Gain insight into the unique risk management challenges within the Islamic banking system. *Risk Management for Islamic Banks: Recent Developments from Asia and the Middle East* analyzes risk management strategies in Islamic banking, presented from the perspectives of different banking institutions. Using comprehensive global case studies, the book details the risks involving various banking institutions in Indonesia, Malaysia,

UAE, Bahrain, Pakistan, and Saudi Arabia, pointing out the different management strategies that arise as a result of Islamic banking practices. Readers gain insight into risk management as a comprehensive system, and a process of interlinked continuous cycles that integrate into every business activity within Islamic banks. The unique processes inherent in Islamic banking bring about complex risks not experienced by traditional banks. From Shariah compliance, to equity participation contracts, to complicated sale contracts, Islamic banks face unique market risks. *Risk Management for Islamic Banks* covers the creation of an appropriate risk management environment, as well as a

stage-based implementation strategy that includes risk identification, measurement, mitigation, monitoring, controlling, and reporting. The book begins with a discussion of the philosophy of risk management, then delves deeper into the issue with topics like: Risk management as an integrated system. The history, framework, and process of risk management in Islamic banking. Financing, operational, investment, and market risk. Shariah compliance and associated risk. The book also discusses the future potential and challenges of Islamic banking, and outlines the risk management pathway. As an examination of the wisdom, knowledge, and ideal practice of Islamic banking, Risk

Management for Islamic Banks contains valuable insights for those active in the Islamic market.

Deep, insightful analysis of controversial risk management issues in Islamic banking Mapping the Risks And Risk Management Practices In Islamic Banking is a comprehensive analysis of the current state of risk management practices within the Islamic banking industry, with recommendations for policy makers, bankers, and industry stakeholders. Going beyond the academic, this book presents the opinions and perceptions of industry financiers and bankers, alongside primary information and data collected by Islamic finance professionals to deconstruct and analyze the sector's current risk management practices. You'll get up to date on the latest attitudes and trends, and delve into the current issues surrounding risk management in Islamic banks. With a focus on practical applications, this authoritative guide discusses the unique risks facing Islamic banks, from the perspective of a wide range of practitioners. Risk management is one of the biggest, most controversial issues in Islamic finance, yet it remains under-researched. Many uncertainties

exist for which the answers are still unclear, yet will play a large role in shaping the industry's future. This book digs deep into current ideas and practices to discover what's being done, what needs to be done, and what needs to stop happening to keep the future of Islamic finance strong. Explore both Islamic and traditional attitudes toward risk Examine current Islamic risk management practices Understand the latest industry issues and trends Consider the diverse range of risks unique to the Islamic banking sector Effective risk management in Islamic banking deserves priority attention. Unless the industry develops its own genuine risk management architecture, it cannot achieve its full potential and the viability needed for a more resilient financial system than the debunked Wall Street model. Mapping the Risks and Risk Management Practices in Islamic Banking provides a deep, authoritative analysis of where the industry is today and where it needs to develop.

ÔI read with great interest the current state of Islamic economics and finance as examined by Muhammad Akram Khan, who has given a fresh outlook for the

readers to find out its limitations and to search for its solutions. Khan has read widely in the subject matter, and presented his views with reference to literature and thoughtful and logical arguments. While many may not agree with his arguments or will have a better explanation, I find his arguments at least worthy of examination to strengthen the arguments of those who might oppose him. Although Khan is critical of the subject matter, he is very sympathetic to the greater objectives of Islamic economics and provides his own prescriptions to achieve those objectives.Ô

Đ M. Kabir Hassan, University of New Orleans, US ÔThis is a very thought provoking book coming at a crucial stage in the development of Islamic economics and finance. Although the reader may not agree with some of the conclusions reached, it is clearly a scholarly and extensively researched piece of work; it should be read by all serious students of the subject area. Amongst other things, it throws light on the reasons why the practical implementation of Islamic economics and finance, particularly in relation to the financial system and

financial institutions, has not always conformed to the true theoretical foundations laid down by Islamic scholars. ÷ John Presley, Loughborough University, UK and recipient of Islamic Development Bank Prize in Islamic Finance, 2001÷2002 ÷Islamic economic system is a type of capitalism with a spiritual dimension÷ is a major conclusion of this book. I applaud this insight of Muhammad Akram Khan. The same can be perhaps said of Islamic finance, which, in its hurry to build viable and efficient financial institutions, has ignored the very same need to start with profits-and-risk-sharing principle and no-riba principles to build pricing models to anchor the new sub-discipline. The good news is that, in the course of time to come, Akram's advocacy may be realised since such serious works have already begun. ÷ Mohamed Ariff, University Putra Malaysia and Bond University, Australia ÷Although there are many books on Islamic economics, this critical, but sympathetic, account by Muhammad Akram Khan is worthy of attention. The author has clearly read widely on the subject and appreciates the limitations of much that he has read.

Islamic economics is a work in progress and by focusing on its shortcomings, Khan challenges the assumptions of many working in the field. His discussion of methodology is insightful, and even the prohibition of riba, for many the defining characteristic of Islamic finance, is examined from a fresh perspective. While many will not agree with the analysis and the conclusions, even critics should be able to appreciate the strengths of the arguments made. In summary this is a worthwhile, and in many respects an innovative, survey of the state of Islamic economics and finance. It deserves to be widely read. ÷ Rodney Wilson, Durham University, UK What is Wrong with Islamic Economics? takes an objective look at the state of the art in Islamic economics and finance. It analyses reasons for perceived stagnation and also suggests a way forward. As well as probing various myths, the book presents several innovative ideas and a methodology for developing the subject on new foundations. It also highlights weaknesses in the conventional position on prohibition of interest, which has led Islamic banks devise a series of legal tricks. The author notes how the

original aim of devising a new brand of banking has become less prominent whilst Islamic banks now position themselves more closely to conventional banks. The book also offers insights into how certain traditional thinking has seemingly ignored the egalitarian spirit of the law of zakah and created a scenario where zakah is not able to help the billions of poor people around the globe. This detailed book will appeal to students, professors, researchers, Islamic banks and finance houses, consulting companies, accounting firms, and regulatory bodies. Professional economists, libraries in research and training organizations, as well as anyone with a general interest in the topic will find much to interest them.

Development of emerging countries is often enabled through non-conventional finance. Indeed, the prohibition of interest and some other impediments require understanding conventional finance and Islamic finance, which both seek to be ethical and socially responsible. Thus, comparing and understanding the features of Islamic banking and conventional banking, in a globalized economy, is fundamental. This book explains the features of both conventional and Islamic banking within the current international context. It also provides a comparative view of banking governance, performance and risk-taking of both finance systems. It will be of particular use to practitioners and researchers, as well as to organizations and companies who are interested in conventional and Islamic

banking.

Risk Management for Islamic Banks

Edinburgh University Press
Introduction to Islamic Banking and Finance is a succinct guide to the key characteristics of Islamic banking highlighting how these differ from conventional banking. This detailed book illustrates how Islamic banking is consistent with the Sharia'a, a key element of which is the prohibition on collecting and paying interest. This central religious precept appears to rule out most aspects of modern finance but it does allow money to be used for trading tangible assets and business, which can then generate a profit. Brian Kettell's book looks at all aspects of Islamic banking, including chapters on its creation and evolution through to detailed discussions of the issues involved in the Sharia'a contracts of Murabaha, Mudaraba, Musharaka, Ijara, Istisna'a, and Salam. Islamic insurance (Takaful) is also covered. Finally the book takes a look at Sharia'a law and Sharia'a boards, indicating the roles and responsibilities that come with membership. Islamic banks have been operating in places such as Bahrain, Saudi Arabia, Malaysia and Dubai for some time. Conventional bankers have traditionally

viewed the sector as a small, exotic niche but recent years have seen a dramatic surge in popularity. A number of Western investment banks have started working with Muslim clerics to create new ranges of financial products designed for devout Muslims, a large and growing market. Although estimates of the size of the Islamic finance industry vary greatly, everyone agrees that it is expanding rapidly and this is the perfect book for anyone looking to understand the industry.

This book is the first serious attempt to study the affiliation between the current trend of globalization and the development of Islamic finance. It explores the potential convergence of Islamic and conventional finance as these systems continue their progress in designing and developing better risk-sharing structures and an expanded menu of financial instruments. The authors offer innovative thoughts on the future of Islamic finance in the wake of globalization. References and comparison of the historical financial globalization episode and today's

globalization are made. In addition, it also looks into the legal, institutional, governance, and financial preconditions that must exist for globalization and Islamic finance to succeed.

Under the rule of the current economic order, social injustice is ever-increasing. Issues such as poverty, inhumane working conditions, inadequate wages, social insecurity and an unhealthy labor market continue to persist. Many states are also unable to produce policies capable of resolving these problems. The characteristics of the capitalist system currently render it unable to provide social justice. In fact, on the contrary, the system reinforces these injustices and prevents economic and social welfare from reaching the masses. Many Muslim scholars have analyzed and, indeed, criticized this system for years. This book argues that an alternative and more equitable theoretical and practical economical order can be developed within the framework of Islamic principles. On the other hand, the experiences of societies under the rule of Muslim governments do not always seem to hold great promise for an alternative understanding of social justice. In addition, the behaviors of Muslim individuals within their economic lives are mostly shaped by

the necessities of daily economic conditions rather than by the tenets of Islam that stand with social justice. Until 1990s, studies of Islamic economics made connections between finance and the notion of social justice, but work conducted more recently has neglected this issue. It is therefore evident that the topic of social justice needs to be revisited in a more in-depth manner. Filling an important gap in existing literature, the book uniquely connects social justice and Islamic finance and economics on this topic. Theory, practice and key issues are presented simultaneously throughout this book, which is based on the writings of a number of eminent scholars.

Examines the resilience of Islamic banking during the global financial crisis and lessons for risk management. Do Islamic financial institutions perform better than their conventional counterparts during periods of financial stress? To what extent do systems for managing risk have to be adapted for Islamic financial institutions, given the unique characteristics of their

assets and liabilities and the need for shari'ah compliance? These issues have come to prominence since the global financial crisis of 2007-8 and the subsequent recession, and are addressed in this book. The challenges for Islamic financial institutions are explored in an international post Basel II system where banks are required to have more capital and liquidity. Governance issues are also examined, given their influence on client and investor perceptions and their ultimate implications for institutional stability and sustainability. Offers an in-depth assessment of how Islamic banks weathered the financial crisis and what lessons can be learnt. Asks whether Islamic banks are inherently more stable than conventional banks during periods of economic stress. Examines how Islamic banks manage risk, focusing on liquidity risk and the use of forward contracts to mitigate currency risk. Appraises the work of internal shari'ah audit units and the use of shari'ah reports to reduce non-compliance risks. Features case studies from the Gulf, Malaysia, the UK, Pakistan, Turkey and GCC countries.

This volume aims to discuss the current research, theory, methodology and applications of macroprudential regulation and policy for the Islamic financial industry. Published in cooperation with the Islamic Research and Training Institute (IRTI), this book features contributions from a workshop presented in collaboration with the University College of Bahrain (UCB) in Manama, Bahrain, aimed to bring together experts in Islamic banking and regulation and financial economics. This resulting book sheds light on how macroprudential policy may be implemented in the Islamic financial system, and indicates current challenges and their effects on economic growth, financial stability and monetary regulation. Macroprudential policy is increasingly seen as a way of dealing with the different dimensions of systemic risk. But many central banks, bank supervisors and regulators have limited experience with

macroprudential tools, particularly in the Islamic financial industry. Given the complementarities between monetary policy and financial stability, it appears that central banks would always play an important role in macroprudential policy. But how should macroprudential policy best interact with monetary policy? It is becoming more pressing for the central banks to conduct monetary policy in which its conventional banking system operates

side by side with Islamic banking system. This question has received increasing attention in the research literature but there is much we still need to learn. This is why new insights from research on macroprudential policy – which has gained important impetus in recent years – are so valuable. Featuring contributions on topics such as macroprudential regulation, policy, tools and instruments; governance, systematic risk, monetary policy, and bank leverage, the editors provide a collection

of comprehensive research covering the most important issues on macroprudential policy and regulation for the Islamic financial industry. This volume is expected to be a significant contribution to the literature in the field of Islamic finance and evaluation of public policies to promote the development for Islamic financial industry. It is also served as a key text for students, academics, researchers, policy-makers in the field of Islamic finance.
