporary treatment approach to hot flashes in menopause. Dr Grosam explores both Western biomedicine - including the roles of estrogen and neurotransmitters - and Chinese medicine historical theory to provide an up-to-date understanding of hot flashes and menopausal transition. Exploring current treatments in Western medicine as well as acupuncture and herbs, he presents a complete evaluation of how modern treatment strategies can be improved through an integrated approach. Allowing for a deeper understanding of the causes of hot flashes in menopause, this book opens doors to fresh approaches and treatment strategies for women's healthcare practitioners from both branches of medicine.

[Maternal-Child Nursing Care Optimizing Outcomes for Mothers, Children, & Families](#) Springer Publishing Company *Women's Gynecologic Health, Third Edition* is a trusted, comprehensive, and evidence-based text that presents women's gynecologic health from a woman-centered and holistic viewpoint. Encompassing both health promotion and management of gynecologic conditions, it provides clinicians and students with a strong foundation in gynecologic care and the knowledge necessary to apply it in clinical practice. With an emphasis on the importance of respecting the normalcy of female physiology, it is an essential reference for all women's healthcare providers. The Third Edition includes four

new chapters on prenatal and postpartum care, including anatomy and physiologic adaptations of normal pregnancy, diagnosis of pregnancy and overview of prenatal care, common complications of pregnancy, and postpartum care.

Gynecologic Health Care: With an Introduction to Prenatal and Postpartum Care Birkhäuser

Using a unique collaborative care approach to adult health nursing, *Medical-Surgical Nursing: Patient-Centered Collaborative Care, 8th Edition* covers the essential knowledge you need to succeed at the RN level of practice. Easy-to-read content includes evidence-based treatment guidelines, an enhanced focus on QSEN competencies, and an emphasis on developing clinical judgment skills. This edition continues the book's trendsetting tradition with increased LGBTQ content and a new *Care of Transgender Patients* chapter. Written by nursing education experts Donna Ignatavicius and M. Linda Workman, this bestselling text also features NCLEX® Exam-style challenge questions to prepare you for success on the NCLEX Exam. Cutting-edge coverage of the latest trends in nursing practice and nursing education prepares you not just for today's nursing practice but also for tomorrow's. UNIQUE! Collaborative care approach organizes all medical, surgical, nursing, and other interventions within the framework of the nursing process, mirroring the nurse's role in the coordination/management of care in the real world of medical-surgical nursing. UNIQUE! A focus on nursing concepts relates concepts learned in *Nursing Fundamentals* with the disorders you will study in *Medical-Surgical Nursing*. Easy to read, direct-address writing style makes this one of the most readable medical-surgical nursing textbooks available. UNIQUE! A focus on QSEN emphasizes patient safety and evidence-based practice with Nursing Safety Priority boxes including Drug Alerts, Critical Rescues, and Action Alerts. UNIQUE! Emphasis on clinical judgment teaches you to develop skills in clinical reasoning and clinical decision-making when applying concepts to clinical situations, with Clinical Judgment Challenge questions throughout the chapters. An emphasis on prioritization stresses the most important patient problems and nursing interventions, with patient problems presented in a single prioritized list of nursing diagnoses and collaborative problems. UNIQUE! NCLEX preparation tools include chapter-opening Learning Outcomes and chapter-ending Get Ready for the NCLEX Examination! sections organized by NCLEX® Client

Needs Categories, plus NCLEX

Examination Challenge questions, with an answer key in the back of the book and on the Evolve companion website. Practical learning aids include NCLEX Examination Challenges, Clinical Judgment Challenges, Best Practice for Patient Safety & Quality Care charts, common examples of drug therapy, concept maps, laboratory profiles, and more. A clear alignment with the language of clinical practice reflects the real world of nursing practice with NANDA diagnostic labels where they make sense, and non-NANDA diagnostic labels when these are more common descriptions of patient problems. Student Resources on an Evolve companion website help you prepare for class, clinicals, or lab with video and audio clips, animations, case studies, a concept map creator, NCLEX exam-style review questions, and more. UNIQUE!

Concentration on essential knowledge for the RN level of medical-surgical nursing practice focuses your attention on need-to-know content to pass the NCLEX Examination and practice safety as a beginning nurse. NEW! Enhanced focus on QSEN (Quality and Safety Education for Nurses) competencies includes new icons identifying QSEN competency material and new Quality Improvement boxes describing projects that made a dramatic difference in patient outcomes. UPDATED learning features include an expanded emphasis on developing clinical judgment skills; on prioritization, delegation, and supervision skills; on long-term care issues; and on preparation for the NCLEX® Examination and consistency with the 2013 NCLEX-RN® Test Plan. NEW! UNIQUE! *Care of Transgender Patients* chapter discusses the unique health care needs and issues specific to the transgender community. Improved delineation of NANDA-I nursing diagnoses clearly differentiate NANDA diagnoses from collaborative problems. NEW photos and drawings show patient care skills as well as the latest in nursing education and practice.

This edition of *Nature & Faune* journal

explores the science and innovations (technical, social and policy) that can support the achievement of the African dream of restoring 100 million hectares of its degraded land. Articles in this edition share experiences on challenges, opportunities and successful restoration, including farmer managed natural regeneration, improved management of smallholder woodlots, reforestation, evergreen agriculture with intercropped trees, and associated sustainable land management practices such as water harvesting and erosion control. Africa's Great Green Wall is presented in this edition as a transformative model for rural communities' sustainable development. In particular the lessons learned from the "Action Against Desertification" programme funded by the European Union and implemented by FAO with partner countries and organizations, are discussed, paving a way towards the implementation of African Forest Landscape Restoration Initiative. Initiatives to address land degradation and desertification trends in Africa, promote sustainable land management, and restoration of degraded forests and landscapes include Africa's Great Green Wall initiative, and 2016's African Forest Landscape Restoration Initiative - AFR100. Most of the articles dwelt on how efforts to this end are being pursued.

Threats to Springs in a Changing World Springer

Trusted by clinicians for more than 75 years, Conn's Current Therapy presents today's evidence-based information along with the personal experience and discernment of expert physicians. The 2023 edition is an excellent resource for a wide range of healthcare professionals, including primary care, subspecialists, and allied health, providing current treatment information in a concise yet in-depth format. Nearly 350 topics have been carefully reviewed and updated to bring you state-of-the-art content in even the most rapidly changing areas of medicine. Offers personal approaches from recognized leaders in the field, covering common complaints, acute diseases, and chronic illnesses along with the most current evidence-based clinical management options. Follows a consistent, easy-to-use format throughout, with diagnosis, therapy, drug protocols, and treatment pearls presented in quick-reference boxes and tables for point-of-care answers to common clinical questions. Includes new chapters on leg edema and venous stasis, multisystem inflammatory syndrome in children (MIS-C), monoclonal antibodies, and genetic

testing. Incorporates more electronic links throughout the text that connect the reader to apps and clinical prediction tools that can easily be accessed in practice. Features thoroughly reviewed and updated information from many new authors and two new associate editors, Drs. Joel J. Heidelbaugh and Ernestine M. Lee, who offer a fresh perspective and their unique personal experience and judgment. Provides current drug information thoroughly reviewed by PharmDs. The Handbook of Attitudes, Volume 1: Basic Principles Frontiers Media SA

This volume presents a collection of contributions that were published in "Pure and Applied Geophysics - pageoph" and which deals with the major earthquake that hit Illapel, Chile on September 16, 2015 with magnitude 8.3, and associated trans-oceanic tsunami. The subducting Nazca plate beneath the Andes caused this major earthquake, generating strong shaking, permanent deformation, free oscillations of the Earth, and tsunamis. This event occurred in the flat-angle subducting segment of the plate. The generated tsunami spread throughout the entire Pacific Ocean and was recorded by numerous coastal tide gauges and open-ocean DART stations. All articles give an up-to-date account of research in one of the most active seismic zones worldwide. An introductory article by Kenji Satake rounds this collection off.

While Embodied Cognition has now been accepted as mainstream in Cognitive Science, the study of its potential contribution to understanding child

development and ageing, as well as its potential applications, is still in its infancy. This collection of articles explores the contribution of Embodied Cognition to studying the lifespan and potential applied fields. The contributions are theoretical and empirical and offer an important framework for future research and its applications.
