Meet Gilligan. Gilligan is
Fat. He lives on a boat. He
is a cat. Gilligan is a fat
boat cat. Get to know this
real-life cat who sails the
seas with his family. An
excellent read-aloud,
you'll giggle your way
through this picture book
as you discover what
Gilligan is up to on his
boat. Artfully drawn by
young graphic design
artist Hailey, who
boatschooled as she
traveled the oceans with
Gilligan.

Among the many
contributors to Sports Car
Market over the years,
few have amassed the
devoted and loyal

following that John
Draneas has with his
monthly column, Legal
Files. Thanks to a sharp
mind that can reduce the
most complex legal issues
to their most salient
points, Draneas never
fails to educate and
entertain with his
thoughtful prose. With his
unique insights and
perspectives on the
hobby, The Best of Legal
Files is an indispensable
resource for collectors
and enthusiasts to learn
from the mistakes made
by others.

Scale Model Gliders

There are fewer than
10,000 wooden boats in
America, but the
circulation of *WoodenBoat*
magazine exceeds
180,000. What is it about
these boats that has
captured the popular
imagination? With his
"lively blend of reportage

[and] reflection" (Los
Angeles Times), Michael
Ruhlman sets off for a
renowned boatyard in
Martha's Vineyard to
follow the construction of
two boats-Rebecca, a 60-
foot modern pleasure
schooner, and Elisa Lee, a
32-foot powerboat. Filled
with exquisite details and
stories of the sea, this
exciting exploration of a
nearly forgotten craft and
the colorful personalities
involved will enthrall
wooden boat owners as
well as craftspeople of
every stripe, nature
enthusiasts, and fans of
compelling nonfiction.

"This work is significant. It
is the first to include a
method of assessing
structural strength in the
context of the modern
marine environment." --
Commander M. C. Cruder,
U.S. Coast Guard
Acclaimed author and

naval architect Dave Gerr created this unique system of easy-to-use scantling rules and rules-of-thumb for calculating the necessary dimensions, or scantlings, of hulls, decks, and other boat parts, whether built of fiberglass, wood, wood-epoxy composite, steel, or aluminum. In addition to the rules themselves, *The Elements of Boat Strength* offers their context: an in-depth, plain-English discussion of boatbuilding materials, methods, and practices that will guide you through all aspects of boat construction. Now you can avoid wading through dense technical engineering manuals or tackling advanced mathematics. *The Elements of Boat Strength* has all the formulas, tables, illustrations, and charts you need to judge how heavy each piece of your boat should be in order to last and be safe. With this book, an inexpensive scientific calculator, and a pad of paper, you'll be able to design and specify all the components necessary to build a sound, long-lasting, rugged vessel. What reviewers have said about Dave Gerr's books: *Propeller Handbook* "By far the best book available on the subject."

-Sailing "The best layman's guide we've ever read."--Practical Sailor Dave Gerr and International Marine made a complicated topic understandable and put it into a handbook that is easy to use."--*WoodenBoat* "Without doubt the definitive reference for selecting, installing, and understanding boat propellers."--Royal Navy Sailing Association Journal *The Nature of Boats* "If you are not nautically obsessed before reading this book, you will most certainly be afterward."--Sailing Fascinating potpourri of information about today's boats, modern and traditional."--*WoodenBoat MotorBoating* Penguin "John Gardner's work has engaged and inspired more individuals connected with traditional small craft than will ever be counted."--*WoodenBoat* magazine "Deserves an honored place on the library shelf."--National Fisherman "Poses clear and impassioned means to go from the armchair to the open water via your own boat shop."--Sea History This big, handsome legacy volume contains all the plans, measurements, and

directions needed to build any of 47 beautiful small boats for oar, sail, or motor.

The hilarious new collection of stories and observations from Jeremy Clarkson - setting our off-kilter world to rights with thigh-slapping wit once again. Who is that tractor-driving Gentleman Farmer? Has Jeremy turned into a horny-handed son of the soil? These and other perplexing questions may or may not be answered in the latest volume of Clarkson's utterly unbiased musings on life, the universe and everything in between (except cars - this isn't one of his four-wheel drive books). Inside you'll also discover why: · Bathing in crude oil isn't for everyone · People who go fishing hate their kids · Noise-cancelling headphones will never silence James May · The rambler who stole his marrow is in for it Full of fact-checked opinions and ideas so good they're no longer following the science but chasing it up a tree, *Can You Make This Thing Go Faster?* is one hundred per cent guaranteed Clarkson . . . Praise for Clarkson:

 The 'SS United States' was a great symbol of post-World War II American genius. She was the most advanced ocean liner of her time—modern, innovative and hugely powerful. Designed to be a commercial liner but easily convertible to wartime troopship, she entered service in July 1952, seventy years ago, to rousing triumph and success. She captured the prized Blue Riband for transatlantic speed, brought glory to America and her owners, and enjoyed great success for a full decade. But after trans-ocean jets arrived, her success slowly faded until fully decommissioned by 1969. Over fifty years of idleness, revival plans and schemes, and neglect and decay followed. To this day, the 'United States' waits silently at a Philadelphia pier. This is the story of a very great and beloved ship—her glory days, but also her days of struggle and

indecision.

 È il 1842: Pietro, abile calafato, lascia il lago di Como e si trasferisce sul lago d'Iseo, a Sarnico, dove ha inizio l'avventura dei Riva. Nascono le barche da pesca, poi i battelli a vapore e ancora i primi scafi da corsa e da diporto. Nelle pagine del volume Decio Giulio Carugati racconta la storia dell'evoluzione del Cantiere Riva.
 L'iconografia declina le immagini di alcuni tra gli scafi più famosi e dei personaggi che hanno contribuito a caratterizzare, per oltre un secolo, il mondo della navigazione da diporto.
Model yachts and model yacht sailing, how to build, rig, and sail a self-acting model yacht
 Penguin UK
 The moment in 1958 when a sports car-crazed youth in Massachusetts saw his first Ferrari changed his life. The black 250 GT coupe's seductive lines, purposeful air and already hallowed name seized Robert E. Guarino's imagination; just a few years later, he would be selling such cars. And in 1967, with two partners and an investment of just \$6,000 apiece, he would

open a Ferrari-Porsche-Datsun dealership. This memoir follows his lifelong journey with Ferraris and other remarkable automobiles, as an enthusiast and dealer. Highlights include a nonstop drive from Chicago to Boston in a 308 GTB; rides with important figures like Piero Ferrari at Fiorano and Dario Benuzzi at Mugello; visits to the Ferrari, Maserati and Lamborghini factories; the horror of watching a delivery truck crash onto a row of new cars; and time at the wheel of such icons as the 365 GTB/4 "Daytona," 250 GTO, 288 GTO and F40.
Yachting Naval Institute Press
 Admittedly small and vulnerable, PT boats were, nevertheless, fast—the fastest craft on the water during World War II—and Dick Keresey's account of these tough little fighters throws new light on their contributions to the war effort. As captain of PT 105, the author was in the same battle as John F. Kennedy when Kennedy's PT 109 was rammed and sunk. The famous incident, Keresey says, has often been described inaccurately and the PT boat depicted as unreliable and ineffective.

This book helps set the record straight by presenting an authentic picture of PT boats that draws on the author's experience at Guadalcanal, New Georgia, Bougainville, and Choiseul Island. Action-filled, his account describes evading night bombers, rescuing coast watchers and downed airmen, setting down Marine scouts behind Japanese lines, engaging in vicious gun battles with Japanese barges and small freighters, and contending with heat, disease, and loneliness. First published in 1996, the book has been hailed for telling an exciting yet fully accurate story.

The Rudder Schiffer Pub Limited
An illustrated guide to wooden boat construction using WEST SYSTEM epoxy by pioneers in the field of wood/epoxy composite construction. Subjects include Fundamentals of Wood/Epoxy Composite Construction, Core Boatbuilding Techniques, First Production Steps, Hull Construction Methods, and Interior and Deck Construction.
Riva. A Name a Design. Ediz. Illustrata Penguin UK
In I Know You Got Soul, Jeremy Clarkson writes

about the machines that he believes have 'soul'. It will come as no surprise to anyone that Jeremy Clarkson loves machines. But it's not just any old bucket of bolts, cogs and bearings that rings his bell. In fact, he's scoured the length and breadth of the land, plunged into the oceans and taken to the skies in search of machines with that elusive certain something. And along the way he's discovered: • The safest place to be in the event of nuclear war • Who would win if Superman, James Bond and The Terminator had a fight • The stupidest person he's ever met • What an old Cornish institution called Arthur has to do with 0898 chat lines • And how Jean-Claude Van Damme might get eaten by a lion
In I Know You Got Soul: Machines with a Certain Something, Jeremy Clarkson tells stories of the geniuses, innovators and crackpots who put the ghost in the machine. From Brunel's SS Great Britain to the awesome Blackbird spy-plane and from the woeful - but inspiring - Graf Zeppelin to Han Solo's Millennium Falcon, they can't help but love them in return. Praise for Jeremy Clarkson: 'Brilliant . . .

laugh-out-loud' Daily Telegraph 'Outrageously funny . . . will have you in stitches' Time Out Number-one bestseller Jeremy Clarkson writes on cars, current affairs and anything else that annoys him in his sharp and funny collections. Born To Be Riled, Clarkson On Cars, Don't Stop Me Now, Driven To Distraction, Round the Bend and Motorworld are also available as Penguin paperbacks; the Penguin AppiClarkson: The Book of Cars can be downloaded on the App Store. Jeremy Clarkson because his writing career on the Rotherham Advertiser. Since then he has written for the Sun and the Sunday Times. Today he is the tallest person working in British television, and is the presenter of the hugely popular Top Gear.

The End of Bon Voyage

Hassell Street Press
The skipjack is one of the best working boats. Now Steve Rogers offers a guide for building a model skipjack, leading the craftsman step-by-step through the process. The result is a beautiful boat in full sail. The model is in 1/2" scale, based on a skipjack that is 45 feet on deck with a 15 foot beam. Drawings, patterns, jigs,

and accessories are all detailed. Everything is illustrated in clear color photographs.

The classic mahogany runabout is a universally popular modeling subject, but many newcomers to the modeling hobby are apprehensive about completing a build. Will they be able to fit the planks perfectly? And how about the glass-smooth clear finish, which tolerates no mistakes in woodwork or polishing? It's really not so hard, just follow the steps outlined here! Model boat buff Patrick Matthews covers the entire process, from choosing a project from

one of the many available kits, through building and finishing a mahogany marvel-- even the basics of Radio Control are covered. Additional suggestions are included for simple but effective customizations, as well as a gallery of models from some real masters of the craft-- temptation and encouragement for the modeler to stretch further yet. Patrick Matthews shares his enthusiasm for model boats through contributions to *Ships in Scale* magazine, where he covers Radio Control scale model boats. In his spare time, Patrick is an automotive engineer in Detroit.
