Take a bite into the fascinating history of peanut butter and the man who invented it. Through leveled text and engaging photos, kids meet George Washington Carver and learn about his important work with peanuts and other plants. This level 1 reader is carefully leveled for an early independent reading or read aloud experience, perfect to encourage the scientists and explorers of tomorrow!
George Washington Carver Albert Whitman & Company
Introducing Smart About Scientists! These books feature fascinating biographical information about the world's greatest scientists, ideas on scientific thinking, and real science experiments kids can try at home. Annie Marcus is just nuts about peanut butter! When Annie finds out that George Washington Carver was responsible for the popularity of peanuts, she picks him for her scientist report. Annie learns all sorts of fascinating info-George Washington Carver was born into slavery, but his dedication and unquenchable thirst for knowledge drove him to become a professor at a time when most institutions of higher learning were closed to blacks. This title explores Carver's brilliant career and discoveries, as well as his triumph over segregation to become one of the world's most renowned plant experts. Illustrated by Jill Weber.
From Captivity to Fame Millbrook Press
George Washington Carver spent his life asking questions and looking for the answers. He gained a reputation as the farmers' best friend: He taught farmers about crop rotation—telling them to grow peanuts and sweet potatoes to "rest" their soil between cotton crops. And what could they do with all those peanuts? Carver developed more than three hundred peanut-based products—from milk to printers' ink—and more than a hundred ways to use sweet potatoes. Barbara

Kramer selects the correct anecdotes and quotes to bring "The Peanut Man" to life.

George Washington Carver: World-Famous Botanist and Agricultural Inventor Scholastic Inc.

A biography of the man, born a slave, who became a scientist and devoted his entire life to helping the South improve its agriculture.

Carver Capstone

Relates the scientific efforts of George Washington Carver, especially his production of more than 300 uses for the peanut.

George Washington Carver Capstone

This title is a brief, yet informative, biography on George Washington Carver. Readers will learn about Carver's early life, personal life, and all about his contributions to science, farming, and botany. Aligned to Common Core Standards and correlated to state standards. Core Library is an imprint of Abdo Publishing, a division of ABDO.

[The Story of George Washington Carver](#) Amerisearch, Inc.

"The further we go the bigger it gets and the more interesting. I don't know what we would have done without you." So wrote Bob Barry, a White executive with the Tom Huston Peanut Company, to George Washington Carver, the shy, unassuming scientific genius of Tuskegee Institute. The two, along with Grady Porter and Tom Huston himself, embarked on a quest to grow the peanut industry in the South by understanding and solving the problems faced by farmers. From 1924 until the end of Carver's life, these four men, three White and one Black, sustained a professional partnership and a personal friendship built on mutual admiration, respect, trust, and purpose. Their work attracted the attention and support of university and government scientists around the country as well as agricultural industry professionals and their most important audience, farmers in the Southeast. Their effort laid the foundation for research to support the fledgling peanut industry, which became one of the region's most important cash crops, with a farm value totaling over \$1 billion in 2020.

More Than Peanuts follows the journey of these four men, through the letters they wrote to each other and to others who joined them on the way. The letters document a fascinating early example of cooperation between farmers, private business, university researchers, and government policymakers to grow a prosperous industry. Even more importantly, they are eloquent testimony to a lasting interracial friendship in the segregated South—so much more than peanuts.

More Than Peanuts Enslow Publishing, LLC

George Washington Carver (ca. 1864-1943) is at once one of the most familiar and misunderstood figures in American history. In *My Work Is That of Conservation*, Mark D. Hersey reveals the life and work of this fascinating man who is widely--and reductively--known as the African American scientist who developed a wide variety of uses for the peanut. Carver had a truly prolific career dedicated to studying the ways in which people ought to interact with the natural world, yet much of his work has been largely forgotten. Hersey rectifies this by tracing the evolution of Carver's agricultural and environmental thought starting with his childhood in Missouri and Kansas and his education at the Iowa Agricultural College. Carver's environmental vision came into focus when he moved to the Tuskegee Institute in Macon County, Alabama, where his sensibilities and training collided with the denuded agrosystems, deep poverty, and institutional racism of the Black Belt. It was there that Carver realized his most profound agricultural thinking, as his efforts to improve the lot of the area's poorest farmers forced him to adjust his conception of scientific agriculture. Hersey shows that in the hands of pioneers like Carver, Progressive Era agronomy was actually considerably "greener" than is often thought today. *My Work Is That of Conservation* uses Carver's life story to explore aspects of southern environmental history and to place this important scientist within the early conservation movement.

Creamy and Crunchy University of Georgia Press

George Washington Carver didn't invent peanut butter--but, he did make it popular! In addition, he found more than 300 other uses for peanuts, including candy, soap, and even medicine. His humble roots as an enslaved person didn't stop him from becoming a successful agricultural researcher and teacher, introducing crop rotation to the American South and saving the Southern economy when the boll weevil decimated cotton crops. This volume highlights the invention of peanut products in the context of Carver's extraordinary life for young readers.

George Washington Carver Turtleback

In graphic novel format, tells the life story of plant scientist and inventor George Washington Carver.

Who Was George Washington Carver? The Rosen Publishing Group, Inc

With an emphasis on his early life and the hardships he overcame, this informative biography offers a clear, authentic introduction to one of the country's most important scientists.

A Pocketful of Goobers National Geographic Books

The Wacky Discoveries of George Washington Carver Enslow Publishing, LLC

Meet the inventors and scientists of color who changed the world! Born enslaved during the Civil War in Diamond, Missouri,

George Washington Carver was an agricultural scientist and inventor. He promoted alternative crops to cotton and methods to prevent soil depletion. Among his many accomplishments, he developed more than 300 industrial and commercial products from peanuts. It is time to remember how George Washington Carver's inventions and his contributions changed our society... and our world!

ABOUT THE SERIES: Many inventors and scientists of color have made incredible contributions to our modern life. Each volume in this much-needed new series will be devoted to the life and work of one of these inventors and scientists. With a vivid writing style that will use humor as one of its primary ingredients, and illustrated with a combination of real photos and pictures featuring graphic art, each title in this series will describe how these heroes of diverse backgrounds faced the challenges of their times, and how their inventions and contributions changed our society.

George Washington Carver Boyds Mills Press

The purpose of this book is to record the eminent achievements of a great agricultural chemist, Dr. George Washington Carver, of the Tuskegee Institute; to make known his interesting childhood and youth, his early struggles and later triumphs; and also to accompany him into the great creative stretch of thirty-three years at the Tuskegee Institute, during which time he has accomplished so much for the betterment of mankind. This book shows him deeply plunged into work for which he has always had an indubitable capacity; it reveals the exercise of his unsurpassed ability, his keen reasoning powers, and his 'uncommon' common sense. He is shown at work in his laboratory, reaching out into all regions of science and nature. He is also shown painting flowers, one of his pastime hobbies. Finally, he has emerged triumphantly from countless difficulties, bringing with him hundreds of by-products from the peanut, the sweet potato, the pecan; and also paints, stains and dyes from common clays of the South--the fruits of victorious struggles. The supplementary section of this book is composed of bulletins on food and food subjects etc., issued by Dr. Carver. I should think that a few of them will be of especial value to the house-wife, and also the farmer. While

studying agriculture at Tuskegee, I was brought into somewhat intimate relations with Dr. Carver, and began an acquaintance which has continued to grow. Like all students who come in contact with him, I learned to regard him not only as a kindly and good-natured teacher, but also as one who radiated fatherly love. It occurred to me that some day I should like to put something in book form about his life and his marvelous accomplishments.

National Geographic Readers: George Washington Carver Turtleback

Born into slavery, George Washington Carver became one of the most prestigious scientists of his time. This biography follows Dr. Carver's life from childhood to his days as a teacher and discoverer.

George Washington Carver Capstone

George Washington Carver, one of the most famous scientists in the United States, was an African American born into slavery. He pioneered many developments in plant use, crop rotation, and promoted peanuts as a standard food choice. Readers will be motivated as they discover how much can be accomplished with hard work, ambition, and dedication.

George Washington Carver Perfection Learning
