*El análisis de puestos* Editorial Limusa

The coauthor of the international bestseller *Execution* has created the how-to guide for solving today's toughest business challenge: creating profitable growth that is organic, differentiated, and sustainable. For many, growth is about "home runs"—the big bold idea, the next new thing, the product that will revolutionize the marketplace. While obviously attractive and lucrative, home runs don't happen every day and frequently come in cycles. Products like Kevlar, Teflon, and the Dell business model for selling personal computers may be once-in-a-decade phenomena. A surer and more consistent path to profitable revenue growth is through "singles and doubles"—small day-to-day wins and adaptation to changes in the marketplace that build the foundation for substantially increasing revenues. The impact of singles and doubles can be huge. They are not only the basis for sustained revenue growth but, in fact, the foundation for home runs. Singles and doubles provide the discipline of execution, an absolute necessity for successfully bringing a breakthrough technology to market or implementing a new business model. Inherent in this way of thinking is the revolutionary idea that growth is everyone's business—not solely the concern of the sales force or top management. Just as everyone participates in cost reduction, so must everyone be engaged in the growth agenda of the business. Every contact of each employee with a customer is an opportunity for revenue growth. That includes everyone from the people working in a company's call center handling customer inquiries and complaints to the CEO. In this trailblazing book, Ram

Charan provides the building blocks and tools that can put a business on the path to sustained, profitable growth. For more than twenty-five years, Ram Charan has been working day in and day out with companies around the world. The ideas he has developed for solving the profitable revenue growth dilemma facing many businesses are based on personally seeing what works in real time. These are ideas that have been tested across industries and that deliver results, and they can be put to use starting Monday morning.

In developing countries, the extent to which intellectuals disengage themselves in state activities has widespread consequences for the social, political, and economic development of those societies. Roderic Camps' examination of intellectuals in Mexico is the first study of a Latin American country to detail the structure of intellectual life, rather than merely considering intellectual ideas. Camp has used original sources, including extensive interviews, to provide new data about the evolution of leading Mexican intellectuals and their relationship to politics and politicians since 1920.

The best organizations have the best talent. . . Financial incentives drive company performance. . . Firms must change or die. Popular axioms like these drive business decisions every day. Yet too much common management “wisdom” isn't wise at all—but, instead, flawed knowledge based on “best practices” that are actually poor, incomplete, or outright obsolete. Worse,

legions of managers use this dubious knowledge to make decisions that are hazardous to organizational health. Jeffrey Pfeffer and Robert I. Sutton show how companies can bolster performance and trump the competition through evidence-based management, an approach to decision-making and action that is driven by hard facts rather than half-truths or hype. This book guides managers in using this approach to dismantle six widely held—but ultimately flawed—management beliefs in core areas including leadership, strategy, change, talent, financial incentives, and work-life balance. The authors show managers how to find and apply the best practices for their companies, rather than blindly copy what seems to have worked elsewhere. This practical and candid book challenges leaders to commit to evidence-based management as a way of organizational life—and shows how to finally turn this common sense into common practice.

**The Definitive Drucker** Cengage Learning

The product of five years' investigative reporting, the subject of intense national controversy, and the source of death threats that forced the National Human Rights Commission to assign two full-time bodyguards to its author, Anabel Hernández, *Narcoland* has been a publishing and political sensation in Mexico. The definitive history of the drug cartels, *Narcoland* takes readers to the front lines of the “war on drugs,” which has so far cost more than 60,000 lives in just six years. Hernández explains in riveting detail

how Mexico became a base for the mega-cartels of Latin America and one of the most violent places on the planet. At every turn, Hernández names names – not just the narcos, but also the politicians, functionaries, judges and entrepreneurs who have collaborated with them. In doing so, she reveals the mind-boggling depth of corruption in Mexico's government and business elite. Hernández became a journalist after her father was kidnapped and killed and the police refused to investigate

without a bribe. She gained national prominence in 2001 with her exposure of excess and misconduct at the presidential palace, and previous books have focused on criminality at the summit of power, under presidents Vicente Fox and Felipe Calderón. In awarding Hernández the 2012 Golden Pen of Freedom, the World Association of Newspapers and News Publishers noted, "Mexico has become one of the most dangerous countries in the world for

journalists, with violence and impunity remaining major challenges in terms of press freedom. In making this award, we recognize the strong stance Ms. Hernández has taken, at great personal risk, against drug cartels."
