From the author of the number-one international bestseller *The History of Bees*, a captivating story of the power of nature and the human spirit that

explores the threat of a devastating worldwide drought, witnessed through the lives of a father, a daughter, and a woman who will risk her life to save the future. In 2019, seventy-year-old Signe sets sail alone on a hazardous voyage across the ocean in a sailboat. On board, a cargo that can change lives. Signe is haunted by memories of the love of her life, whom she'll meet again soon. In 2041, David and his young daughter, Lou, flee from a drought-stricken Southern Europe that has been ravaged by thirst and war. Separated from the rest of their family and desperate to find them, they discover an ancient sailboat in a dried-out garden, miles away from the nearest shore. Signe's sailboat.

As David and Lou discover Signe's personal effects, her long ago journey becomes inexorably linked to their own. An evocative tale of the search for love and connection, *The End of the Ocean* is a profoundly moving father daughter story of survival and a clarion call for climate action. This open access book considers a pivotal era in Chinese history from a global perspective.

This book's insight into Chinese and international history offers timely and challenging perspectives on initiatives like "Chinese characteristics", "The New Silk Road" and "One Belt, One Road" in broad historical context. Global History with Chinese Characteristics analyses the feeble state capacity of Qing China questioning the

so-called "High Qing" (shèng qīng 盛清) era's economic prosperity as the political system was set into a "power paradox" or "supremacy dilemma".

This is a new thesis introduced by the author demonstrating that interventionist states entail weak governance. Macao and Marseille as a new case study aims to compare Mediterranean and South China markets to provide new insights into both modern eras' rising trade networks, non-official institutions and interventionist impulses of autocratic states such as China's Qing and Spain's Bourbon empires.

Photography does more than simply represent the world. It acts in the world, connecting people to form relationships and shaping relationships to create communities. In this beautiful book, Margaret Olin explores photography's ability to "touch" us through a series of essays that shed new light on photography's role in the world. Olin investigates the publication of photographs in mass media and literature, the hanging of exhibitions, the posting of photocopied photographs of lost loved ones in public spaces, and the intense photographic activity of tourists at their destinations. She moves from intimate relationships between viewers and

photographs to interactions around larger communities, analyzing how photography affects the way people handle cataclysmic events like 9/11. Along the way, she shows us James VanDerZee's Harlem funeral portraits, dusts off Roland Barthes's family album, takes us into Walker Evans and James Agee's photo-text *Let Us Now Praise Famous Men*, and logs onto online photo albums. With over one hundred illustrations, *Touching Photographs* is an insightful contribution to the theory of photography, visual studies, and art history.

In January 1987, Robert Alan Krakower, a former media producer and

magazine publisher from Canada, had a mystical encounter on the Mediterranean island of Ibiza that lasted eight days and eight nights. During this time he did not eat, drink, or sleep. He received information about our universe, the design of all living forms, and most importantly, about a mutation in the human body that will lead to the emergence of a new species, the Rave, in 2027. With it, the evolutionary program will turn its back on humanity. The Industrial Revolution and the nation states as we know them will come to an end. The coming Rave will look human on the outside, but will have little in common with us. In fact, Raves will appear severely disabled. But

the moment three of them come together they turn into "one being" with a shared consciousness that can do things that are unimaginable to us humans. Krakower was told the universe is an unborn living entity and that life in Earth will come to an end in about 1,200 years when it will be hit by a meteor. There will be no more biological life after Earth. However, this will be the beginning of yet another journey for us through the solar system with the emergence of the Eron. It will not eat or breathe. It will not die. And it will live as long as the universe exists. **Moletown** MIT Press

#1 NEW YORK TIMES BESTSELLER! ONCE UPON A BROKEN HEART marks the launch of a new series from Stephanie Garber about love, curses, and the lengths that people will go to for happily ever after For as long as she can remember, Evangeline Fox has believed in true love and happy endings . . . until she learns that the love of her life will marry another. Desperate to stop the wedding and to heal her wounded heart, Evangeline strikes a deal with the charismatic, but wicked, Prince of

Hearts. In exchange for his help, he asks for three kisses, to be given at the time and place of his choosing. But after Evangeline's first promised kiss, she learns that bargaining with an immortal is a dangerous game — and that the Prince of Hearts wants far more from her than she'd pledged. He has plans for Evangeline, plans that will either end in the greatest happily ever after, or the most exquisite tragedy. *The Time of the Rebels* Oxford University Press, USA
When tragedy strikes Michele Windsor's world, she is forced to uproot her life and move across the country to New York City, to live with the wealthy, aristocratic grandparents she's never met. In their old

Fifth Avenue mansion filled with a century's worth of family secrets, Michele discovers a diary that hurtles her back in time to the year 1910. There, in the midst of the glamorous Gilded Age, Michele meets the young man with striking blue eyes who has haunted her dreams all her life – a man she always wished was real, but never imagined could actually exist. And she finds herself falling for him, into an otherworldly, time-crossed romance. Michele is soon leading a double life, struggling to balance her contemporary high school world with her escapes into the past. But when she stumbles upon a terrible discovery, she is propelled on a race

through history to save the boy she loves – a quest that will determine the fate of both of their lives.

and immigration of Asian workers, and not least for material and non-material transfer between the two Americas. This volume seeks to analyse these manifold transareal circulation processes and to explore New Orleans's potential as a paradigmatic metropolis of the Global South. The focus is on different forms of creolisation as manifested in language, literature and music, but also in everyday phenomena such as Carnival or computer games.

From Mark A. Altman and Edward Gross, the bestselling authors of the definitive two-volume Star Trek oral history, *The Fifty-Year*

Mission, comes the complete, uncensored, unauthorized oral history of *Battlestar Galactica* in *So Say We All*. Four decades after its groundbreaking debut, *Battlestar Galactica*—both the 1978 original and its 2004 reimagining have captured the hearts of two generations of fans. What began as a three-hour made for TV movie inspired by the blockbuster success of *Star Wars* followed by a single season of legendary episodes, was transformed into one of the most critically acclaimed and beloved series in television history. And gathered exclusively in this volume are the incredible untold stories of both shows—as well as the much-maligned *Galactica 1980*. For the

first time ever, you will learn the unbelievable true story of forty years of Battlestar Galactica as told by the teams that created a television legend in the words of over a hundred cast, creators, crew, critics and executives who were there and brought it all to life. Artists and writers portray the disorientation of a world facing climate change. This monumental volume, drawn from a 2020 exhibition at the ZKM Center for Art and Media, portrays the disorientation of life in

world facing climate change. It traces this disorientation to the disconnection between two different definitions of the land on which modernizing humans live: the sovereign nation from which they derive their rights, and another one, hidden, from which they gain their wealth—the land they live on, and the land they live from. Charting the land they will inhabit, they find not a globe, not the iconic “blue marble,” but a series of critical zones—patchy, heterogenous, discontinuous. With short pieces, longer essays, and more than 500 illustrations, the contributors explore the new landscape on which it may be possible for humans to land—what it means to

be “on Earth,” whether the critical zone, the Gaia, or the terrestrial. They consider geopolitical conflicts and tools redesigned for the new “geopolitics of life forms.” The “thought exhibition” described in this book can open a fictional space to explore the new climate regime; the rest of the story is unknown. Contributors include Dipesh Chakrabarty, Pierre Charbonnier, Emanuele Coccia, Vinciane Despret, Jérôme Gaillarde, Donna Haraway, Joseph Leo Koerner, Timothy Lenton, Richard Powers, Simon Schaffer, Isabelle Stengers, Bronislaw Szerszynski, Jan A.  Business travel has become indispensable to the global economy, not only due to its necessity in the maintaining of corporate networks, but also because of the associated economies that cater to the daily requirements of the business traveller. Underlying these developments are concerns over the environmental impact of increasing air travel, which are likely to generate new challenges for the

future of business travel. From a team of international experts comes this analysis of the role, nature and effects of modern business travel. Issues addressed include the relationships between airlines and business travellers, the role of mobility in business,

and the opportunities and challenges created by mobile workforces. The study combines theoretical advances with comprehensive analysis, and will provoke debate across the social sciences on the nature, organization and space of work in the twenty-first century.
