This volume gathers 19 papers first presented at the 5th International Symposium of the ICA Commission on the History of Cartography, which took place at the University of Ghent, Belgium on 2-5 December 2014. The overall conference theme was 'Cartography in Times of War and Peace', but preference was given to papers dealing

with the military cartography of the First World War (1914-1918). The papers are classified by period and regional sub-theme, i.e. Military Cartography from the 18th to the 20th century; WW I Cartography in Belgium, Central Europe, etc.

creative business model creation. All of the contributions introduce business models and strategies, process innovations, and toolkits that can be applied at the managerial level, ensuring the book will be of interest to healthcare professionals, hospital managers and consultants, as well as scholars, whose focus is on improving value-generating and competitive

business architectures in the healthcare sector. *Service Business Model Innovation in Healthcare and Hospital Management* Koenig Books Eyewitnessing evaluates the place of images among other kinds of historical evidence. **Novel Approaches to the Diagnosis and Treatment of Posttraumatic Stress Disorder** Presidio Press Volume 36 of Reviews in

Mineralogy presents a comprehensive coverage of the mineralogy and petrology of planetary materials. The book is organized with an introductory chapter that introduces the reader to the nature of the planetary sample suite and provides some insights into the diverse environments from which they come. Chapter 2 on Interplanetary Dust Particles (IDPs) and Chapter 3 on Chondritic

Meteorites deal with the most primitive and unevolved materials we have to work with. It is these materials that hold the clues to the nature of the solar nebula and the processes that led to the initial stages of planetary formation. Chapter 4, 5, and 6 consider samples from evolved asteroids, the Moon and Mars respectively. Chapter 7 is a brief summary chapter that compares aspects of melt-derived

minerals from differing planetary environments. **Explaining Compliance** OECD Publishing In this thought-provoking book, Jonathan McMillan dissects banking to reveal its inner workings. He cuts through the complexity of modern finance and explains how banking almost crashed our financial system. Banking is broken, and

McMillan reveals why we can no longer fix it. The digital revolution turns out to be the game changer that calls for the end of banking. But McMillan refrains from merely pointing out flaws. Building on economic research and a rigorous analytical approach, he goes on to provide an innovative blueprint for a modern financial system. The End of Banking transforms our

understanding of the financial system. It identifies the root cause of today's problems with banking and presents a solution that stands out against existing reform proposals.

Global Material Resources Outlook to 2060 Economic Drivers and Environmental Consequences IOS Press

A tribute to an essential part of our natural and cultural environment.

24 European cases studies written by international grassland experts. Thematic chapters provide essential background information on grassland fauna, the history of agriculture, grassland communities, the relationship between grasslands and climate and opportunities to conserve these grasslands of high nature value.

If you are looking for a remarkable, pictorial history book of the highly distinguished 84th Division

during World War II, there is no better source! This is a unique book full of over 300 WWII photographs taken by Maurice Miller while serving in Europe with General Alexander Russell Bolling's division, the Railsplitters. General Bolling assigned Mr. Miller to be the principle photographer to record history in the making. His photographs were widely published, helped boost morale and

chronicled the Division's impressive accomplishments. After the War, Miller was able to keep a duplicate set of photo prints for himself, which very, very fortunately, after many years of preservation effort, are now available in this one amazing book. From generals to soldiers at the front, concentration camps, POWS, Russians at the Elbe River, and numerous post-war events, Mr. Miller covered

the war from his perspective, one that very few ever saw. Mr. Miller photographed with a passion, zeal and a sense of duty. A story is told here, you might say a 'visual diary' of how Mr. Miller portrayed his experiences. Though a pricey book as books go, this is ALSO a fantastic collection of photographs you will see nowhere else in the world! For any collector, or those interested in the work of

talented photographers or anyone with an interest in the 84th division, this book is well worth every penny. It truly is one of a kind. It can not be emphasized enough how much effort in all aspects went into the creation of this book! Please feel free to contact the author for any requests whatsoever: Mark Miller mjmphotos@yahoo.com

'Taking a broad view of

regulation, and covering a wide range of issues and industries, this collection is the most innovative effort to date to understand the responses of business firms to regulation. The book brings together an impressive group of scholars who analyze the concept of compliance and offer theoretically informed studies of its assumed links to regulation. A must read for both academics

and practitioners, this groundbreaking collection firmly establishes a scholarly field of compliance studies.'
Ronen Shamir, Tel Aviv University, Israel
'Business responses to regulation is a key area of social science research. Parker and Nielsen's collection brings together an excellent group of scholars with innovative, and I believe highly influential

contributions that problematize the relations between regulation and compliance. The collection is a highly welcome addition to our field, that will redefine the research agenda on compliance. A significant achievement that will help to improve policy making and frame the scholarly research agenda for the years to come.' David Levi-Faur, The Hebrew University of Jerusalem, Israel and the

Free University of Berlin, Germany 'A timely and important set of analyses on how and why businesses respond to regulation in the way that they do from some of the leading authors in the field, covering business responses to both state and non-state regulatory systems.' Julia Black, London School of Economics, UK Explaining Compliance consists of sixteen specially commissioned

chapters by the world's leading empirical researchers, examining whether and how businesses comply with regulation that is designed to affect positive behaviour changes. Each chapter consists of reflective summaries on business compliance with different state or voluntary regulation, and the theoretical lessons to be drawn from it. As a whole, the book

develops understanding and explanations of how, why and in what circumstances, firms come to comply with regulation, and when they do not. It also uncovers the complexity, ambiguity and transformation of regulation as it is interpreted, implemented and negotiated by firms, their stakeholders and internal constituencies in everyday business life. This unique and detailed resource will

appeal to academics, graduate students and senior undergraduates in law, political science, sociology, criminology, economics, and psychology, as well as business and interdisciplinary areas such as law and society, and law and economics. Anyone researching business regulation, corporate social responsibility, regulation and enforcement

and compliance, and public administration, will also find this book beneficial. Atlas zu Alex. von Humboldt's Kosmos Springer Science & Business Media Presents a series of anecdotes that tell the history and meaning of American uniforms, identifying their cultural significance in terms of how uniforms unite and divide people as well as how they vary

throughout the world. <i>Hydrothermal Uranium Deposits</i> Collins Vols. for 1948/50- issued in two parts: 1. Autorenund Anonymenreihe, Stichwörter (varies slightly) -- 2. Elements, sulfides, sulfosalts, oxides</u> Houghton	Mifflin Harcourt Set in the Warring States period, Jiang Li, Warrior Woman of Yueh tells the story of one of the epic battles of Ancient China between the enemy states of Yueh and Wu. Marked by the magic of White Tiger Mother and trained to use the staff by the great mountain ape, Grandfather Wang, Jiang Li grows into a beautiful woman, loved by all in Yueh who meet her.	Faced with the choice of becoming concubine to the Prince whom she loves, or a warrior and savior of Yueh, she forfeits love of a man for love of her country. While Jiang Li trains to save the State of Yueh, another woman warrior, Brother Rat, trains to save her State of Wu. The two women meet in dreams, and by the time they meet in life, they have become friends who must fight to

<p>the death. <i>Global Change in the Holocene</i> Routledge The Collins New Naturalist series is the longest- running and arguably the most influential natural history series in the world with over 100 volumes published in over 60 years. This edition is produced from an original copy by William Collins. While the mainstream New Naturalist volumes were initially intended to</p>	<p>deal with broad subjects such as wild flowers, insects or National Parks, a parallel New Naturalist series of monographs on single species or related groups of species was also published between 1948 and 1971. There have been no additions since. Now, for the first time in over forty years, these best-selling volumes are available again. The New Naturalist monographs shared the</p>	<p>same high standards of the main series and were envisioned as relatively short books of about 50,000 words, and in a smaller format than the main series. Artists Clifford and Rosemary Ellis were asked to design jackets for this series alongside the main series, which resulted in the same stunning, distinctive cover illustrations that had helped inspire an entire new generation of nature</p>

World. --
Witness to History My First Discoveries The Holocene spans the 11,500 years since the end of the last Ice Age and has been a period of major global environmental change. However the rate of change has accelerated during the last hundred years, due largely to human impacts and this has led to a growing concern for the future of our environmental

resources. Global Change in the Holocene demonstrates how reconstructing the record of past environmental change can provide us with essential knowledge about how our environment works and presents the reader with an informed viewpoint from which to project realistic future scenarios. The book brings together key techniques that are widely used in Holocene research, such as radiocarbon dating, dendrochronology and sediment analysis and offers a comprehensive analysis of various archives of environmental change including instrumental and documentary records, corals, lake sediments, glaciers and ice cores. This reference will be an informative and cutting-edge resource for all researchers in the fields of climate change, environmental science, geography, palaeoecology and archaeology. [Elenco del libro svizzero](#) Elsevier Science & Technology This report presents global projections of materials use and their environmental consequences , providing a quantitative outlook to 2060 at the global, sectoral and regional levels for 61 different materials (biomass resources,

The nineteen papers reflect the research interests of the Commission which span the period from the Enlightenment to the evolution of Geographical Information Science. Apart from studies on general cartography, the volume, which reflects some co-operation with the ICA Commission on Maps and Society and the United States Geological Survey (USGS), contains regional studies on cartographic endeavours in Northern America, Brazil, and Southern Africa. The ICA Commission on Maps and Society participated as its field of study often overlaps with that of the ICA Commission on the History of Cartography. The USGS which is the official USA mapping organisation, was invited to emphasise that the ICA Commission on the History of Cartography is not only interested in historical maps, but also has as mandate the research and document the history of Geographical Information Science. The ICA

Commission on Maps and Society participated as its field of study often overlaps with that of the ICA Commission on the History of Cartography.
