Quantum physics says that God can exist! With quantum science

explained in simple English, here is the unequivocal connections

between science and God—people have been wanting for

hundreds of years. Whether atheist, agnostic, or believer in God,

be prepared to be awestruck by how science supports the

possibility that God exists. The advanced branch of science

known as quantum physics is responsible for computers, cell phones, satellites, microwave ovens, MRI technology, in fact every modern convenience, and yet most people know nothing about this field of science. But it also comes with amazing characteristics that both explain and support a creator God as written in the Bible. If you thought you've heard every angle on proving God's existence, you will find yourself dumbfounded on this new information. Every major quantum and string theory phenomena described in this book aligns with a God concept and helps to bring in-depth answers to some of the toughest questions asked by the most ardent atheists and inquisitive agnostics. This book is also for the least and most passionate of believers in God. If God created the universe then God also created all the laws of physics, the rules by which the universe abides. This book is for those who love science and see God all around. It is for those who think logically and want some of their longing questions addressed: How can there be a Big Bang 13.8 billion years ago and yet God created the universe only 6-10,000 years ago? How can God know my every thought and of all 7 billion people at every second? How can God know everything that has and will happen and yet be surprised of someone's decision? and more. A Quantum Case for God introduces the God Model, an interpretation of how the universe works and challenges this model against all the current leading scientific models. The God Model is by far the most comprehensive model in the challenge. Read this book and see first hand how the universe works at the sub-atomic level and how God is serious business within the laws of physics.

The Tongue, a Creative Force Harrison House

'The Grand Design', by eminent scientist Stephen Hawking, is the latest blockbusting contribution to the so-called New Atheist debate, and claims that the laws of physics themselves brought the Universe into being, rather than God. In this swift and forthright reply, John Lennox, Oxford mathematician and author of 'God's Undertaker', exposes the flaws in Hawking's logic. In lively, layman's terms, Lennox guides us through the key points in Hawking's arguments - with clear explanations of the latest scientific and philosophical methods and theories - and demonstrates that far from disproving a Creator God, they make his existence seem all the more probable.

Does modern natural science suggest the existence of the Holy Trinity of Father, Son and Holy Spirit? How can we explain eternity and Heaven? Who is the Holy Spirit? Physicist Dirk Schneider beckons his readers to follow him on an enthralling journey of discovery over the course of which he comes up with an entirely new theory. In order to be able to explain the world we live in from the perspective of quantum physics, the existence of the Holy Trinity of Father, Son and Holy Spirit is apparently a necessity. Schneider's analysis uncovers surprising and easy-to-understand congruencies between the results of physics experiments and statements made in the Bible. What's more: the phenomena of quantum physics are easier to understand with the assistance of Biblical statements than they are without the Bible. Table of Contents 1. A long nightmare begins 2. The Power of Imagination reveals the part of spiritual life that is often shunned or closeted away because it may seem New Age or too

unconventional. But we all, with unveiled face, beholding as in a mirror the glory of the Lord, are being transformed into the same image from glory to glory, just as from the Lord, the Spirit (2 Corinthians 3:14-18). You can develop the ability to see as God sees. You can see the future that He planned for you before you were born. Through the power of your God-given imagination, nothing is impossible—no problem too big, no relationship too broken. This exciting new way of living is thoughtfully and biblically presented in a refreshing and empowering way that will keep you imagining for years to come. Topics include: How to Develop a Godly Imagination Supernatural Vision Living from the Inside Out Discerning Vain Imaginations Seeing the Unseen Deep Calls Unto Deep A special chapter is devoted to healing the orphan spirit that can keep people from becoming all God intended for them—walls are identified and torn down, replaced with a beacon of beauty and light shining throughout the spirit, body, and soul. Just imagine!

*A Quantum Case for God* Harrison House

The principle of calling things that are not as though they were is the spiritual principle through which everything physical becomes manifest. God created the light by calling for "light" when only darkness was there. Jesus used this same method, calling the lepers clean, and the dead to life, and peace to the storm. You must call for what you desire. if you want your dog to come, you call the dog, not the cat. You call for what is not there. Whatever

you call in the natural will come. Call what does not exist and continue to call until it manifests.

How You Can Avoid Tragedy and Live a Better Life Dr. Frederick K. C. Price Ministries

Choice Essential Read Did God create man or did man create God? In this book, Dianna Kenny examines religious belief through a variety of perspectives – psychoanalytic, cognitive, neuropsychological, sociological, historical and psychiatric – to provide a coherent account of why people might believe in God. She argues that psychoanalytic theory provides a fertile and creative approach to the study of religion that attempts to integrate religious belief with our innate human nature and developmental histories that have unfolded in the context of our socialization and cultural experiences. Freud argued that religion is so compelling because it solves the problems of our existence. It explains the origin of the universe, offers solace and protection from evil, and provides a blueprint about how we should live our lives, with just rewards for the righteous and due punishments for sinners and transgressors. Science, on the other hand, offers no such explanations about the universe or the meaning of our lives and no comfort for the unanswered longings of the human race. Is religion a form of wish-fulfilment, a collective delusion to which we cling as we try to fathom our place and purpose in the drama of cosmology? Can there be morality without faith? Are science and religion radically incompatible? What are the roots of fundamentalism and terror theology? These are some of the questions addressed in *God, Freud and Religion*, a book that will be of interest to psychoanalysts, psychologists and psychotherapists, students of psychology, psychoanalysis,

philosophy and theology and all those with an interest in religion and human behaviour. Dianna Kenny is Professor of Psychology at the University of Sydney, Australia. She is the author of over 200 publications, including six books.

How does quantum physics relate to the Bible? Can words move mountains? How did Jesus supersede the laws of physics? There are amazing similarities between the teachings of Jesus and the discoveries of the new physics, quantum theory. The concept of

speaking to mountains and trees may not be religious metaphor, but laws of a new physics that have not been fully understood. Jesus taught that our words are powerful enough to move physical matter. Quantum physics has discovered that subatomic particles respond to the observer. In this book, you will discover that your words and your faith (beliefs) are unseen forces that affect everything in your world. You are the one giving substance to your world through words!
