When the famous
anthropologist Claude
Lévi-Strauss arrived in Rio
de Janeiro, he had one
book in his pocket: Jean
de Léry's History of a
Voyage to the Land of
Brazil. Léry had
undertaken his fascinating
and arduous voyage in
1556, as a youthful
member of the first

Protestant mission to the
New World. Janet Whatley
presents the first
complete English
translation of one of the
most vivid early European
accounts of life in the New
World.
Christianity and Missions,
1450-1800 John
Benjamins Publishing
This book focuses on
anthropological questions
and methods, and is
offered as a supplement
to textbooks on the
anthropology of religion. It
is designed to help
students collecting and
interpreting their own
fieldwork or archival data
and relating their findings
to the work of others.

*Lessons from
Documented Endangered
Languages* Cambridge
University Press
The volume is highly
relevant to the current
regional and international
discussion on endangered
languages, language
contact, documentation
and areal typology. The
publication is the outcome
of a fruitful theoretical
and methodological
exchange between Latin

American scholars and international scholars working in other regions. Most of the papers target Latin American languages. Additionally, new insight into the contact situations in Indonesia, Iran, Australia and Papua New Guinea is provided.

Lingüística Misionera

Peeters Publishers

Recent scholarship has confirmed earlier observations that nominalization plays a crucial role in the formation of complex constructions in the world's languages.

Grammatical nominalizations are one of the most salient and widespread features of languages of the Americas, yet they have not been approached as foundational grammatical structures for constructions such as relative clauses and complement clauses. This is due to an imbalance in past scholarship, which has tended to focus on these constructions at the expense of the nominalization structures underlying them. The papers in this collection treat grammatical nominalizations in their own right, and as a starting point for the investigation of their uses in complex grammatical

structures. A representative sample of Amerindian languages, with focus on South America, examines properties of grammatical nominalizations such as their multiple functions, their internal and external syntax, and their diachronic development. Among the far-reaching theoretical conclusions reached by the studies in this volume is that the various types of relative clauses recognized in the typological literature are actually no more than epiphenomena arising from the different uses of grammatical nominalizations.

The Amazonian

Languages

John Benjamins Publishing

The Araweté are one of the few Amazonian peoples who have maintained their cultural integrity in the face of the destructive forces of European imperialism. In this landmark study, anthropologist Eduardo Viveiros de Castro explains this phenomenon in terms of Araweté social cosmology and ritual order. His analysis of the social and religious life of the Araweté—a Tupi-Guarani people of Eastern Amazonia—focuses on their concepts of personhood, death, and

divinity. Building upon ethnographic description and interpretation, Viveiros de Castro addresses the central aspect of the Araweté's concept of divinity—consumption—showing how its cannibalistic expression differs radically from traditional representations of other Amazonian societies. He situates the Araweté in contemporary anthropology as a people whose vision of the world is complex, tragic, and dynamic, and whose society commands our attention for its extraordinary openness to exteriority and transformation. For the Araweté the person is always in transition, an outlook expressed in the mythology of their gods, whose cannibalistic ways they imitate. From the Enemy's Point of View argues that current concepts of society as a discrete, bounded entity which maintains a difference between "interior" and "exterior" are wholly inappropriate in this and in many other Amazonian societies. *With Broadax and Firebrand* New Haven, Human Relations Area Files
Maternal and Child Health (MCH) continues to be one

of the most important fields of study for improving the health of populations across the globe. Two the 10 Millennium Development Goals strive specifically to improve maternal and child health, and several others, such as gender equality and HIV/AIDS, are critical aspects of Maternal and Child Health. Written for students in public health, medical, and allied health professions, *Global Case Studies in Maternal and Child Health* brings to life theoretical and conceptual ideas discussed in primary texts, through the analysis of lived stories of maternal and child health programs around the world. Using structured case studies of community-based programs in maternal and child health from around the world, students will be presented with real-life ethical, practical and theoretical challenges that will develop critical and analytical thinking skills and also provide them with practice models that they can use in their future or present work.

From the Enemy's Point of View University of Chicago Press
The Amazon Basin is

arguably both one of the least-known and the most complex linguistic regions in the world. It is the home of some 300 languages belonging to around twenty language families, plus more than a dozen genetic isolates, and many of these languages (often incompletely documented and mostly endangered) show properties that constitute exceptions to received ideas about linguistic universals. This book provides an overview in a single volume of this rich and exciting linguistic area. The editors and contributors have sought to make their descriptions as clear and accessible as possible, in order to provide a basis for further research on the structural characteristics of Amazonian languages and their genetic and areal relationships, as well as a point of entry to important cross-linguistic data for the wider constituency of theoretical linguists.

Catalog of the Latin American Library of the Tulane University Library, New Orleans
Routledge

Perhaps the contributions of South American archaeology to the larger field of world archaeology

have been inadequately recognized. If so, this is probably because there have been relatively few archaeologists working in South America outside of Peru and recent advances in knowledge in other parts of the continent are only beginning to enter larger archaeological discourse. Many ideas of and about South American archaeology held by scholars from outside the area are going to change irrevocably with the appearance of the present volume. Not only does the *Handbook of South American Archaeology (HSAA)* provide immense and broad information about ancient South America, the volume also showcases the contributions made by South Americans to social theory. Moreover, one of the merits of this volume is that about half the authors (30) are South Americans, and the bibliographies in their chapters will be especially useful guides to Spanish and Portuguese literature as well as to the latest research. It is inevitable that the HSAA will be compared with the multi-volume *Handbook of South American Indians (HSAI)*, with its detailed descriptions of indigenous

peoples of South America, that was organized and edited by Julian Steward. Although there are heroic archaeological essays in the HSAI, by the likes of Junius Bird, Gordon Willey, John Rowe, and John Murra, Steward states frankly in his introduction to Volume Two that "archaeology is included by way of background" to the ethnographic chapters.

The Circle of the Sciences: Organic nature

John Benjamins Publishing Company "An unprecedented historical account of the destruction of Brazil's Atlantic Forest, a required reading for those committed to its preservation, written with genuine love and knowledge."—José Roberto Borges, Brazil Program Director, Rainforest Action Network "After reading this volume, no one could fail to realize the uniqueness and importance of these coastal forests, which have played such a fascinating role in the history of

Brazil."—Ghilleen T. Prance, Director, Royal Botanic Gardens, Kew

Linguistics and Archaeology in the Americas

Routledge This volume represents part of an unprecedented

and still growing effort to advance, coordinate and disseminate the scientific documentation of endangered languages. As the pace of language extinction increases, linguists and native communities are accelerating their efforts to speak, remember, record, analyze and archive as much as possible of our common human heritage that is linguistic diversity. The window of opportunity for documentation is narrower than the actual lifetime of a language, and is now rapidly closing for many languages represented in this volume. The authors of these papers unveil newly collected data from previously poorly known and endangered languages. They organize highly complex linguistic facts - paradigms, affixes, vowel patterns - while pointing out the theoretically challenging aspects of these. Beyond this, they reflect on the social and human dimensions, discussing particular problems of nostalgia and modernity, memory and forgetting, and obsolescence and ethics, while viewing language as not merely data on a page but as a living creation in the

minds and mouths of its speakers.

The Indigenous

Languages of South

America: A

Comprehensive Guide is a

thorough guide to the

indigenous languages of

this part of the world.

With more than a third of

the linguistic diversity of

the world (in terms of

language families and

isolates), South American

languages contribute new

findings in most areas of

linguistics. Though

formerly one of the

linguistically least known

areas of the world,

extensive descriptive and

historical linguistic

research in recent years

has expanded knowledge

greatly. These advances

are represented in this

volume in indepth

treatments by the

foremost scholars in the

field, with chapters on the

history of investigation,

language classification,

language endangerment,

language contact,

typology, phonology and

phonetics, and on major

language families and

regions of South America.

Across The Boundaries Of

Belief Jones & Bartlett Publishers
Lexical acculturation refers to the accommodation of languages to new objects and concepts encountered as the result of culture contact. This unique study analyzes a survey of words for 77 items of European culture (e.g. chicken, horse, apple, rice, scissors, soap, and Saturday) in the vocabularies of 292 Amerindian languages and dialects spoken from the Arctic Circle to Tierra del Fuego. The first book ever to undertake such a large and systematic cross-language investigation, Brown's work provides fresh insights into general processes of lexical change and development, including those involving language universals and diffusion.

The Varieties of the Human Species Oxford University Press
South American Indian Languages are a particularly rich field for comparative study, and this book brings together some of the finest scholarship now being done in that area.

Language Contact and Documentation / Contacto lingüístico y documentación University

of Texas Press
The theme of this volume is the transformation of European Christianity into a world-wide religion. The spirit of crusade against Islam was one impulse driving the early expansion; these essays show how new ideologies of mission were developed and how perceptions have continued to evolve, notably in the light of Vatican II. They reveal the differing attitudes and roles of missionaries in such radically different environments as America and China, and the equally varied ways in which this activity was received, with the many problems of accommodation and syncretism. Topics covered include the development of new institutions to control missionary activity, notably the Roman Propaganda Fidei, tensions around race and the role of women, and the stimulus given, for instance to linguistic studies, by the need to communicate. Finally, they examine the belated awakening of the Protestant churches to the need to compete with Rome in the evangelization of the world.
Handbook of South

American Archaeology
Walter de Gruyter
Avec ce recueil qui reunit dix-huit contributions, nous poursuivons la quête collective entreprise dans le volume L'enonciation mediatisee ou, pour eviter toute confusion conceptuelle et terminologique, une distinction avait ete introduite entre mediatif et enonciation mediatisee. Rappelons que, selon cette distinction, le terme de mediatif designe une categorie grammaticale qui, fondee sur des oppositions formelles au sein du systeme grammatical d'une langue, permet a l'enonciateur de presenter des situations (...) dont il n'assume pas la responsabilite pour en avoir eu connaissance par voie indirecte, d'ou la possibilite pour lui de manifester divers degres de distance par rapport au contenu de son propre message (Guentcheva 1996: 11). Notons que le mediatif exclut de son champ semantique tout fait presente comme un constat ou lie a la perception visuelle, que les degres de distance que l'enonciateur manifeste a l'egard du contenu propositionnel du message transmis, laissent l'enonce en

dehors de toute assignation en vrai ou en faux (ibid.) et qu'il ne relève pas de la modalité épistémique. En revanche, l'énonciation médiatisée n'implique pas nécessairement de procédés grammaticalisés qui s'organisent en un système cohérent au sein de la langue, bien que, dans un contexte particulier, une forme verbale puisse recevoir une valeur médiative ou qu'un élément syntaxique comme certains adverbes ou expressions adverbiales puisse conduire à une interprétation médiative de la phrase. Rappelons également que les contributions au recueil en question attestaient de la complexité du phénomène médiatif, de la variété de procédés morphosyntaxiques et lexicaux mis en œuvre dans l'expression de la notion de médiation (ou de médiatisation) et de la

relation complexe que la catégorie du médiatif entretient d'une part avec la valeur de résultativité liée au parfait et d'autre part, avec la modalité épistémique. C'est le questionnement sur cette variété de procédés morphosyntaxiques et sur la pertinence de la notion de médiation ou de médiatisation dans d'autres langues du monde qui est à l'origine de ce second volume.

A description of colloquial Guarani BRILL
This book offers a state of the art overview of current linguistic and archaeological research from the Caribbean and Meso America, through Amazonia and the Andes to Argentina, ranging from historical comparative through descriptive and socio-linguistics to new discoveries in archaeological research.
History of Linguistics 2002

Warfare and Shamanism in Amazonia is an ethnographic study of the Parakanã, a little-known indigenous people of Amazonia, who inhabit the interfluvial region in the state of Pará, Brazil. This book analyzes the relationship between warfare and shamanism in Parakanã society from the late nineteenth century until the end of the twentieth century. Based on the author's extensive fieldwork, the book presents first-hand ethnographic data collected among a generation still deeply involved in conflicts. The result is an innovative work with a broad thematic and comparative scope.
