Winner of the CBCA Crichton Award for New Illustrators in the CBCA Awards, 2015 Honour Book for Picture Books in the CBCA Awards, 2015 In one minute of silence you can imagine sprinting up the beach in Gallipoli in 1915 with the fierce fighting Diggers, but can you imagine standing

beside the brave battling Turks as they defended their homeland from the cliffs above... In the silence that follows a war long gone, you can see what the soldiers saw, you can feel what the soldiers felt. And if you try, you might be able to imagine the enemy, and see that he is not so different from you... In One Minute's Silence, you are the story, and the story is yours - to imagine, remember and honour the brothers in arms on both sides of the conflict, heroes who shed their blood and lost their

lives. A moving and powerful reflection on the meaning of Remembrance Day.

This book inquires what is meant when we say "local" and what "local" means in the Japanese context. Through the window of locality, it enhances an understanding of broader political and socio-economic shifts in Japan. This includes

demographic change, electoral and administrative reform, rural decline and revitalization, welfare reform, as well as the growing metabolic rift in energy and food production. Chapters throughout this edited volume discuss the different and often contested ways in which locality in Japan has been reconstituted, from historical and contemporary instances of administrative restructuring, to more subtle social processes of

making - and unmaking - local places. Contributions from multiple disciplinary perspectives are included to investigate the tensions between overlapping and often incongruent dimensions of locality. Framed by a theoretical discussion of socio-spatial thinking, such issues surrounding the construction and renegotiation of local places are not only relevant for Japan specialists, but also connected with topical scholarly debates further afield. Accordingly,

Rethinking Locality in Japan will appeal to students and scholars from Japanese studies and human geography to anthropology, history, sociology and political science.

examines children's participation in dialectical reciprocity with place-

based institutional practices by presenting empirical research from Australia, Brazil, China, Poland, Norway and Wales. Underpinned by cultural-historical theory, the analysis reveals how outdoors and nature form unique conditions for children's play, formal and informal learning and cultural formation. The analysis also surfaces how inequalities exist in societies and communities, which often limit and constrain families' and children's access to and

participation in outdoor spaces and nature. The findings highlight how institutional practices are shaped by pedagogical content, teachers' training, institutional regulations and societal perceptions of nature, children and suitable, sustainable education for young children. Due to crises, such as climate change and the recent pandemic, specific focus on the outdoors and nature in cultural formation is timely for the cultural-historical theoretical tradition. In

doing so, the book provides empirical and theoretical support for policy makers, researchers, educators and families to enhance, increase and sustain outdoor and nature education.

In an international security environment described as one of renewed great power competition, the South China Sea (SCS) has emerged as an arena of U.S.-China strategic competition. U.S.-China strategic competition in the SCS forms an element of the Trump Administration's more confrontational overall approach toward China, and of the Administration's efforts for promoting its construct

for the Indo-Pacific region, called the Free and Open Indo-Pacific (FOIP). China's actions in the SCS in recent years—including extensive island-building and base construction activities at sites that it occupies in the Spratly Islands, as well as actions by its maritime forces to assert China's claims against competing claims by regional neighbors such as the Philippines and Vietnam—have heightened concerns among U.S. observers that China is gaining effective control of the SCS, an area of

strategic, political, and economic importance to the United States and its allies and partners. Actions by China's maritime forces at the Japan-administered Senkaku Islands in the East China Sea (ECS) are another concern for U.S. observers. Chinese domination of China's near-seas region—meaning the SCS and ECS, along with the Yellow Sea—could substantially affect U.S. strategic, political, and economic interests in the Indo-Pacific region and elsewhere.

 With English becoming the world's foremost lingua franca, the pressure to improve English language education (ELE) has been steadily increasing. Consequently, the nature of ELE has changed drastically in the last decade. This has not only brought about a number of changes in the way English is taught and learnt, but it has also led to various innovative practices around the world. As a result, this

edited book aims to shed light on the new theoretical and methodological developments in the field of ELE as well as the major issues and difficulties faced by practitioners in different parts of the globe. One very important variable that the book takes into account is the role that English already plays in a particular society since this may affect the views that teachers and students hold of the language. This in turn can significantly influence the

way English is taught and learnt in given political, economic and socio-cultural settings. The purpose of this book is therefore to provide a comprehensive overview of the pedagogical methods, policies and problems that underlie English language education in ten different regions across the world, including: the USA, Canada, the UK, Australia, New Zealand, India, Singapore, Japan, China and Hong Kong. In doing so, the different chapters in the book emphasize the

importance of responding to linguistic and other forms of diversity in order to develop English language education in a globalized world. This book will be useful for teachers and students of English language, for English language curriculum and materials developers, and for those involved in educational policy-making and language acquisition research. Written by experts in the field, the range of content covered in the book's chapters will also help policy-makers,

researchers and practitioners develop effective English language education practices and policies, and propose solutions to emerging issues in English language teaching and learning in different environments around the world. The newly-developed arguments and concerns pertaining to English language education will serve as future reference for professionals interested in this area of expertise.

In this candid, hilarious and informative book, Takei recounts his experiences on platforms such as Twitter, YouTube and Facebook, where fans and pundits alike have crowned him King.
