GONZALEZ ALBERT

Abraham A. Fraenkel was a world-renowned mathematician in pre-Second World War Germany, whose work on set theory was fundamental to the development of modern mathematics. A friend of Albert Einstein, he knew many of the era's acclaimed mathematicians personally. He moved to Israel (then Palestine under the British Mandate) in the early 1930s. In his autobiography Fraenkel describes his early years growing up as an Orthodox Jew in Germany and his

development as a mathematician at the beginning of the twentieth century. This memoir, originally written in German in the 1960s, has now been translated into English, with an additional chapter covering the period from 1933 until his death in 1965 written by the editor, Jiska Cohen-Mansfield. Fraenkel describes the world of mathematics in Germany in the first half of the twentieth century, its origins and development, the systems influencing it, and its demise. He also paints a unique picture of the complex struggles within the world of Orthodox Jewry in Germany. In his personal life, Fraenkel merged these two worlds during periods of turmoil including the two world wars and the establishment of the state of

Israel. Including a new foreword by Menachem Magidor Foreword to the 1967 German edition by Yehoshua Bar-Hillel *Claims, Changes and Challenges in Translation Studies* Gunter Narr Verlag The three concepts mentioned in the title of this volume imply the contact between two or more literary phenomena; they are based on similarities that are related to a form of 'travelling' and imitation or adaptation of entire texts, genres, forms or contents. Transfer comprises all sorts of 'travelling', with translation as a major instrument of transferring literature across linguistic and cultural barriers. Transfer aims at the process of communication, starting with the source product and its cultural context and then highlighting the

mediation by certain agents and institutions to end up with inclusion in the target culture. Reception lays its focus on the receiving culture, especially on criticism, reading, and interpretation. Translation, therefore, forms a major factor in reception with the general aim of reception studies being to reveal the wide spectrum of interpretations each text offers. Moreover, translations are the prime instrument in the distribution of literature across linguistic and cultural borders; thus, they pave the way for gaining prestige in the world of literature. The thirty-eight papers included in this volume and dedicated to research in this area were previously read at the ICLA conference 2016 in Vienna. They are ample proof that the field remains at the center of interest in Comparative Literature.

Jews and Germans in Eastern Europe

In the first comprehensive feminist critique of autobiography as a genre, Leigh Gilmore incorporates writings that have not up to now been considered part of the autobiographical tradition. Offering subtle and perceptive readings of a wide variety of texts-- from the confessions of medieval mystics to contemporary works by Chicana and lesbian writers-- she identifies an innovative practice of "autobiographics" which covers the entire spectrum of women's self-representation.

It's the night before the feast in the village of Fu"rstenfelde (population: an odd number). The village is asleep. Except for the ferryman—he's dead. And Mrs. Kranz,

the night-blind painter, who wants to depict her village for the first time at night. A bell-ringer and his apprentice want to ring the bells—the only problem is that the bells have gone. A vixen is looking for eggs for her young, and Mr. Schramm is discovering more reasons to quit life than to quit smoking. Someone has opened the doors to the Village Archive, but what drives the sleepless out of their houses is not that which was stolen, but that which has escaped. Old stories, myths, and fairy tales are wandering about the streets with the people. They come together in a novel about a long night, a mosaic of village life, in which the long-established and newcomers, the dead and the living, craftsmen, pensioners, and noble robbers in football shirts bump into each other. They all want to bring something to a close, in this night before the feast.

For many centuries Jews and Germans were economically and culturally of significant importance in East-Central and Eastern Europe. Since both groups had a very similar background of origin (Central Europe) and spoke languages which are

related to each other (German/Yiddish), the question arises to what extent Jews and Germans in Eastern Europe share common historical developments and experiences. This volume aims to explore not only entanglements and interdependences of Jews and Germans in Eastern Europe from the late middle ages to the 20th century, but also comparative aspects of these two communities. Moreover, the perception of Jews as Germans in this region is also discussed in detail.

The study combines theories of myth, popular culture, structuralism and poststructuralism to explain the enormous appeal of »Star Wars« and »Harry Potter«. Although much research already exists on both stories individually, this book is the first to explicitly bring them together in order to explore their set-up and the ways in which their structures help produce ideologies on gender and ethnicity. Hereby, the comparison yields central insights into the workings of modern myth and uncovers structure as integral to the success of the popular genre. It addresses

academic audiences and all those wishing to approach the tales from a fresh angle.

This book, designed for students who have already developed a basic competence in German, aims to broaden and improve their vocabulary by providing detailed information on groups of German words with related meanings. It is invaluable as a guide to finding the right word for the context. In order to enhance understanding of the structure of the German vocabulary, groups of synonyms are organised under German (rather than English) headwords. All entries are accompanied by an example of usage and English glosses and there are two indexes allowing users quickly to locate words in German or English. The book takes full account of register variation, indicating the degree of formal or informal use, and reflects regional usage especially in Austria and Switzerland. It is an essential

reference for intermediate and advanced students as well as teachers and other professional linguists seeking access to the finer nuances of the German language.

Combining history of science and a history of universities with the new imperial history, *Universities in Imperial Austria 1848-1918: A Social History of a*

Multilingual Space by Jan Surman analyzes the practice of scholarly migration and its lasting influence on the intellectual output in the Austrian part of the Habsburg Empire. The Habsburg Empire and its successor states were home to developments that shaped Central Europe's scholarship well into the twentieth century. Universities became centers of both state- and nation-building, as well as of confessional resistance, placing scholars if not in conflict, then certainly at odds with the neutral international orientation of academe. By going beyond national narratives, Surman reveals the Empire as a state with institutions divided by language but united by legislation, practices, and other influences. Such an approach allows readers a better view to how scholars turned gradually away from state-centric discourse to form distinct language communities after 1867; these influences affected scholarship, and by examining the scholarly record, Surman tracks the turn. Drawing on archives in Austria, the Czech Republic, Poland, and Ukraine, Surman analyzes the careers of several thousand scholars from the faculties of

philosophy and medicine of a number of Habsburg universities, thus covering various moments in the history of the Empire for the widest view. Universities in Imperial Austria 1848-1918 focuses on the tension between the political and linguistic spaces scholars occupied and shows that this tension did not lead to a gradual dissolution of the monarchy's academia, but rather to an ongoing development of new strategies to cope with the cultural and linguistic multitude.

Der vorliegende Band umfasst alle für die Klassenstufen 5 und 6 (Realschule und Gymnasium) wichtigen Aufsatzformen: Erzählen, Berichten, Beschreiben, Briefe schreiben. Zu den einzelnen Aufsatzformen gibt es jeweils ausführliche Erklärungen, anschauliche Beispiele und zahlreiche Übungen. Gegenüber den zahlreich vorhandenen Vergleichstiteln, z.B. Duden Lernhilfe "Aufsatz/Erzählen 5. bis 7. Klasse" (BA 11/05) oder Klett "Training Intensiv Deutsch Aufsatz 5./6. Schuljahr" (vgl. in dieser Nr.), fällt in 1. Linie die etwas fantasielosere Gestaltung ins Auge.

Der vorliegende Band weist einen deutlich stärkeren Schulbuchcharakter auf und wirkt dadurch möglicherweise für die Schüler nicht ganz so attraktiv. Inhaltlich bestehen zu den genannten Vergleichstiteln dagegen keine wesentlichen Unterschiede.. Lern und Übungsbuch für das Schreiben von Aufsätzen; mit Lösungen.
