This text aims to bring bioethics and health care squarely into the 21st century. The book shows how environmental decline relates to human health and to health care practices in the US and other industrialized countries.

Human / Canine Behavior Connection University of Chicago Press

A pioneering canine behaviorist draws on cutting-edge research to show that a single, simple trait--the capacity to love--is what makes dogs such perfect companions for humans, and to explain how we can better reciprocate their affection.

The fifty-seven original essays in this book provide a comprehensive overview of the interdisciplinary field of animal cognition. The contributors include cognitive ethologists, behavioral ecologists, experimental and developmental psychologists, behaviorists, philosophers, neuroscientists, computer scientists and modelers, field biologists, and others. The diversity of approaches is both philosophical and methodological, with contributors demonstrating various degrees of acceptance or disdain for such terms as "consciousness" and varying degrees of concern for laboratory experimentation versus naturalistic research. In addition to primates, particularly the nonhuman great apes, the animals discussed include antelopes, bees, dogs, dolphins, earthworms, fish, hyenas, parrots, prairie dogs, rats, ravens, sea lions, snakes, spiders, and squirrels. The topics include (but are not limited to) definitions of cognition, the role of anecdotes in the study of animal cognition, anthropomorphism, attention, perception, learning, memory, thinking, consciousness, intentionality, communication, planning, play, aggression, dominance, predation, recognition, assessment of self and others, social knowledge, empathy, conflict resolution, reproduction, parent-young interactions and caregiving, ecology, evolution, kin selection, and neuroethology.

Scentwork for Horses Penguin

Draws on both personal stories and research to present an in-depth exploration of the practical, medical, and moral issues that trouble pet owners confronted with the decline and death of their companion animals.

How to Be Animal MIT Press

Scientists have long counseled against interpreting animal behavior in terms of human emotions, warning that such anthropomorphizing limits our ability to understand animals as they really are. Yet what are we to make of a female gorilla in a German zoo who spent days mourning the death of her baby? Or a wild female elephant who cared for a younger one after she was injured by a rambunctious teenage male? Or a rat who refused to push a lever for food when he saw that doing so caused another rat to be shocked? Aren't these clear signs that

animals have recognizable emotions and moral intelligence? With Wild Justice Marc Bekoff and Jessica Pierce unequivocally answer yes. Marrying years of behavioral and cognitive research with compelling and moving anecdotes, Bekoff and Pierce reveal that animals exhibit a broad repertoire of moral behaviors, including fairness, empathy, trust, and reciprocity. Underlying these behaviors is a complex and nuanced range of emotions, backed by a high degree of intelligence and surprising behavioral flexibility. Animals, in short, are incredibly adept social beings, relying on rules of conduct to navigate intricate social networks that are essential to their survival. Ultimately, Bekoff and Pierce draw the astonishing conclusion that there is no moral gap between humans and other species: morality is an evolved trait that we unquestionably share with other social mammals. Sure to be controversial, Wild Justice offers not just cutting-edge science, but a provocative call to rethink our relationship with—and our responsibilities toward—our fellow animals.

Scentwork for Horses is the first practical guide on how to implement scentwork into the lives of domesticated horses, enhancing behaviour, welfare, and the human-animal bond. Scentwork is a new discipline in the field for horse and handler, and expert author Rachaël Draaisma arms the reader with a palette of information to enable them to put this technique into action. As well as theoretical background information on the nose of the horse and biomechanics, Draaisma discusses how scentwork improves horses' learning abilities, development, socialisation, and their bond with the handler. Readers will learn how to have their horses explore their environment, participate in scentwork games and follow a footstep track to find a missing person or food bag. Easily accessible for anybody working with horses at any level, scentwork can be done in small areas as well as in larger spaces on various surfaces. Whether veterinarian, behaviourist, trainer, animal-assisted therapist, equine physiotherapist, osteopath, or interested horse owner, this book promises to bring both you and the horse enormous benefits, strengthening the human-animal bond. Rachaël Draaisma has always lived with and had a passion for dogs and horses. In 2002, she decided to make it her profession. Achieving several diplomas, she started to work full time as a trainer and behavioural consultant, first with dogs, later with horses. Her best-selling book Language Signs and Calming Signals of Horses, published by CRC Press in 2017, has been translated into several languages. Another pillar of Draaisma's working life with horses revolves around equine mental stimulation and scentwork, and she has developed an extensive method to undertake scent tracking with horses, a new tool in enriching the human-equine relationship. Draaisma travels throughout Europe and the globe to provide workshops and lectures on calming signals of horses, equine mental stimulation, and scentwork. You can purchase scent bags to aid your scentwork practice at the author's personal website: www.scentworkforhorses.com or www.calmingsignalsofhorses.com

Friendships between humans and non-human animals were once dismissed as sentimental anthropomorphism. After decades of research on the emotional and cognitive capacities of animals, we now recognize human-animal friendships as true reciprocal relationships. Friendships with animals have many of the same characteristics as friendships between humans. Both parties enjoy the shared presence that friendship entails along with the pleasures that come with knowing another being. Both friends develop ways of communicating apart from, or in addition to, spoken language.

A heartfelt guide to compassionate care for animals from a Buddhist perspective, with practical advice for mindfully raising pets and honoring animals. Are you doing all you can for the well-being of your beloved pet? Is your outlook toward wildlife consistent with your loyalty to cats and dogs? Structured around the Six Perfections of Buddhism, this book explores these questions and more, providing heartfelt guidance on how to apply compassion in action to our relationships with animals. In addition to being a practical resource, it encourages advocacy, challenging us to think more profoundly about caring for the creatures—both domestic and wild—with whom we share our world.

A history of the 1119 Battle of the Field of Blood, which decisively halted the momentum gained during the First Crusade and decided the fate of the Crusader states. During the First Crusade, Frankish armies swept across the Middle East, capturing major cities and setting up the Crusader States in the Levant. A sustained Western conquest of the region appeared utterly inevitable. Why, then, did the crusades ultimately fail? To answer this question, historian Nicholas Morton focuses on a period of bitter conflict between the Franks and their Turkish enemies, when both factions were locked in a struggle for supremacy over the city of Aleppo. For the Franks, Aleppo was key to securing dominance over the entire region. For the Turks, this was nothing less than a battle for survival -- without Aleppo they would have little hope of ever repelling the European invaders. This conflict came to a head at the Battle of the Field of Blood in 1199, and the face of the Middle East was forever changed.

The Art of Video Production emphasizes the enduring principles and essential skills of the communication process and the new digital technologies that are necessary to create effective video content. Author Leonard C. Shyles uses a unique approach by explaining how things are done and why things are done rather than just that they are done—it is not about concepts versus skills, but about concepts and skills.

What can we learn from watching animals play? Dogs chase each other and wrestle. Cats pounce and bite. These animals may look like they are fighting, but if you pay close attention—as world-renowned biologist Marc Bekoff does—you can see they are playing and learning the rules of their games. In *Animals at Play*, Bekoff shows us how animals behave when they play, with full-color illustrations showing animals in action and having fun—from squirrels climbing up a tree to polar bears somersaulting in the snow. Bekoff emphasizes how animals communicate, cooperate and learn to play fair and what happens when they break the rules. He uses lively illustrations and simple explanations of what it means when a sea lion swims with kelp in its mouth or when two dogs bow to each other. Bekoff also describes what happens when animals become too aggressive and how they apologize,

forgive and learn to trust one another. This entertaining and informative book will delight every child and show readers how animals—and humans—interact when they are having fun.

Beyond Obedience is a revolutionary new training program for you and your dog from one of our country's foremost animal advocates and holistic practitioners. The idea that your canine companion is a fully emotional being and acutely sensitive to your changing feelings and moods is the foundation of April Frost's original and highly effective training program. One of the most difficult aspects of training your dog is communicating your intentions clearly. Beyond Obedience is the first book that works on the way you communicate with your dog, providing you with the necessary tools to truly understand how your dog's mind works and, therefore, how you can create an effective and mutually satisfying relationship. Drawing on her extensive experiences as an animal behaviorist, Frost teaches you that training your dog should not be a tedious chore limited to exerting physical and psychological control over an animal's drives, but instead an enriching and spiritually fulfilling experience—gratifying for both human and animal. Frost discusses such essential concepts as mutual respect, unconditional love, mental and emotional discipline, and your expectations and priorities. She shows you how the insights gained from working with your dog can have positive, far-ranging effects on many areas of your life. Beyond Obedience revolutionizes dog training by addressing the spiritual, physical, and psychological needs of dogs and people, teaching them to communicate effectively through powerful techniques, including visualization and energy work, and offering them valuable insight into the emotional bonds that enrich the lives of animals and their companions. Guidelines Dogs are born knowing how to bark, bite, dig, chew, chase, jump up on one another, eliminate when they need to, and snarl when they feel threatened. It is a challenge to get a dog to suppress or modify his instincts in order to make human existence more pleasant. If the dog reverts, you need to remember that these acts are not malicious; the dog is simply doing the best he can with information he has been given about living with and behaving in a socially acceptable way toward a totally different species. Dogs can learn whatever you can find a way to teach them, so long as it is within their physical capability to perform. Dogs, like humans, take the path of least resistance; they do only what works well and easily to satisfy their needs and desires. If it is a self-rewarding move, they will repeat and escalate the behavior, whether that behavior is in harmony or conflict with your wishes. Every dog has its own point of motivation, a trigger that will evoke a response and awaken its desire to respond to its human.

Humans are the most inquisitive, emotional, imaginative, aggressive and baffling animals on the planet. But how well do we really know ourselves? How to Be Animal offers a radical take on what it means to be human and argues that at the heart of our psychology is a profound struggle with being animal. Tracing the history of this thinking through to its far-reaching effects on our lives, and drawing on a range of disciplines, Challenger proposes that being an animal is a process, beautiful and unpredictable, and that we have a chance to tell ourselves a new story; to realise that if we matter, so does everything else.

"A near-miraculous, brilliant debut."—George Saunders, Man Booker Prize-winning author of *Lincoln in the Bardo* "In one exquisitely crafted story after the next, Will Mackin maps the surreal psychological terrain of soldiers in a perpetual war."—Phil Klay, National Book Award-winning author of *Redeployment* WINNER OF THE PEN/ROBERT W. BINGHAM PRIZE FOR DEBUT SHORT STORY COLLECTION The eleven stories in Will Mackin's mesmerizing debut collection draw from his many deployments with a special operations task force in Iraq and Afghanistan. They began as notes he jotted on the inside of his forearm in grease pencil and, later, as bullet points on the torn-off flap of an MRE kit. Whenever possible he incorporated those notes into his journals. Years later, he used those journals to write this book. Together, the stories in *Bring Out the Dog* offer a remarkable portrait of the absurdity and poetry that define life in the most elite, clandestine circles of modern warfare. It is a world of intense bonds, ancient credos, and surprising compassion—of success, failure, and their elusive definitions. Moving between settings at home and abroad, in vivid language that reflects the wonder and discontent of war, Mackin draws the reader into a series of surreal, unsettling, and deeply human episodes: In "Crossing the River No Name," a close call suggests that miracles do exist, even if they are in brutally short supply; in "Great Circle Route Westward Through Perpetual Night," the death of the team's beloved dog plunges them into a different kind of grief; in "Kattekoppen," a man struggles to reconcile his commitments as a father and his commitments as a soldier; and in "Baker's Strong Point," a man whose job it is to pull things together struggles with

a loss of control. Told without a trace of false bravado and with a keen, Barry Hannah-like sense of the absurd, *Bring Out the Dog* manages to capture the tragedy and heroism, the degradation and exultation, in the smallest details of war. Praise for *Bring Out the Dog* "Cuts through all the shiny and hyped-up rhetoric of wartime, and aggressively and masterfully draws a picture of the brutal, frightening, and even boring moments of deployment. . . . The Things They Carried, Redeployment, and now *Bring Out the Dog*: war stories for your bookshelf that will last a very long time, and serve as reminders of what America was, is, and can still become."—Chicago Review of Books

Today's therapy dog handlers recognize the need to be teammates with their dogs, not just supervisors. Teaming with one's dog involves unobtrusively providing physical and emotional support as well as respectful guidance in what to do. Being a teammate requires attention to the handler's behavior, not just the dog's. This book reminds all handlers that being conscious of what they do with their dogs increases the effectiveness of therapy visits as well as providing a more rewarding experience for all involved. Written by a nationally famous practitioner with decades of real-world experience, the book introduces the "STEPS of Teamwork" and how those STEPs fit with a Therapy Dog's Bill of Rights. These general principles free handlers to apply them in their own way to their therapy dog's individual personality and work. As the author writes, "The book explores a way of being conscious of what you do with and to your therapy dog to support him in his work. It describes functional principles of behavior you can learn and use immediately, either together as a package or independently." Using an exciting new methodology, the author guides readers to deepen their relationship with their dogs by acting consciously and respectfully.

Morality Play is an ideal supplement for ethics courses, offering a case study approach that is both flexible and practical. It provides three alternative methods of organization for universal teaching approaches: contemporary moral problems, ethical theories, and moral principles. The introduction illustrates how to effectively use case studies in the classroom and provides a short review of the fundamentals of argumentation and critical thinking. Featuring ten new case studies, the latest edition continues to spotlight some of the most controversial, thought-provoking issues in ethics today. Themes such as crime and punishment, life and death, habitat and humanity, liberty and coercion, and value and culture are made relevant through insightful case studies drawn from newspaper accounts, legal opinions, and other factual sources. The cases present discrete problems designed to make readers examine their abstract notions about morality.

"A thoughtful book" about how to ensure that the animals we

love benefit from the relationship as much as we do (Kirkus Reviews). We feel love for our companions, and happiness that we're providing them with a safe, healthy life. But sometimes we also feel guilt. When we see our cats gazing wistfully out the window, or watch a goldfish swim lazy circles in a bowl, we can't help but wonder: Are we doing the right thing, keeping these independent beings locked up, subject to our control? Is keeping pets actually good for the pets themselves? That's the question that animates Jessica Pierce's powerful *Run, Spot, Run*. A bioethicist and a lover of pets herself (including, over the years, dogs, cats, fish, rats, hermit crabs, and more), Pierce explores the ambiguous ethics at the heart of this relationship, and through a mix of personal stories, philosophical reflections, and

scientifically informed analyses of animal behavior and natural history, she puts pet-keeping to the test. Is it ethical to keep pets at all? Are some species more suited to the relationship than others? Are there species one should never attempt to own? And are there ways that we can improve our pets' lives, so that we can be confident that we are giving them as much as they give us? "With gentle humor, clear compelling language, and always in search of the physically and emotionally healthiest lives possible for our animal companions, *Run, Spot, Run* moved me all the more because it's written from the inside looking out. Pierce herself lives with three pets and understands the deep urge so many of us feel to connect across species lines."—Barbara King, author of *How Animals Grieve*
