The Red Vintage

The United States goes to war against the queen spiders that threaten to overtake the human race forever in this thrilling and horrifying finale of the “captivating, engaging, and completely terrifying” (My Guilty Obsession) internationally bestselling Hatching series. The world is on the brink of apocalypse. Zero Day has come. The only thing more terrifying than millions of spiders is the realization that those spiders work as one. But among the government, there is dissent: do we try to kill all of the spiders, or do we gamble on Professor Guyer’s theory that we need to kill only the queens? For President Stephanie Pilgrim, it’s an easy answer. She’s gone as far as she can—more than two dozen American cities hit with tactical nukes, the country torn asunder—and the only answer is to believe in Professor Guyer. Unfortunately, Ben Broussard and the military men who follow him don’t agree, and Pilgrim, Guyer, and the loyal members of the government have to flee, leaving the question: what’s more dangerous, the spiders or ourselves?

The Glass Castle Tyndale House Publishers, Inc.

THE FIRST MERCY THOMPSON NOVEL! Moon Called is the novel that introduced Patricia Briggs’s Mercy Thompson to the world and launched a #1 bestselling phenomenon... Mercy Thompson is a shapeshifter, and while she was raised by werewolves, she can never be one of them, especially after the pack ran her off for having a forbidden love affair. So she’s turned her talent for fixing cars into a business and now runs a one-woman mechanic shop in the Tri-Cities area of Washington State. But Mercy’s two worlds are colliding. A half-starved teenage boy arrives at her shop looking for work, only to reveal that he’s a newly changed werewolf—on the run and desperately trying to control his animal instincts. Mercy asks her neighbor Adam Hauptman, the Alpha of the local werewolf pack, for assistance. But Mercy’s act of kindness has unexpected consequences that leave her no choice but to seek help from those she once considered family—the werewolves who abandoned her... “In the increasingly crowded field of kick-ass supernatural heroines, Mercy stands out as one of the best.”—Locus

Room Harry N. Abrams

Why did the US intelligence services fail so spectacularly to know about the Soviet Union's nuclear capabilities following World War II? As Vince Houghton, historian and curator of the International Spy Museum in Washington, DC, shows us, that disastrous failure came just a few years after the Manhattan Project's intelligence team had penetrated the Third Reich and knew every detail of the Nazi 's plan for an atomic bomb. What changed and what went wrong? Houghton's delightful retelling of this fascinating case of American spy ineffectiveness in the then new field of scientific intelligence provides us with a new look at the early years of the Cold War. During that time, scientific intelligence quickly grew to become a significant portion of the CIA budget as it struggled to contend with the incredible advance in weapons and other scientific discoveries immediately after World War II. As Houghton shows, the abilities of the Soviet Union's scientists, its research facilities and laboratories, and its educational system became a key consideration for the CIA in assessing the threat level of its most potent foe. Sadly, for the CIA scientific intelligence was extremely difficult to do well. For when the Soviet Union detonated its first atomic bomb in 1949, no one in the American intelligence services saw it coming.

You Conran Octopus

A plan to destroy America, a hundred years in the making, is about to be unleashed . . . can it be stopped? There is a powerful technique called the Overton Window that can shape our lives, our laws, and our future. It works by manipulating public perception so that ideas previously thought of as radical begin to seem acceptable over time. Move the Window and you change the debate. Change the debate and you change the country. For Noah Gardner, a twentysomething public relations executive, it’s safe to say that political theory is the furthest thing from his mind. Smart, single, handsome, and insulated from the world’s problems by the wealth and power of his father, Noah is far more concerned about the future of his social life than the future of his country. But all of that changes when Noah meets Molly Ross, a woman who is consumed by the knowledge that the America we know is about to be lost forever. She and her group of patriots have vowed to remember the past and fight for the future—but Noah, convinced they’re just misguided conspiracy-theorists, isn’t interested in lending his considerable skills to their cause. And then the world changes. An unprecedented attack on U.S. soil

shakes the country to the core and puts into motion a frightening plan, decades in the making, to transform America and demonize all those who stand in the way. Amidst the chaos, many don’t know the difference between conspiracy theory and conspiracy fact—or, more important, which side to fight for. But for Noah, the choice is clear: Exposing the plan, and revealing the conspirators behind it, is the only way to save both the woman he loves and the individual freedoms he once took for granted. After five back-to-back #1 New York Times bestsellers, national radio and Fox News television host Glenn Beck has delivered a ripped-from-the-headlines thriller that seamlessly weaves together American history, frightening facts about our present condition, and a heart-stopping plot. The Overton Window will educate, enlighten, and, most important, entertain—with twists and revelations no one will see coming.

Zero Day Simon and Schuster

An ex-Soviet KGB agent details his primary mission to work undercover in the United States for over a decade and discusses his change of allegiance and defection from the KGB. --Publisher's description.

Lance Barnes, Post Nuke Dick Vintage

As plague ravages the overcrowded Earth, observed by a ruthless lunar people, Cinder, a gifted mechanic and cyborg, becomes involved with handsome Prince Kai and must uncover secrets about her past in order to protect the world in this futuristic take on the Cinderella story.

The Dawn of a Nazi Moon Simon and Schuster

The Harry Potter series is more than just a story about a young wizard who saves the world from He-Who-Must-Not-Be-Named. The seven-book saga is an excellent primer on spying, intelligence, and politics. Join spy novelist Lynn Boughey and thirty-six-year CIA veteran and executive director of the International Spy Museum Peter Earnest as they review the spy craft employed and celebrated in J.K. Rowling's bestselling books. From the invisibility cloak to house passwords to Fred and George Weasley's Extendable Ears, Harry Potter & the Art of Spying is full of spy lessons for the secret-agent-in-training in the Muggle realm. Learn how to break secret codes, gather intelligence, read character's motives, and why Severus Snape is the best double agent ever.

Moon Called Macmillan

CMH Publication 70-30. Edited by Frank N. Schubert and TheresaL. Kraus. Discusses the United States Army's role in the Persian Gulf War from August 1990 to February 1991. Shows the various strands that came together to produce the army of the 1990s and how that army in turn performed under fire and in the glare of world attention. Retains a sense of immediacy in its approach. Contains maps which were carefully researched and compiled as original documents in their own right. Includes an index.

The Information Bloomsbury Publishing

Kidnapped as a teenage girl, Ma has been locked inside a purpose built room in her captor's garden for seven years. Her five year old son, Jack, has no concept of the world outside and happily exists inside Room with the help of Ma's games and his vivid imagination where objects like Rug, Lamp and TV are his only friends. But for Ma the time has come to escape and face their biggest challenge to date: the world outside Room.

Rats Saw God Penguin

When a gigantic ecological eruption causes dust mites to rapidly reproduce and become flesh-eating insects, paleobiologist Richard Sinclair and a group of survivors must try to stop this deadly phenomenon before the entire world is destroyed. Reprint.

Red Star Rogue Simon and Schuster

"The most shocking fiction I have read in years. What is shocking about it is both the idea and the sheer imaginative brilliance with which Mr. Shute brings it off." THE SAN FRANCISCO CHRONICLE They are the last generation, the innocent victims of an accidental war, living out their last days, making do with what they have, hoping for a miracle. As the deadly rain moves ever closer, the world as we know it winds toward an inevitable end....

Riddley Walker Hachette Books

In a classic work of alternate history, the United States is divided up and ruled by the Axis powers after the defeat of the Allies during World War II. Reissue. Winner of the Hugo Award for Best Novel.

Rocket Ship Galileo Simon and Schuster

A message appears on the moon. It is legible from Earth, and almost no one knows how it was created. Markus West leads the government’s investigation to find the creator. The message is simple and familiar. But those three words, written in blazing crimson letters on the lunar surface, will foster the strangest revolution humankind has ever endured and make Markus West

wish he was never involved. The message is ‘Drink Diet Coke.’

When Coca-Cola denies responsibility, global annoyance with the beverage-industrial complex becomes indignation. And when his investigation confirms Coca-Cola’s innocence, Markus West becomes one of the most hated men on Earth. Later, five miles above the White House, a cylinder is discovered floating in the night. It is 400 feet tall, 250 feet in diameter, and exactly resembles a can of Campbell’s Chicken Noodle Soup. Nearly everyone thinks the cylinder is a promotional stunt gone wrong, just like the lunar advertisement. And this is exactly what the alien in the cylinder wants people to think. Ralph, an eccentric extraterrestrial who’s been hiding on the moon, needs Markus’s help to personally deliver a dark warning to the White House. Ralph has a big heart, a fetish for Andy Warhol, and a dangerous plan to save the world. Looking upon the cylinder, Markus realizes we are not the ones in control. The unexpected guest becomes the host, and somehow humans never belonged: “We are the homeless orphans peeking through the banquet window. We are the frills of the universe gazing upon something unspeakably more central than ourselves.”

Command and Control Moonstone Press

In the tenth book in the New York Times bestselling Spy School series, Ben Ripley races against time and across state lines—by car, train, boat, and plane—to avoid his new cyber enemies and track down Murray Hill. Ben Ripley’s longtime nemesis, Murray Hill, has put a price on Ben’s head and accused him of being at the center of a conspiracy on the internet. Now Ben finds himself in his greatest danger yet, on the run from both assassins and conspiracy theorists. Ben must find Murray before his machinations catch up to Ben—but with so much at stake, even some of Ben’s most trusted friends might not be at the top of their game, leaving Ben to be tested like never before.

The Man in the High Castle Indiana University Press

From the bestselling author of the acclaimed Chaos and Genius comes a thoughtful and provocative exploration of the big ideas of the modern era: information, communication, and information theory. Acclaimed science writer James Gleick presents an eye-opening vision of how our relationship to information has transformed the very nature of human consciousness. A fascinating intellectual journey through the history of communication and information, from the language of Africa’s talking drums to the invention of written alphabets; from the electronic transmission of code to the origins of information theory, into the new information age and the current deluge of news, tweets, images, and blogs. Along the way, Gleick profiles key innovators, including Charles Babbage, Ada Lovelace, Samuel Morse, and Claude Shannon, and reveals how our understanding of information is transforming not only how we look at the world, but how we live. A New York Times Notable Book A Los Angeles Times and Cleveland Plain Dealer Best Book of the Year Winner of the PEN/E. O. Wilson Literary Science Writing Award

The Engines Of God Houghton Mifflin Harcourt

"Mel Goodman has spent the last few decades telling us what's gone wrong with American intelligence and the American military . . . he is also telling us how to save ourselves."--Seymour M. Hersh, The New Yorker "Whistleblower at the CIA offers a fascinating glimpse into the secret, behind-the-scenes world of U.S. intelligence. Melvin A. Goodman's first-person account of the systematic manipulation of intelligence at the CIA underscores why whistleblowing is so important, and why the institutional obstacles to it are so intense. . . . At its core it's an invaluable historical expose, a testimony to integrity and conscience, and a call for the U.S. intelligence community to keep its top leaders in check. Urgent, timely, and deeply recommended."--Daniel Ellsberg "In this fascinating and candid account of his years as a senior CIA analyst, Mel Goodman shows how the worst enemies of high quality intelligence can come from our own midst, and how the politicization of intelligence estimates can cause more damage to American security than its professed enemies. Whistleblower at the CIA is a must-read for anyone interested in the intricate web of intelligence-policy-making relations."--Uri Bar-Joseph, author of The Angel: The Egyptian Spy Who Saved Israel "Mel Goodman shines a critical whistleblower light into the dark recesses of the CIA as a former insider. His book serves in the public interest as a warning and wake-up call for what's at stake and why we cannot trust the CIA or the intelligence establishment to do the right thing."--Thomas Drake, former NSA senior executive and whistleblower "Mel Goodman's Whistleblower at the CIA is not just an insider's look at politics at the highest levels of government. It's also a personal account of the political odyssey Goodman had to negotiate for telling the truth. The CIA likes for its employees to believe that everything is a shade of grey. But some things are black or white, right or wrong. Mel

Goodman did what was right. He may have paid with his career, but he's on the right side of history."—John Kiriakou, former CIA Counterterrorism Officer and former Senior Investigator, Senate Foreign Relations Committee "Mel Goodman's Whistleblower at the CIA confirmed for me what my own experience had revealed during six hectic days and seven sleepless nights at CIA headquarters, getting Colin Powell ready for his presentation to the UN Security Council on Iraq's 'Failure to Disarm' on February 5, 2003. Mr. Goodman provided exhaustive detail on why the agency has failed, again and again, and will continue to fail if some future president and congress do not step in and dramatically change the way CIA functions."—Lawrence Wilkerson, former chief of staff to secretary of state Colin Powell "A refreshingly honest, well-sourced expose of the CIA that not only furnishes the author's compelling personal story of standing up to inflated estimates sprinkled with little-known but historically significant details of the jewels and the warts, the successes and failures of decades of U.S. intelligence analysis. Especially instructive to our current era plagued by faulty group-think and the 'war on whistleblowers,' the book chronicles how 'contrarian' analysts are often 'the best source for premonitory intelligence.' This book is a must-read not only for political historians and American citizens wanting to know the unvarnished and often surprising truth about the intelligence side of the CIA but for all students contemplating a career with the CIA or other intelligence agency."—Coleen Rowley, retired FBI agent "A former CIA analyst (1966-1990) deplores what he argues is the increasing deleterious politicization of the agency. In his latest book, Goodman—who has taught at the National War College, held other intelligence-related positions, and written earlier accounts of what he sees as a very troubled agency—thoroughly rages against the corruption he has viewed in the highest ranks of the

CIA."—Kirkus Reviews "Goodman, a former CIA analyst who served from the Johnson administration through the first Reagan administration, exposes the disconcerting politicization of intelligence at America's best-known international intelligence-gathering agency."—Publishers Weekly Melvin Goodman's long career as a respected intelligence analyst at the CIA, specializing in US/Soviet relations, ended abruptly. In 1990, after twenty-four years of service, Goodman resigned when he could no longer tolerate the corruption he witnessed at the highest levels of the Agency. In 1991 he went public, blowing the whistle on top-level officials and leading the opposition against the appointment of Robert Gates as CIA director. In the widely covered Senate hearings, Goodman charged that Gates and others had subverted "the process and the ethics of intelligence" by deliberately misinforming the White House about major world events and covert operations. In this breathtaking expose, Goodman tells the whole story. Retracing his career with the Central Intelligence Agency, he presents a rare insider's account of the inner workings of America's intelligence community, and the corruption, intimidation, and misinformation that lead to disastrous foreign interventions. An invaluable and historic look into one of the most secretive and influential agencies of US government--and a wake-up call for the need to reform its practices. Melvin A. Goodman served as a senior analyst and Division Chief at the CIA from 1966 to 1990. His writing has appeared in the New York Times, Washington Post, Harper's, and many others. He is author of six books on US intelligence and international security.

On the Beach Vintage

The creator of the incredibly popular webcomic xkcd presents his heavily researched answers to his fans' oddest questions, including "What if I took a swim in a spent-nuclear-fuel pool?" and "Could you build a jetpack using downward-firing machine guns?"

100,000 first printing.

Elegy Beach Penguin

From the four-time winner of the Hugo Award and the recipient of the Grand Master Nebula Award for Lifetime Achievement comes this classic story--first published in 1947--about pioneers at the dawn of space exploration.

The Precipice Government Printing Office

"Madam President. The nuclear bombs just detonated in China, Russia, and off the coast of the United States did not, I repeat, did not originate from the planet Earth. It is my opinion, and the opinion of everyone here, that the Earth can no longer be defended from the Earth." President Carolina Garcia sat in the Roosevelt Room across the hall from the Oval Office and gazed at the four people sitting opposite her in unblinking shock. As she looked at the Secretary of Defense, the Director of the Central Intelligence Agency, the Director of the FBI, and the Administrator of NASA, her mind was so scrambled that she could not even remember which one just uttered the surreal and blood-chilling identity of the enemy which just attacked earth.

What If? Penguin

Hiroshima is the story of six people—a clerk, a widowed seamstress, a physician, a Methodist minister, a young surgeon, and a German Catholic priest—who lived through the greatest single manmade disaster in history. In vivid and indelible prose, Pulitzer Prize-winner John Hersey traces the stories of these half-dozen individuals from 8:15 a.m. on August 6, 1945, when Hiroshima was destroyed by the first atomic bomb ever dropped on a city, through the hours and days that followed. Almost four decades after the original publication of this celebrated book, Hersey went back to Hiroshima in search of the people whose stories he had told, and his account of what he discovered is now the eloquent and moving final chapter of Hiroshima.
