This book traces the evolution of the style of men's dress through a sequence of diagrams accurately scaled down from patterns of actual garments, many of them rare museum specimens. The plates have been selected with the same purpose. Some are photographs of suits for which diagrams have also been given; others, reproduced from paintings and old prints, show the costume complete with its accessories. Quotations from contemporary sources--from diaries, travelers' accounts and tailors' bills--supplement Norah Waugh's text with comments on fashion and lively eyewitness descriptions.

Little Big Stuff

Martingale

Originally published in 1993. The appearance of design and technology in the National Curriculum has offered primary teachers opportunities for imaginative and stimulating work which is directly related to the lives of their pupils. Its sheer scope can,

however, be daunting for the teacher already overloaded with the other demands of the National Curriculum. Tina Jarvis provides some much needed guidance on strategies for including design and technology effectively within the whole curriculum, including the development of co-operative group-work and finding effective ways to assess individuals in group situations. The author also looks at how teachers can tackle subject areas which may be unfamiliar to them, such as systems, environments and economic enterprises.
