CB Primedia Business Directories & Books Popular Science gives our readers the information and tools to improve their technology and their world. The core belief

that Popular Science and our readers share: The future is going to be better, and science and technology are the driving forces that will help make it better. *Popular Mechanics* Springer From the host of the YouTube channel that went viral—Dad, How

Do I?—comes a book that's part memoir/part inspiration/part DIY. Rob Kenney's father left him and his seven siblings when he was fourteen years old, and the youngest had to fend for themselves. He wished that he had someone who could teach him the basics—how to tie a tie, jump-start a car, unclog a drain, use tools properly—as well as succeed in life. But he and his siblings had to figure these things out on their own. Now a father himself, Rob decided that he would help people out by providing how-to tips as well as advice—and even throw in some bad dad jokes. He started a YouTube channel for anyone looking for fatherly advice, and in the course of three

months, gained a following of nearly 2.5 million subscribers, with millions of views for his how-to and inspirational videos. In this book, Rob shares his story of overcoming a difficult childhood with the strength of faith and family, and offers inspiration and hope. In addition, he provides 50 practical DIY instructions (30 of which will be unique to the book), illustrated with helpful line drawings.

Routledge
Sustainable
landscaping involves a set of practices implemented by landscape practitioners to help solve environmental concerns. Continuing in the tradition of its predecessor, the second edition of

Sustainable Landscaping: Principles and Practices examines underlying landscaping issues that adversely affect the environment and illustrates alternative methods that result in positive outcomes. This textbook examines all phases of landscaping in both residential and commercial environments, from design to construction and implementation to maintenance. Firmly anchoring landscaping practices in the context of sustainability, this book explores topics including choosing appropriate plants and using plants for specific effects, such as shading, water quality and quantity, soil health and optimal preservation techniques, pesticide usage and its inherent

dangers, energy consumption, and resource management and waste reduction. Sustainable Landscaping also provides a thorough grounding in pertinent issues and terminology for each topic, followed by practical solutions applied by landscape professionals. Each chapter includes learning objectives and case studies of actual sustainable landscape activities. Contains updated government statistics and data, graphs, tables, and color photographs throughout. Provides background information and sustainable solutions for students, homeowners, and landscaping professionals to effectively design and manage landscapes.

Author Dr. Marietta Loehrlein is a Professor Emeritus of Horticulture and Landscaping at Western Illinois University in Macomb, IL, USA. While there, she developed a new course, "Sustainable Landscaping," and wrote the first edition of this textbook, which was also the first of its kind to address the subject.
