Infobase Publishing

This publication reflects the results of the Ethiopian education reform as well as the exceptional efforts that multiethnic Ethiopia undertakes in order to cope with the challenges arising from the population explosion.

More than 55 per cent of the 77 million Ethiopians are under the age of 18 years. The great social and political changes started in Ethiopia at the beginning of the 1990s have resulted in the substitution of the educational system based on Amharic and English by one which uses a multilingual approach. According to the Ministry of Education 22 out of the 84 languages spoken in

Ethiopia are now used as media of instruction in primary schools. The book presents the lectures delivered at the workshop "On the Results of the Reform in Ethiopia's Language and Education Policy" held at Addis Ababa University in April 2006 by Ethiopian education experts and a German research team. Their contribution has facilitated a subsumption into the historical context and

has given insight into the analyses of the use of 8 Ethiopian languages in primary schools in different regions of the country.  On August 28, 1963, Martin Luther King, Jr., electrified the nation when he delivered his "I Have a Dream" speech from the steps of the Lincoln Memorial. In *The Dream*, Drew D. Hansen explores the fascinating and little-known history of King's legendary address. *The Dream* insightfully considers how King's speech "has slowly remade the American

imagination," and led us closer to King's visionary goal of a redeemed America. **K-12 Schools**

Wayne State University Press  
This laboratory manual is designed for an introductory majors biology course with a broad survey of basic laboratory techniques. The experiments and procedures are simple, safe, easy to perform, and especially appropriate for large classes. Few experiments require a second class-meeting to complete the

procedure. Each exercise includes many photographs, traditional topics, and experiments that help students learn about life. Procedures within each exercise are numerous and discrete so that an exercise can be tailored to the needs of the students, the style of the instructor, and the facilities available. Math Starters

This book guides the adoption, design,

development and expectation of future digital teaching and learning projects/programs in K12 schools. It provides a series of case studies and reports experiences from international digital teaching and learning projects in K12 education. The book also furnishes advice for future school policy and investment in digital teaching and learning projects.

Finally, the book provides an explanation of the future capacity and sustainability of digital teaching and learning in K12 schools.

### **For Our Soul**

Philadelphia : Temple University Press  
Solomon, Martin, Martin and Berg's BIOLOGY--often described as the best majors' text for learning Biology--is also a complete teaching program. The integrated, inquiry-based

learning system guides students through every chapter with key concepts at the beginning of each chapter and learning objectives for each section. End-of-section Checkpoint questions encourage students to review key points before moving on. A chapter summary further reinforces learning objectives, followed by an opportunity for students to test their understanding . The eleventh

edition offers expanded integration of the text's five guiding themes of Biology--the evolution of life, the transmission of biological information, the flow of energy through living systems, interactions among biological systems and the inter-relationship of structure and function. Contains approximately 800 alphabetical entries, prose essays on important topics, line illustrations, and black-and-white photographs. Ethiopian Journal of Education Elsevier Health Sciences Between 1977 and 1992, practically all Ethiopian Jews migrated to

Israel. This mass move followed the 1974 revolution in Ethiopia and its ensuing economic and political upheavals, compounded by the brutality of the military regime and the willingness—after years of refusal—of the Israeli government to receive them as bona fide Jews entitled to immigrate to that country. As the sole Jewish community from sub-Saharan Africa

in Israel, the Ethiopian Jews have met with unique difficulties. Based on fieldwork conducted over several years, *For Our Soul* describes the ongoing process of adjustment and absorption that the Ethiopian Jewish immigrants, also known as Falasha or Beta Israel, experienced in Israel. *Acute Rheumatic Fever and Rheumatic Heart Disease*, E-Book World Bank

Publications Although there are numerous technical-scientific books on breast cancer in the global bibliography, such books deal exclusively with the nature of the disease in majority populations of the Western societies, with little or no reference to the nature of the disease in the minority populations in such societies. Similarly, the nature of breast cancer in black women of the less privileged societies, and in women of ethnic groups living in countries of similar socio-economic status, is virtually unknown. For various epidemiologic al reasons, breast cancer incidence is rapidly increasing in these countries, more so than currently is the case in developed countries. Thus, the global burden of cancer is shifting gradually to these areas of the world, and may equal or even surpass the breast cancer burden in the Western societies within the foreseeable future. This book is unique because it bucks the trend of virtually all other breast cancer books by addressing specifically the breast cancer experience of women of African descent and their lifestyle counterparts in other societies of the world.
