The #1 international best seller *In Lean In*, Sheryl Sandberg reignited the conversation around women in the workplace. Sandberg is chief operating

officer of Facebook and coauthor of Option B with Adam Grant. In 2010, she gave an electrifying TED talk in which she described how women unintentionally hold themselves back in their careers. Her talk, which has been viewed more than six million times, encouraged women to “sit at the table,” seek challenges, take risks, and pursue their goals with gusto. Lean In continues that conversation, combining personal anecdotes, hard data, and compelling research to change the conversation from what women can’t do to what they can. Sandberg provides practical advice on negotiation techniques, mentorship, and building a satisfying career. She describes specific steps women can take to combine professional achievement with personal fulfillment, and

demonstrates how men can benefit by supporting women both in the workplace and at home. Written with humor and wisdom, Lean In is a revelatory, inspiring call to action and a blueprint for individual growth that will empower women around the world to achieve their full potential.

Health care providers and social workers at nursing homes may feel they have little time to design programs for the family members of their residents, yet you will learn in *How to Get Families More Involved in the Nursing Home* that the benefits of such programs are immense and the time investment will pay off. You learn of four family programs that can be put into use

immediately or can be changed or expanded to fit the needs of an individual setting. In addition, you will witness how educational workshops, support groups, family councils, and holiday socials increase family involvement in the nursing home, which in turn improves the quality of care and life that long-term residents experience. In the daily bustle of trying to meet the needs of all residents, staff members do not generally have time to devote to family members who often feel awkward during their visits and do not realize their help would be welcomed. Nursing home coordinators and social workers can use the model support groups and workshops this book provides to open the lines of communication between staff and families and enable them to

work together to assess and meet residents' needs. Implementation of these programs encourages families to take an active role in the operation of the nursing home and to participate in the decisions and events that affect the residents' lives. *How to Get Families More Involved in the Nursing Home* provides easy, step-by-step procedures for the installation of family programs without overtaxing social workers and directors already under pressure. In addition to the four model programs developed and presented by author Tammy LaBrake, a Public Health Social Work Consultant, this book examines research findings on the lack of family participation in nursing homes despite the offering of family programs. You learn how to overcome barriers to

communication and collaboration between staff members and family members and capitalize on the amount of participation that does exist within a nursing home. You also learn how to convey to families that they are equally responsible for the well-being of their resident and that their input and assistance are necessary to correct problems that cannot be remedied by staff members alone. Finally, *How to Get Families More Involved in the Nursing Home* demonstrates that workshops, social gatherings, and councils do contribute to the formation of a community where family members and staffers find the mutual support necessary to provide excellent health care and soften the institutional atmosphere.

When Innovation is considered one of the key drivers of corporate success, why do organisations struggle to implement it? Research suggests that innovations fail due to a lack of acceptance by employees; therefore an

understanding of potential adopters and the factors influencing their decisions is essential. Despite much research on adoption of innovation by an organization, very little is known about its acceptance by individuals within it. Managing Innovation Adoption is about managing technological innovation implementation at work in an effective way by presenting a new theoretical framework. Based on the theory of reasoned action (TRA), the technology acceptance model (TAM) and other conceptual frameworks, Dr Talukder's enhanced model combines factors from existing and original models to create a coherent new model. The data collected proves that it can be used to assist a broader understanding of how people in an organization adopt and use

innovations. As well as contributing to academic knowledge, the author's discoveries have practical implications for organizations, managers, administrators and employees.

Letitia Balderige's New Complete Guide to Executive Manners St. Martin's Press

On a warm September night in 2002, former acquaintances Alexis Maybank and Alexandra Wilkis reconnected at a

mixer for new students at Harvard Business School. Alexis had just ended a four-year run at eBay during the dotcom boom and bust. Alexandra had just spent three years as an investment banker at Merrill Lynch. Now they were entering the country's top training ground for future titans of Wall Street and the Fortune 500. Little did either suspect that five years later, they'd become famous not in finance or consulting or corporate management, but at the bleeding-edge intersection of fashion and technology. Gilt Groupe - launched by Alexis, Alexandra, and three colleagues in 2007 - is one of the most fascinating startups of recent years, with a valuation of more than \$1 billion. And it all began with one bold idea: to bring sample sales online and change the way

millions shop. As Alexis and Alexandra write about the day Gilt.com went live: "We had created a website that could potentially change the rules of retail, for both shoppers and brands. If shopping was traditionally a slow, leisurely activity that might consume an entire day, it would now be competitive, addictive, urgent, thrilling—a rush delivered at the same time each day. Shopping would become not just easier, but so much fun." But turning that vision into reality wasn't easy. Designers had long controlled their own sample sales by staging them in anonymous, makeshift locations and strictly limiting invitations. Those lucky enough to hear about a Marc Jacobs or Hermès sample sale would drop everything and run for dramatic, fleeting bargains. Why should

elite brands support a new startup trying to replicate the experience online? And even if brands like Valentino, Christian Louboutin, and Zac Posen got on board, would shoppers embrace such a website? Would the kind of people who love high-end fashion really visit a new online sale each day? Was “accessible luxury” a breakthrough idea or an absurd oxymoron? Alexis and Alexandra share their perspective in this dramatic story of Gilt’s birth, rise, and evolution. They show how they juggled the conflicting needs of their suppliers, engineers, marketers, and potential investors. They explain how they blended their individual strengths and weaknesses and managed their rapidly growing team. They cover the growing pains of expanding into new categories

like housewares, travel, and menswear. And they take us through the darkest moments of the recession when Gilt might easily have died. As you’ll learn from the true story of Gilt, anything is possible for those with the creativity to recognize a new opportunity and the perseverance to make it real.
