By-Day Astrological Guide for the Year 2011: Libra Penguin
Completely revised and updated, this new edition provides a readable, beautifully illustrated journey through world cultures and the vibrant array of sky mythology, creation stories, models of the universe, temples and skyscrapers that each culture has created to celebrate and respond to the power of the night sky. Sections on the archaeoastronomy of South Asia and South East Asia have been expanded, with original photography and new research on temple alignments in Southern India, and new material describing the astronomical practices of Indonesia, Malaysia and other Southeast

Asian countries. Beautiful photographs of temples in India and Asia have been added, as well as new diagrams explaining the alignment of these structures and the astronomical underpinnings of temples within the Pallava and Chola cultures. From new fieldwork in the Four Corners region of North America, Dr. Penprase has included accounts of Pueblo skywatching and photographs of ceremonial kivas that help elucidate the rich astronomical knowledge of the Pueblo people. The popular "Archaeoastronomy of Skyscrapers" section of the book has been updated as well, with new interpretations of skyscrapers in Indonesia, Taiwan and

China. With the rapid pace of discovery in astronomy and astrophysics, entirely new perspectives are emerging about dark matter, inflation and the future of the universe. *The Power of Stars* puts these discoveries in context and describes how they fit into the modern perspective of cosmology, which has arisen from the universal human response to the sky that has inspired both ancient and modern cultures.

The Harry Potter phenomenon created a surge in reading with a lasting effect on all areas of culture, especially education. Today, teachers across the world are harnessing the power

of the series to teach history, gender studies, chemistry, religion, philosophy, sociology, architecture, Latin, medieval studies, astronomy, SAT skills, and much more. These essays discuss the diverse educational possibilities of J.K. Rowling's books.

Teachers of younger students use Harry and Hermione to encourage kids with disabilities or show girls the power of being brainy scientists. Students are reading fanfiction, splicing video clips, or exploring Rowling's new website, Pottermore. Harry Potter continues to open new doors to learning.

The Encyclopaedia Britannica Penguin
Journal for Star Wisdom
2016 includes articles of interest concerning

star wisdom (Astrosophy), as well as a guide to the correspondences between stellar configurations during the life of Christ and those of today. This guide comprises a complete sidereal ephemeris and aspectarian, geocentric and heliocentric, for each day throughout the year. Published yearly, new editions are available beginning in October or November for the coming new year. According to Rudolf Steiner, every step taken by Christ during his ministry between the baptism in the Jordan and the resurrection was in harmony with—and an expression of—the cosmos. Journal for Star Wisdom is concerned with these

heavenly correspondences during the life of Christ. It is intended to help provide a foundation for cosmic Christianity, the cosmic dimension of Christianity. It is this dimension that has been missing from Christianity in its two-thousand-year history. Readers can begin on this path by contemplating the movements of the Sun, Moon, and planets against the background of the zodiacal constellations (sidereal signs) today in relation to corresponding stellar events during the life of Christ. In this way, the possibility is opened for attuning, in a living way, to the life of Christ in the etheric cosmos. This year's journal begins with an article by Robert Powell

on the relationship between the galactic center and Christ's miracle of the healing of the man born blind, followed by an article by Estelle Isaacson about the life of the man born blind, whose name was Celidonius. She has also written on the "star of Lazarus and reading the starry script." Claudia McLaren Lainson's article "The Towers We Build" relates to the planet Uranus and events of our time against the background of the position of Uranus—in 2016, the same as shortly after Christ's Ascension. She also honors psychologist and astrophysicist William Bento, who died on June 5, 2015, with her "In Memoriam." David Tresemer's article,

written with Robert Schiappacasse, expands on a short contribution from William Bento. Brian Gray's article focuses upon the birth of Jesus—in terms of a stellar imagination—in relation to the three kings on the one hand and the shepherds on the other. Nicholas Kollerstrom contributed "Position of the Ancient Star Zodiac," presenting his research into the original scientific definition of the zodiac. The article "Specters" by Kevin Dann takes a unique approach to "The Fall of the Spirits of Darkness," the subject of David Tresemer's article. The monthly commentaries for 2016 by Claudia McLaren Lainson are supported by monthly astronomical previews
