Used alongside the students' text, Engineering A Level, this pack offers a complete suite of teaching resource material and photocopiable handouts for the compulsory AS and A2 units of the 2005 GCE Engineering syllabus from

Edexcel. Coverage is given to the three units required at AS Level, and the 3 additional A2 units required for completion of the A Level award. Mike Tooley provides the essential resources needed by busy teachers and lecturers, as well as a bank of student-centred practical work and revision material, that will enable students to gain the skills, knowledge and understanding they require. Also available in electronic form for adopters upon request, this pack will save teachers and course teams many hours' work preparing handouts and assignments, and is freely photocopyable within the purchasing institution. The pack includes: * Exercises to support and develop work in the accompanying student text * Planned projects which will enable students to display a wide range of skills and use their own initiative * Assessment materials * Reference material for use as hand-outs * Background on running the new Engineering A Level * Teachers' notes supporting activities in the students' book * Additional web-based resources for lecturers available on a companion website. Mike Tooley is formerly Vice Principal and Head of Faculty of Engineering at Brooklands College, Surrey, and is the author of many best-selling engineering and electronics books. *Addressing Special Educational Needs and Disability in the Curriculum: Science* Heinemann

Edexcel International GCSE (9-1) Chemistry Student Book (Edexcel International GCSE (9-1)) Pearson Higher Ed

The SEND Code of Practice (2015) reinforced the requirement that all teachers must meet the needs of all learners. This topical book provides practical, tried and tested strategies and resources that will support teachers in making science lessons accessible and exciting for all pupils, including those with special needs. The author draws on a wealth of experience to share her understanding of special educational needs and disabilities and show how science teachers can reduce or remove any barriers to learning. Offering strategies that are specific to the context of science teaching, this book will enable teachers to: help all students develop their 'evidence-gathering' skills and aid their scientific discovery by involving the use of all of the senses and structuring tasks appropriately; create a supportive environment that maximises learning opportunities; plan the classroom layout and display to enhance learning; use technology to adapt lessons to the needs of individual pupils; successfully train and fully use the support of their teaching assistants. An invaluable tool for continuing professional development, this text will be essential for teachers (and their teaching assistants) seeking guidance specific to teaching science to all pupils, regardless of their individual needs. This book will also be of interest to SENCOs, senior management teams and ITT providers. In addition to free online resources, a range of appendices provide science teachers with a variety of writing frames and activity sheets to support effective teaching. This is an essential tool for science teachers and teaching

assistants, and will help to deliver successful, inclusive lessons for all pupils. *International GCSE Double Award Science Mapping Document UG030983* Heinemann

Nelson Modular Science Heinemann
This book aims to cover all the GCSE Physics material needed to meet the specifications of the examining boards Edexcel, AQA, WJEC and OCR (both 21st Century Science and Gateway) both for single and double awards. The content also covers the additional topics necessary for the Physics GCSE single award. It is the third book in the series following 'Biology at a Glance' and 'Chemistry at a Glance' and it encourages learners to use a mind mapping approach to revision. Just like the other books in the series, each page contains clear annotated illustrations that will help the reader to assimilate the facts quickly and commit them to memory. The book covers force and energy, energy and its transfer (including waves, electrical and thermal energy), electromagnetism and radioactivity. It goes on to describe a wide range of the practical applications of physics and concludes with material on our place in the universe. To comply with the latest GCSE specifications, 'How Science Works' permeates all aspects of the book which also provides questions on all the topics covered, to reinforce skills and understanding.
