MASTERING LAW STUDIES AND LAW EXAM TECHNIQUES, 10TH EDITION. Mastering Law Studies and Law Exam Techniques

This innovative handbook provides a comprehensive, and truly global, overview of the main approaches and themes within law and society scholarship or social-legal studies. A one-volume introduction to academic resources and ideas that are relevant for today's debates on issues from reproductive justice to climate justice, food security, water conflicts, artificial intelligence, and global financial transactions, this handbook is divided into two sections. The first, 'Perspectives and Approaches', accessibly explains a variety of frameworks through which the relationship between law and society is addressed and understood, with

emphasis on contemporary perspectives that are relatively new to many socio-legal scholars. Following the book's overall interest in social justice, the entries in this section of the book show how conceptual tools originate in, and help to illuminate, real-world issues. The second and largest section of the book (42 short well-written pieces) presents reflections on topics or areas concerning law, justice, and society that are inherently interdisciplinary and that are relevance to current – but also classical – struggles around justice. Informing readers about the lineage of ideas that are used or could be used today for research and activism, the book attends to the full range of local, national and transnational issues in law and society. The authors were carefully chosen to achieve a diverse and non-Eurocentric view of socio-legal studies. This volume will be invaluable for law students, those in inter-disciplinary programs such as law and society, justice studies and legal studies, and those with interests in law, but based in other social sciences. It will also appeal to general readers interested in questions of justice and rights, including activists and advocates around the world.

*Mastering the Law* Routledge

Understanding legal rules not as determinants of behavior but as points of reference for conduct, this volume considers the ways in which rules are invoked, referred to, interpreted, put forward or blurred. It also asks how both legal practitioners and lay participants conceive of and participate in the construction of facts and rules, and thus, through decisions, defenses, pleas, files, evidence, interviews and documents, actively participate in law's life. With attention to the formulation of notions such as person, evidence, intention,

cause and responsibility in the course of legal practices, *Legal Rules in Practice* provides the outlines of a praxiological anthropology of law – an anthropology that focuses on words, concepts and reasoning as actively used to solve conflicts with the help of legal rules. As such, it will appeal to sociologists, anthropologists and scholars of law with interests in ethnomethodology, rule-based conduct and practical reasoning. *Mastering Law Studies and Law Exam Techniques* CRC Press

*Managing What Must Go Right in High-Risk Operations* CRC Press  
 Amoral, cunning, ruthless, and instructive, this multi-million-copy New York Times bestseller is the definitive manual for anyone interested in gaining, observing, or defending against ultimate control – from the author of *The Laws of Human Nature*. In the book that *People* magazine proclaimed “beguiling” and “fascinating,” Robert Greene and Joost Elffers have distilled three thousand years of the history of power into 48 essential laws by drawing from the philosophies of Machiavelli, Sun Tzu, and Carl Von Clausewitz and also from the lives of figures ranging from Henry Kissinger to P.T. Barnum. Some laws teach the need for prudence (“Law 1: Never Outshine the Master”), others teach the value of confidence (“Law 28: Enter Action with Boldness”), and many recommend absolute self-preservation (“Law 15: Crush Your Enemy Totally”). Every law, though, has one thing in common: an interest in total domination. In a bold and arresting two-color package, *The 48 Laws of Power* is ideal whether your aim is conquest, self-defense, or simply to understand the rules of the game.

### Mastering the Law of Attraction

Routledge

Explores the legal relationships of enslaved people and their descendants during the sixteenth and seventeenth centuries in Spanish America. Atlantic slavery can be overwhelming in its immensity and brutality, as it involved more than 15 million souls forcibly

displaced by European imperialism and consumed in building the global economy. *Mastering the Law: Slavery and Freedom in the Legal Ecology of the Spanish Empire* lays out the deep history of Iberian slavery, explores its role in the Spanish Indies, and shows how Africans and their descendants used and shaped the legal system as they established their place in Iberoamerican society during the seventeenth century. Ricardo Raúl Salazar Rey places the institution of slavery and the people involved with it at the center of the creation story of Latin America. Iberoamerican customs and laws and the institutions that enforced them provided a common language and a forum to resolve disputes for Spanish subjects, including enslaved and freedpeople. The rules through which Iberian conquerors, settlers, and administrators incorporated Africans into the expanding Empire were developed out of the need of a distant crown to find an enforceable consensus. Africans and their mestizo descendants, in turn, used and therefore molded Spanish institutions to serve their interests. Salazar Rey mined extensively the archives of secular and religious courts, which are full of complex disputes, unexpected subversions, and tactical alliances among enslaved people, freedpeople, and the crown. The narrative unfolds around vignettes that show Afroiberians building their lives while facing exploitation and inequality enforced through violence. Salazar Rey deals mostly with cases originating from Cartagena de Indias, a major Atlantic port city that supported the conquest and rule of the Indies. His work recovers the voices and indomitable ingenuity that enslaved people and their descendants displayed when engaging with the Spanish legal ecology. The

social relationships animating the case studies represent the broader African experience in the Americas during the sixteenth and seventeenth centuries.

From the #1 New York Times bestselling author of *The 48 Laws of Power* comes the definitive new book on decoding the behavior of the people around you. Robert Greene is a master guide for millions of readers, distilling ancient wisdom and philosophy into essential texts for seekers of power, understanding and mastery. Now he turns to the most important subject of all - understanding people's drives and motivations, even when they are unconscious of them themselves. We are social animals. Our very lives depend on our relationships with people. Knowing why people do what they do is the most important tool we can possess, without which our other talents can only take us so far. Drawing from the ideas and examples of Pericles, Queen Elizabeth I, Martin Luther King Jr, and many others, Greene teaches us how to detach ourselves from our own emotions and master self-control, how to develop the empathy that leads to insight, how to look behind people's masks, and how to resist conformity to develop your singular sense of purpose. Whether at work, in relationships, or in shaping the world around you, *The Laws of Human Nature* offers brilliant tactics for success, self-improvement, and self-defense.

*Legal Rules in Practice* Routledge  
Examining the relationship between strangers, embodiment and community, *Strange Encounters* challenges the assumptions that the stranger is simply anybody we do not recognize and instead proposes that he or she is socially constructed as somebody we already know. Using feminist and postcolonial theory this book examines the impact of multiculturalism and globalization on embodiment and community whilst considering the ethical and political implication of its critique for post-colonial feminism. A diverse range of texts are analyzed which produce the figure of 'the stranger', showing that it has alternatively been expelled as the origin of danger - such as in neighbourhood watch, or celebrated as the origin of difference - as in multiculturalism. The author argues that both of these standpoints are problematic as they involve 'stranger fetishism'; they assume that the stranger 'has a life of its own'.

**Reading Law** Penguin

This book examines the drivers behind great power security competition in space to determine whether realistic strategic alternatives exist to further militarization. Space is an area of increasing economic and military competition. This book offers an analysis of actions and events indicative of a growing security dilemma in space, which is generating an intensifying arms race between the US, China, and Russia. It explores the dynamics behind a potential future war in space and investigates methods of preventing an arms race from an international relations theory and military-strategy standpoint.

The book is divided into three parts: the first section offers a broad discussion of the applicability of international relations theory to current conditions in space; the second is a direct application of theory to the space environment to determine whether competition or cooperation is the optimal strategic choice; the third section focuses on testing the hypotheses against reality, by analyzing novel alternatives to three major categories of space systems. The volume concludes with a study of the practical limitations of applying a strategy centered on commercialization as a method of defusing the orbital security dilemma. This book will be of interest to students of space power, strategic studies, and international relations.

In 2011, Professor Adrian J Bradbrook retired from a distinguished scholarly career spanning over forty years. During this time, he made a significant contribution to teaching and scholarship not only in property law — specifically to leasehold tenancies law and easements and restrictive covenants — but also to energy law, especially the emerging and growing field of solar energy. This book brings together those people who worked closely with Bradbrook, each an expert in their own right, to honour a career by critically engaging with the contributions Bradbrook made to property and energy law. Each author has chosen a topic that both fits with their own cutting-edge research and explores the related contributions made by Bradbrook. Most unusually, this collection ranges widely across property law, energy law and human rights.

This volume explores the inner-workings of English-medium instruction (EMI) in higher education (HE) at two universities. After an introductory chapter that sets the scene and provides an essential background, there are four empirically based chapters that draw on data collected from a range of sources at two universities in Catalonia. This includes interviews, audio/video recordings of classes, audio logs produced by both lecturers and students, policy documents, students' written work, and student presentation

evaluation rubrics. These chapters examine the following issues: (1) the choice of either English or Catalan as the medium of instruction by students and lecturers; (2) how students display ambivalence towards EMI, as well as a general lack of enthusiasm towards and an ironic distance from 'doing education'; (3) how students resist EMI by contravening its English monolingual norm, using their L1s in the classroom; and finally, (4) how EMI lecturers on occasion act as English language teachers despite their continued claims to the contrary. The book ends with a concluding chapter that draws all of the strands together around key themes. This book is written for scholars interested in issues surrounding EMI in HE in general, as well as those EMI in HE practitioners who have adopted a reflective approach to their professional practice and wish to know more about the ins and outs of EMI in HE from multiple perspectives. It is a useful resource for MA and PhD students on applied linguistics programmes in which the roles and uses of English in HE worldwide are deemed to be important and worthy of attention. Additionally, this will be relevant to courses or modules focusing on language policy, as well as curriculum issues more broadly and language teaching practice more specifically.

This book brings together legal scholars engaging with vulnerability theory to explore the implications and challenges for law of understanding vulnerability as generative, and a source of connection and development. The book is structured into five sections that cover fields of law where there is already significant recourse to the concept of vulnerability.

These sections include a main chapter by a legal theorist who has previously examined the creative potential of vulnerability and responses from scholars working in the same field. This is designed to draw out some of the central debates concerning how vulnerability is conceptualised in law. Several contributors highlight the need to re-focus on some of these more positive aspects of vulnerability in order to counter the way law is being used to mask that condition in order to enable more people to escape the stigma

associated with it. They seek to explore how law might embrace vulnerability, rather than conceal it. The book also includes contributions that seek to bring vulnerability into a non-binary relationship with other core legal concepts, such as autonomy and dignity. Rather than discarding these legal concepts in favour of vulnerability, these contributions highlight how vulnerability can be entwined with relational autonomy and embodied dignity. This book is essential reading for both students studying legal theory and practitioners interested in vulnerability.
