While the Moon was once thought to

hold the key to space exploration, in recent decades, the U.S. has largely turned its sights toward Mars and other celestial bodies instead. In *The Value of the Moon*, lunar scientist Paul Spudis argues that the U.S. can and should return to the moon in order to remain a world leader in space utilization and development and a participant in and beneficiary of a new lunar economy. Spudis explores three reasons for returning to the Moon: it is close, it is interesting, and it is useful. The proximity of the Moon not only allows for frequent launches, but also control of any machinery we place there. It is interesting because recorded deep on its surface and in its craters is the preserved history of the moon, the sun, and indeed the entire galaxy. And finally, the moon is useful because it is rich with materials and energy. The moon, Spudis argues, is a logical base for further space exploration and even a possible future home for us all. Throughout his work, Spudis incorporates details about man's fascination with the moon and its place in our shared history. He also explores its religious, cultural, and scientific resonance and assesses its role in the future of spaceflight and our national security and prosperity.

"The world may know Chris Duffin as

'The Mad Scientist of Strength,' but you wouldn't have ever guessed that if you saw the scrawny kid skinning rattlesnakes and chasing dragonflies in the early '80s. The story of his unconventional life will take you from ... tales of murder, trauma, heartbreak, and survival deep in the Pacific Northwest wilderness all the way to an idealization of the self-made man--still flawed, but never broken"--Dust jacket fla

Ari Gold is known for his ruthless approach to deal-making and client relationships that made him one of, if not the, most powerful and sought-after agents in Hollywood until he retired in 2011. In his new book *THE GOLD STANDARD*, Gold will illuminate, for the first time, his unique, effective and, some would say, outrageous philosophies on running a successful business, client management, employee motivation, keeping a happy home life, and other keys to his many successes. Brash, emphatic, instructive and always wise, Gold's book will rival business and leadership bestsellers the world over. In his own words and with his trademark enthusiasm, Gold's tome will be the only book anyone wanting to make something of him or herself will ever need. Ari Gold says: "In my humble opinion, if you want to run a successful

business this is the only book you'll ever have to read. And my humble opinion is never wrong."

Plutarch: Life of Antony Notion Press
From the novel: "Women are inherently superior to men and they, not men, have the sensitivity, humanity, and intelligence to rule the home, the country, and the world. But they must first take charge of the men. It is time for the women to have their harems, their maids, their house-husbands, their slaves; it is absurd that women, who are sexually as well as psychologically superior to men, should be expected to be content with only one man, or with the same one permanently. Women have always recognized the fundamental weaknesses in men, and they have always, through subtle means, tended to dominate men. But this relationship needs to 'come out of the closet' and to be recognized as the natural order of things, an order which has been corrupted, an order which needs to be reaffirmed and reinstated if we are ever to be rid of violence and brutality in society." The characters and events in this highly explicit novel explore the idea of female supremacy and male servitude in both a domestic environment and in a training camp. 51,500 words

The Value of the Moon Microsoft Press

A USA Today Bestseller Inspired by fascinating, true, yet little-known events during World War II, *The Long Flight Home* is a testament to the power of courage in our darkest hours—a moving, masterfully written story of love and sacrifice. It is September 1940—a year into the war—and as German bombs fall on Britain, fears grow of an impending invasion. Enemy fighter planes blacken the sky around the Epping Forest home of Susan Shepherd and her grandfather, Bertie. After losing her parents to influenza as a child, Susan found comfort in raising homing pigeons with Bertie. All her birds are extraordinary to Susan—loyal, intelligent, beautiful—but none more so than Duchess. Hatched from an egg that Susan incubated in a bowl under her grandfather's desk lamp, Duchess shares a special bond with Susan and an unusual curiosity about the human world. Thousands of miles

away in Buxton, Maine, young crop-duster pilot Ollie Evans decides to join Britain's Royal Air Force. His quest brings him to Epping and the National Pigeon Service, where Susan is involved in a new, covert mission to air-drop hundreds of homing pigeons in German-occupied France. Many will not survive. Those that do will bring home crucial information. Soon a friendship between Ollie and Susan deepens, but when his plane is downed behind enemy lines, both know how remote the chances of reunion must be. Yet Duchess will become an unexpected lifeline, relaying messages between Susan and Ollie as war rages on—and proving, at last, that hope is never truly lost. “Hlad adeptly drives home the devastating civilian cost of the war.” —Booklist
