Statistics Through Applications (STA) is the only text written specifically for high school statistics course. Designed to be read, the book takes a data analysis approach that emphasizes conceptual understanding over computation, while recognizing that some computation is necessary. The focus is on the statistical thinking behind data gathering and interpretation. The high school statistics course is often the first applied math course students take. STA engages students in learning how statisticians contribute to our understanding of the world and helps students to become more discerning consumers of the statistics they encounter in ads, economic reports, political campaigns, and elsewhere. New and improved! STA 2e features expanded coverage of probability, a reorganized presentation of data analysis, a new color design and much more. Please see the posted sample chapter or request a copy today to see for yourself.

Beware of what lurks in the corn. Fairies don't exist. At least that's what Thomas Cavanaugh's parents say. But the events of that one night, when he follows a fairy into the cornfield on his parents' farm, prove them wrong. What seems like a destructive explosion was, Thomas knows, an encounter with Dauðr, a force that threatens to destroy the fairy's world and his sanity. Years later, after a

troubled childhood and a series of dead-end jobs, he is still haunted by what he saw that night. One day he crosses paths with a beautiful young woman and a troubled young man, soon realizing that he first met them as a kid while under psychiatric care after his encounters in the cornfield. Has fate brought them together? Are they meant to join forces to save the fairy's world and their own? Or is one of them not who they claim to be?
